* Ventilation shall be provided for the crawl space at a minimum of one sq. foot of free area for every 150 sq. ft. of the home's floor area. Ventilation openings shall be placed at or near each corner of the home and as high as practicable. Openings shall be located to provide cross ventilation on at least two opposite sides. Where an acceptable ground vapor barrier is installed and one such ventilation opening is within 3 feet of each corner of the home, the total area of ventilation openings may be reduced to one sq. foot for every 1,500 sq. feet of the home's floor area. Where local codes have minimum ventilation requirements for crawl spaces, these requirements shall apply to homes with skirting and continuous foundations.

# MEASURING FOR TRUGARD:

You must first determine the approximate linear feet and average height.

1. **Determine Linear Feet:** To determine the linear feet of skirting material needed, measure the entire perimeter of the home.
2. **Determine the Average Height:** To find the average height, measure the height of the space between the ground and the home's bottom edge at each corner and the center of each side. Total all six measurements and divide by 6. Then, add 1 inch.
3. **Using the Calculation Chart:** Then go to the easy-to-read calculation chart below and find the appropriate measurements. The chart will then tell you what you will need to complete the installation.

## LIFESTYLE COMPONENT & REPLACEMENT PARTS

### Lifestyle's center-vent panel is a better solution for your skirting needs:

- Allows you to carry less inventory and makes ordering easier.
- Each full panel = 4.94 sq. inches of net free area per linear foot for 57.63 square inches or 0.4 sq. ft of net free area per panel; Exceeds most manufacturer's requirements* for open space under homes, meaning less chance of moisture problems & customer complaints.
- Eliminates calculations of how many vent panels are needed.
- Saves time during installation - you don't have to waste time figuring out where to put regular vent panels.

CertainTeed

The look of textured stucco with the ease of skirting panels

# CERTAINTEED FIBER CEMENT SKIRTING SYSTEM

## CertainTeed Outperforms the Competition!

**Exclusive DuraPress®** embossing ensures product thickness consistency and authentic grains and textures, panel to panel, lot to lot.

**Superior resistance to damaging moisture** – no delamination ever. 60% higher interlaminate bond strength versus the competition means no delamination guaranteed!

**Proven highest durability.** Fracture/brittleness tests prove it.

**CertainTeed's exclusive precure chamber stops chalking.**

**FiberTect™ Sealant saves money** because it penetrates into and bonds with Fiber Cement. Once the board is sealed, it requires 15% less paint than competitive panels.

**The longest paint "window" means greatest job site flexibility** – 24 months before a finish must be applied – versus just the six months allowed by competitive siding manufacturers.

**Excellent safety from fire and wood-boring insects.** Class 1 (A) fire rating and are impervious to wood-boring insects like termites.

**Peace of mind with a solid warranty.** 50-year limited transferable warranty. And with CertainTeed's exclusive SureStart warranty protection, 100% of material and labors are covered during the SureStart period. (50-year warranty applies only if the product is installed according to installation instructions.)

**From this...** **to this... in a snap!**

Snaps right on to existing bottom track to hide and/or protect from string trimmer damage. UV protected vinyl is thicker and smoother than ordinary skirting with no edges for trimmer to catch on; even butt joints are smooth. Hides damage up to 4" high. Can be trimmed to bend to both outside and inside corners. Patented design keeps top edge snug – will not blow out or collect debris. White color only.

# PREMIUM DUTCH LAP VINYL SIDING

A home could be the largest investment many people will make. With that being said, it is important for the home owner to invest in products that will preserve the appearance of the home. Adding Elixir vinyl siding is just the product for that task. Our vinyl will help maintain that needed "curb appeal" and will also help protect the value of the homeowner's investment.

Produced in Tuscumbia, Alabama - our vinyl siding is held up to the most ardent quality standards. Our siding product is engineered for longevity and carries a 50 year warranty. It won't dent, rust, peel, chip, fade, blister, pit or warp. Elixir vinyl siding is virtually maintenance free.

## Saves time!

Unique offset design makes work more accessible so you can work faster and safer. Wider body and comfortable vinyl-grip handle conforms to your hand, protects knuckles and gives you greater leverage and control when replacing siding panels. Durable one-piece, spring steel construction is virtually indestructible.

