

FRE-FLO™ Increasing Profits, Saving Water and Increasing Product Quality

In this demonstration alfalfa field, FRE-FLO™ dramatically improved the crop yield by a very large margin. Results: 674 tons more crop yield on 360 acres (compared to previous crop yield without FRE-FLO™ treated water.

Crop Year 2001		Crop Year 2002		
Date of Harvest	Yield in Tons	Date of Harvest	Yield in Tons	% Difference
04-06-01	250 GC	04-03-02	182	-72%
05-15-01	110	05-18-02	263	+76%
06-18-01	149	06-17-02	288	+79%
07-18-01	245 GC	07-17-02	278	+12%
08-17-01	142	08-22-02	344	142%
09-14-01	145	09-20-02	360	+148%
Total Tons	1,041	Total Tons	1,715	Ton increase of = +674 tons

FRE-FLO™ ON THE LEFT, CONVENTIONAL IRRIGATION ON THE RIGHT.

As a green technology innovator, FRE-FLO™ is a trailblazer, conditioning water naturally since 1972. For over 40 years, FRE-FLO™ is still providing the grower higher yields, better crop quality and water savings.
