SANTA MONICA'S FAVORITE TACO SPOT EST. 1976

01/20/2022

To Whom it may Concern,

I installed a FRE-FLO™ unit June 12, 2018 after years of expensive maintenance and interruption to my business with outside maintenance personnel working in my kitchen.

It was necessary in the past to clean the ice machine of calcium scale build-up every 3 months. Since the installation of the FRE-FLO the schedule is now every 6 months. All that is necessary now is just to sanitize the ice machine. At 6 months it is still very clean.

It was explained to me that if scale did not build-up there would be less mold as the scale acts as a condo for bacteria and mold to grow. I am happy to report that this product performed as promised.

My ice machine is a ICE 0400HA2. Counting labor, water pumps, harsh chemicals, I have saved over \$900.00 per year.

We all in the restaurant are very happy and satisfied.