## M-PLATE STABILIZER

- More cutting points for better balance
- Smaller and shorter plate is easier to get into ground
- "Power Ridge" provides extra strength for as much or more resistance than traditional plates
- More resistance concentrated at the top of the anchor, so plate performs as good or better than traditional plates even though it is smaller
- Meets all state requirements except FL, so can replace traditional stabilizer plates
- Average installation in 1/3 the time of traditional plates

Anchors may be effectively and safely installed manually, but the electric auger machine will make the job easier and faster. Remember, however, that this method of installation requires two people.

Always make sure to avoid underground water, phone and power lines.

Attach the anchor to drive machine. Line up the auger with the strap and start machine. Install anchor at a slight angle (12° - 15°) underneath the house. This will ensure that the head of the anchor will be concealed behind future skirting.

# HOME PIERS

Lightweight and stackable for easy storage, shipping and handling. Adjustable heights for precise installation. Only 16 piers replace the 64 concrete blocks normally required to support a 70' x 14' mobile home. Withstands in excess of 15,000 lbs. of pressure—more than 12 times the actual mobile home load of 1,268 lbs. on each stand. Ideal for quick, secure setups in dealer lots as well as the home site.

Pier head nut must be ordered with each pier

Section 3285.505 Crawlspace Ventilation - A crawlspace with skirting must be provided with ventilation openings. The minimum net area of ventilation openings must not be less than one sq ft for every 150 sq ft of the home's floor area. The total area of ventilation openings may be reduced to one sq ft for every 1,500 sq ft of the home's floor area, where a uniform 6 mil polyethylene sheet material or other acceptable vapor retarder is installed, according to 3285.204, on the ground surface beneath the entire floor area of the home.

Section 3285.204 Ground Moisture Control - The HUD code does not permit any voids or tears in the ground vapor retarder, requires all joints to be overlapped at least 12", and allows the vapor retarder to be installed around or over footings and other obstructions. The final rule requires the thickness of the vapor retarder to be a minimum of 6 - mil polyethylene sheeting. All enclosed and skirted areas are to be provided with a ground vapor retarder, except in arid regions and areas for open porches, decks and recessed entries.

Special Order Doors

# MEASURING FOR REPLACEMENT DOORS

There are many ways to measure for a door replacement, but Elixir recommends you measure your rough opening and select the replacement size which is closest to it.

All mobile home door sizes are based on their rough opening size (shown at right).

If you were to remove your existing door, the opening in the wall is the rough opening. ***That is the measurement you need.***

## Taking your measurements for a Combination House Type Door

In most cases you will have to take measurements prior to removing the door. In that case, we suggest that you pull pack your trim inside the home exposing the door jamb. Measure from outside of the jamb to outside of jamb both in width and height. ***This will give you the correct rough opening. You will also need the width of your jamb, ie 4" or 6".***

## Taking your measurements for a Single, Outswing Type Door *(Typically a rear door)*

The most common mistake when measuring a mobile home door is to measure the door itself— this will result in an incorrect size. The correct way to measure a rear door if you don't know the rough opening is to measure the lid of the door (see photo at right). The lid is larger than the pan and is the side of the door that faces the outside of the home. The pan is inside the home. If you measure the lid, it will match the rough opening of the door.

## Taking your measurements for a Storm Door

Storm doors use the same rough opening measurement of the combo door it will be installed upon. Do not measure the storm door but instead measure the jamb as if you were measuring a complete combo door.

## Is my door left hand or right hand?

Go outside into the yard, turn around and face the door, whichever side the hinge is on, determines left hand or right hand. This is the same for rear doors, combo doors and storm doors.

# SLIDING GLASS PATIO DOORS

## Vinyl — 72" x 76"

- Attractive low profile multi-chambered frame increases viewing area and improves thermal and sound insulating value.
- Standard frame for use with lap siding. Lap frame with integral siding pocket that eliminates the need for additional siding trim pieces.
- Heat fusion welded frame and moving panel provides superior structural strength and prevents potential leakage at the corners.
- Staggered internal weep system allows minimum dust infiltration. Snap-in weep covers are standard.
- 3/4 inch sealed insulating glass (tempered) with "intercept" spacer and optional Low-E provides optimum thermal performance.
- Color coordinated attractive mortise type keyed lock mounted on steel reinforced lock jamb for strength and sturdiness that provides added security. Lock keeper is adjustable.
- Easy to reverse the door from XO to OX or OX to XO. Reversing must be done prior to installation.

XO: From outside looking in, left panel slides, right panel is stationary.

OX: From outside looking in, right panel slides, left panel is stationary.

# 1-3/8" INTERIOR DOORS

**SIX-PANEL MASONITE MOLDED DOORS:**

The Masonite® Molded Panel Series is the industry benchmark for all composite wood doors. This series utilizes a composite wood construction that results in a more durable door that resists warping, shrinking, and cracking better than a solid wood door. In harvest oak or classic white. Uses non-mortise hinges.

**STANDARD DOORS:**

The Masonite® Veneer Flush interior door offers the visual beauty and refinement of natural wood doors at a value price. These doors are available as hollow core or solid core for the weight and feel of solid wood. Veneer Flush doors are both stainable or paintable.

# ROLL-UP DOORS - MODEL 1950

Our Model 1950 door is economical, durable—and a little wiser for the wear. Exterior polypropylene wearstrips reduce friction and ensure smooth quiet operation. When cost is a major consideration, the Model 1950 is the door of choice, designed economically without sacrificing performance, craftsmanship, or aesthetics.

- A low cost alternative to slat type doors
- A cam-action spring tension holding device allows quick, easy, safe and equal adjustment of the tension.
- Exterior polypropylene wearstrips reduce friction and ensure smooth quiet operation.
- Guides constructed of 16 gauge roll formed hot dipped galvanized steel for wood, masonry or steel* mounting
- Available in sizes up to 12' (3658mm) wide and 14' (4267mm) high
- 2 inside bottom bar locks.
- Over 25 different color options available
- Curtain manufactured from 26 gauge corrugated hot-dipped galvanized steel with 40 year film integrity and 25 year no fade limited paint warranty.
- 9-1/2" drum assembly suitable for low headroom conditions

The closer you look, the more you will appreciate the quality and durability of our roll-up steel door, the standard of the metal building, shed, carport and self-storage industry.

We understand the importance of tough long-lasting finishes, moving parts requiring minimal maintenance and doors that are easy to open and easy to close every time. Can be installed quickly and mounted to wood, masonry, or steel jambs, with sizes up to 10' (3048 mm) wide by 10' (3048 mm) high.

Designed with radial steel bearings standard in the door mounting brackets, surpasses all specified factory cycle tests showing almost no signs of any component wear after more than 100,000 tested cycles. Designed to last a lifetime and has earned its reputation as the self-storage "Roll-Model."

Features a galvanized enclosed barrel protecting the axle, drums and a fully lubricated spring assembly. This model includes an exclusive tension device providing unrivaled safety and speed for tension adjustment making it excellent for the do-it-yourself and retail markets.

Perfect for installation in self-storage facilities, sheds carports and confined workshop conditions.

# POCAHONTAS ALUMINUM WINDOWS

Pocahontas Aluminum windows meet or exceed all applicable test criteria set forth in AAMA 1702.2-02 and applicable ASTM standards for weatherization and optional structural performance for Wind Zone III (155 mph) as referenced in CFR 3280.305©. This testing included an Air Infiltration Test, Water Resistance Test, Structural Performance Test (Exterior and Interior Pressure), and an Optional Increased Structural Performance Test.

PAC windows also passed structural loading at +/- 85 PSF (184.5 MPH and 16" $H^20$).

- Vertical and Horizontal Slider Windows.
- Multiple fixed open positions.
- Bulb vinyl seal on sliding insert and vinyl sealed interlocking meeting rail for excellent weatherization.
- Pile weather-stripping in sliding rail for long-lasting seal.
- Removable spring loaded screen.
- Pre-punched mounting holes.
- All standard mobile home sizes available.
- Mill or painted frame.

## INSULITE LIGHT COVERS

A fire retardant cover designed to allow safe and effective insulation around recessed lights. Without proper insulation, areas around recessed lights can allow a large amount of heat energy to enter/escape from a building and become a fire hazard as well. When installed, this insulation allows closeness to the light or heat producing fixture as possible without the risk of fire.

# FORCE/2 INSULATION BLOWER

**Professional Grade – Virtually Indestructible!**

The FORCE/2 is the insulation blower you want when you need a larger, stronger machine. With an 8½ cu. ft. hopper that can hold 50 lbs of material, a strong 1½ hp motor and a powerful 3.6 PSI blower, the FORCE/2 blows up to 2,012 lbs of light density cellulose and 428 lbs of fiberglass per hour. And for the more demanding jobs, the FORCE/2 is now available with an incredible 4.5 PSI, 116 CFM blower. Easy setup, operation and cleanup. It takes only four switches to operate the FORCE/2. No complicated gauges, dials, or knobs.

**0380453**

# FORCE/3 INSULATION BLOWER

High production at 2520 lbs of cellulose & 1350 lbs of fiberglass per hour. Portable. Dual blowers. 3.0 or 4.0 PSI. Long life seals

**0380454**

# WASP INSULATION BLOWER

The WASP represents the best insulation blowing technology available, refined and enhanced with your ideas and suggestions. What's more, the WASP utilizes proven airlock technology for simplicity and minimal downtime. The result is the best lightweight machine on the market, tailored to meet your demanding requirements.

HOTPOINT

# NO-BURST DISHWASHER CONNECTIONS

48" of the highest burst strength available—250 ft. of stainless steel wire per foot; stainless ferrules are extra long with added crimps for security. Tough, non-toxic polymer core resists chlorine and chloramines. Ample inside diameter for high flow capacity. Captive cone washers seal tightly, can't fall out. Exceptional flexibility for easy install. Won't kink or crease, even in the tightest spaces. Heavy-duty brass hex nuts are easy to grip with fingers or tools and nickel plated for durability. Code approved, exceeding all plumbing code requirements. Exceeds all requirements for flexible water connectors as defined by ASME A112.18.6 and CSA B125. 5-year warranty.

# SIDESWIPER®

Saves time!

Unique offset design makes work more accessible so you can work faster and safer. Wider body and comfortable vinyl-grip handle conforms to your hand, protects knuckles and gives you greater leverage and control when replacing siding panels. Durable one-piece, spring steel construction is virtually indestructible. 6/Ctn.

**0381002**

**Using the SideSwiper**

Wedge tip under the bottom end of overlapping panel and hook on the back lip of buttlock in one easy motion.

Pull downward on SideSwiper's® handle and slide row of siding panel to disengage lock and expose nail row of sliding panel to be replaced.

Use in the same manner to install replacement panel.

# ALUMINUM HANDLED SNIPS

# CENTER-SEAL

**CENTERLINE INSULATOR**

- Provides a continuous seal
- Withstands exposure to the elements
- Does not blow off during transport
- Lasts even through repeated resets
- Eliminates customer concern over visible daylight
- Superior insulation for better energy efficiency and protection against rodents and insects
- Compact, lightweight and easy to handle; no skin irritation
- Needs no special tools - staples or tucks
- Installs faster than fiberglass, spray foam, etc.
- Unlike other materials, does not absorb moisture but blocks it, protecting home against structural and cosmetic damage

0265055 2" X 375'

# SILL PLATE SEALER

Sill Seal is specifically designed to fill the air gaps between the sill plate and wall.

Multi-purpose ridged sill plate gasket provides resilient sealing, a perfect seal for setting up double-wide homes.

- Made of quality polyethylene
- Prevents rotting of sill plate
- Water and insect repellent
- Will not deteriorate
- Fills gaps between sections of home
- Easy to install -- needs no special tools
- Resists moisture penetration to interior of structure

# TACKY TAPE®

A highly elastic butyl rubber tape with excellent surface tack specifically designed for sealing metal joints. Its superior surface tack allows it to adhere to metal without pre-wiping the surface .It has excellent adhesion and compressibility to cold substrates. It is formulated without asbestos fillers.

- Excellent adhesion to aluminum, aluminized steel, polyvinyl fluoride and siliconized polyester painted metal,concrete,FRP,and glass
- No cracking or loss of adhesion at -40°F
- Service Temperature Range -40°F to 180°F
- Application Temperature Range -5°F to 120°F
- Adhesive Tensile Strength (ASTM C907)20 psi minimum
- Will resist fungal attack and not support mildew growth
- USDA acceptable
- Meets Federal Specification TT-C-1796A, Type II
- Meets AAMA 804-92 and 807-92 (this specification supercedes obsolete NAAMM Standard SS-1b-68)

*"Shield carpets from stain, dirt & wear."*

Durable 3 mil, non-skid polyethylene film prevents damage during high traffic display periods, bad weather or while repairs are being made. Pressure-sensitive adhesive on one side, reverse rolled for easy application. Roll it across the floor, or use the handy Excaliber applicator for fast, wrinkle-free application. To remove, simply peel off and discard. Non-transferable adhesive will not harm carpets.

**0265010 23.5" X 1000' ROLL**
**0265011 23.5" X 200' ROLL**
**0265015 EXCALIBER APPLICATOR**

NOTE:
Should not be left in place for more than 45 days. It should be removed or replaced sooner if subjected to heavy foot traffic, high humidity, high temperatures or direct sunlight. Not recommended for natural fiber (wool) carpets. Do not use on marble, tile, vinyl, counter tops, etc. where it is difficult to remove. Temperatures greater than 100° F may prevent Carpet Armour from releasing properly.

## PORTABLE UV-AIRE® AIR PURIFICATION MODELS

The portable UV-Aire models combine the purifying power of UV with high efficiency and carbon filtration to reduce dust, pollen, odors, and VOCs. The UV-Aire portables are recommended for anyone with allergies, a respiratory illness, or a compromised immune system.

The high intensity ultraviolet light attacks airborne mold, bacteria, and viruses. The high efficiency filter traps allergens, dust, and pollen. The carbon filter removes odors and attacks VOCs (volatile organic compounds).

### UV-500C PORTABLE

- Uses UV germicidal light, carbon, and high efficiency filtration (8"germicidal UV lamp)
- Quiet, heavy duty fan with 3-speed control
- Purifies air in areas up to 500 square feet
- Circuit board monitors lamp and filter life (10"x10" high- efficiency/carbon filter)
- Visible lamp and filter replacement alerts
- Plugs into any standard 120v outlet
- Built-in handles for easy portability
- Non-skid rubber feet

# SELF-CONTAINED RECEPTACLES & SWITCHES

Wirecon Self-Contained Devices are designed to meet the increasing industry demand for correct and faster installation. Wirecon's SCD's are self-contained, completely insulated and DO NOT require a separate outlet box.

Use with #14 or #12 AWG wirecopperNM or NMB cable only.

Devices secure to the wall surface with two self-ranging pawls and are ideal for factorybuilt and transit applications where vibration-resistance is especially important. Finish off SCD installations with Wirecon's Snap-On or standard Screw-On wall plates for a decorative appeal that is identical to conventional residential devices.

Performance, speed and safety were the driving forces behind the redesign of the Wirecon installation tool. Having the ability to install multiple conductors into the self-contained device quickly and accurately was the focus of our design. Now the installer can position the conductors over the insulation-displacement contacts and quickly terminate the conductors.Installation tool, complete with wire installation pushers.

# SELF-REGULATING, CUT-TO-LENGTH CABLE

FREEZE free®

Freeze Free® Cable – Self-regulating pipe heating cable that automatically varies its heat output with changes in surrounding temperature. Freeze Free cable helps keep plastic and metal water pipes from freezing to -60°F/-51°C. A braided metal jacket provides an electrical ground as well as protection against damage in dry locations. Freeze Free cable is available on reels of 100 feet, 300 feet and 500 feet and can be cut to desired lengths per application.

Pre-packaged lengths of 5 feet and 15 feet are also available.

3 watts per foot, 120 VAC at 50°F; 75-foot maximum circuit length, 3-foot minimum circuit length.

0272305 100' REEL
0272306 300' REEL
0272304 500' REEL

# PRE-PACKAGED KITS

Custom pipe freeze protection at off-the-reel prices! Choose pre-packaged systems or for longer cable needs, just cut off the required length from the reel dispenser and attach plug, packaged separately. Freeze-Free uses a self-regulating conductive core that reacts to changes in temperature, needing no thermostat.

Patented fused plug—the same quality connector used by the industry since 1992—installs in minutes with basic household tools. Approved for use on both plastic and metal to -20° F. UL listed.

Kits contain indicated length of Freeze-Free Cable, one fused plug kit, (1) instruction sheet and (1) set of warning labels.

NOTE: USE ON SPECIFIC VOLTAGE ONLY; MAKE SURE ELECTRICAL OUTLET IS NOT OVERLOADED.

# WATER HEATERS

- Rheem exclusive R-tech (resistored) anode rod provides long-lasting tank protection.
- Field convertible controls and burner assembly for natural gas or LP operation included.
- HUD units compliant with H.U.D., ASHRAE 90A-80 and NAECA requirements.
- HUD gas units feature Piezo ignition – easy light pilot, no matches required.
- Single and double elements available on HUD units. High efficiency resistored heating element in single element models. Lifeguard stainless steel element in all double element models.
- Electric junction box located above heating elements for easy installation.
- Automatic thermostat keeps water at desired temperature HUD units feature Rheemglass tank lining that resists corrosion and prolongs tank life. EverKleen™ self cleaning device fights harmful sediment build-up with a high-velocity spiraling water stream – helps operating efficiency by saving energy, money and improving tank life.
- Enhanced-flow brass drain valve.
- Temperature and pressure relief valve included.
- Low lead compliant.

Baymont Bathware is a leading brand of showers and tubs for the selective homeowner, contractor or interior designer. Blevins extensive product line up is made with durable materials that will enhance the beauty of any bath for years to come. We also offer many styles of assisted care and accessible living bathware. Products are built with quality materials and are backed by our extensive warranty.

Baymont uses only sanitary high-grade gloss polyester gelcoat, reinforced with composite matrix. The finish, Baymont Sanitary White, is a proprietary color containing UV and mold inhibitors. 3" legs are built into the design for stability; a ridge trim protects the Apron and eliminates shoe molding. Baymont does not use cardboard or other undesirable structural materials. Units are constructed of polyester resins and strand glass only. Bottoms are constructed of A-Grade 7/16 OSB for better adhesion and stronger foundation.

Certifications: ANSI Z124.2

The American Brass Manufacturing Company | Est. 1894

American Brass offers faucet models with compression, washerless and ceramic disc cartridges. Equipped with metal housings our two handle and single handle designs feature acrylic handles and metal handles. Metal teapot lever handles for our dual handle models and metal single blade styles for our single handle models. Tub & Shower models can be ordered with or without our Anti-Scald feature.

This line of faucets can be found in residential environments ranging from single family and multi-family housing structures to apartment and hotel projects. A long history of building, testing and supplying faucets with a deliberate goal of providing a quality product with a strong reputation for reliability has proven successful for nearly 120 years.

THE EMPIRE BRASS COMPANY
SINCE 1903

Designed specifically to meet the specialized needs of the manufactured housing industry, Empire features both brass and non-metallic faucets. Lightweight faucet models made of thermoplastic materials meet weight and price points required of the manufacturers. Available in finishes that compliment lighting and hardware accessories.

Choices available for new units, as well as hard to find pieces used years ago in previously built units. Designs available for thin wall applications often seen in factory built homes. Hi-arc garden spouts designed to clear rolled edges and sloped walls of garden tubs commonly seen in manufactured homes today.

Empire is your choice when repairing or replacing your manufactured home or recreational vehicle.

# CASH-ACME DUAL BACKFLOW PREVENTER

Keeps polluted water from contaminating potable water by preventing reverse flow into supply lines.

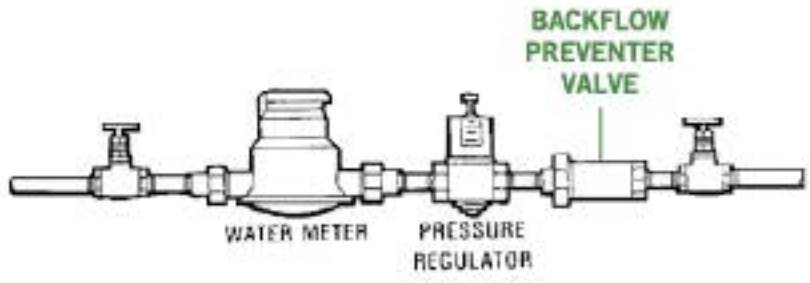

Protects the primary water system (city water supply) by providing containment at the water meter. Valves function in either horizontal or vertical position and under continuous or intermittent pressure. Maximum system pressures to 175 psi and minimum pressure of 10 psi. Temperatures from 32° F to 140° F. Maximum recommended rate of flow is 30 GPM. 3/4" valve has a female threaded union inlet and a female threaded outlet. Straight-through design minimizes pressure drop. Certified under A.S.S.E. Standard 1024.

**0440475 17217LF LEAD FREE**

### Installation Tip:

Backflow preventer valve should be installed immediately downstream of the water meter. The valve may be installed horizontally or vertically.

SHOWN ABOVE: Typical installation where inlet pressure exceeds 150 psi: the pressure regulator must be installed ahead of the dual check backflow preventer.

# UPONOR PEX-A TUBING

Uponor PEX is the clean, green and healthy alternative — no solder, nor torches, no fluxes or solvents. All connections are made with engineered fittings that, when properly installed, are leak-resistant and will last the life of the system.

Uponor PEX is lightweight and flexible, requiring substantially fewer fittings than copper or rigid-plastic systems, so it installs more easily and efficiently.

Approved for hot and cold water applications. The most freeze resistant pex plumbing available. Replaces galvanized, copper or cpvc water lines without soldering or glues. Recommended for potable water systems. Purchase in coils or straight sticks. If using pipe outdoors, it must be buried or sleeved to protect from uv light.

Produced by the peroxide (Engel) method. This method performs "hot" cross-linking, above the crystal melting temperature. It provides more consistent and uniform cross-linking than the other two methods, and is somewhat more flexible in cold weather applications.

SDR-9 plumbing tubing meets ASTM F 876, ASTM F 877 and CSA B137.5 specifications. Pressure rating: 160psi 73.4 deg F, 100psi 180 deg F, 80psi @ 200 deg F.

Replaces galvanized, copper or cpvc water lines without soldering or glues. Recommended for potable water systems. Purchase in coils or straight sticks. Available in red, white or blue colors to allow easy identification of hot or cold water lines. If using pipe outdoors, it must be buried or sleeved to protect from uv light.

# Flair-It™ FOR PEX

Throw away your crimping tools, solvent cement, torches, solder and Teflon tape—you won't need them with the Flair-It plumbing system, designed for normal hot and cold potable water applications. Extremely simple to install and reusable. Resists corrosion and scaling, with high resistance to cold temperatures. Complies with ASTMD 3309 standard.

## Installation Tips

1. Slide nut over tubing

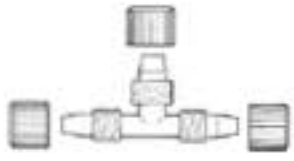

2. Firmly press tubing onto the flare of the fitting

3. Slide the nut to threads and hand tighten securely onto the fitting.

**0112901 4 OZ. WITH BRUSH; 12/CTN**

## EASYHEAT

EasyHeat custom pipe freeze protection at off-the-reel prices! Choose pre-packaged systems or for longer cable needs, just cut off the required length from the reel dispenser and attach plug, packaged separately. Freeze-Free uses a self-regulating conductive core that reacts to changes in temperature, needing no thermostat. Patented fused plug — the same quality connector used by the industry since 1992 — installs in minutes with basic household tools. Approved for use on both plastic and metal to -20° F. UL listed.

## CAMCO ANTIFREEZE

Protect your potable water system from freeze damage. Camco antifreezes inhibit fouling and corrosion while preventing algae growth. They also help in lubricating pumps and valves throughout the system. Choose a temperature-specific product designed for your winterizing needs. Safe and tasteless.

## KLEENGUARD A20 COVERALLS

### Breathable Particle Protection Apparel

KleenGuard A20 Coveralls are made from Microforce Barrier SMS, a breathable fabric that provides improved barrier protection on submircron-sized particles for a perfect combination of protection and comfort.

The tough, durable cloth-like outer layer is an abrasion-resistant, spunbond polypropylene and the middle layer is an intricate web of microfibers that filter out light, water-based liquids and dry particulates. These white coveralls are ideal for maintenance and general clean-up work, including asbestos handling, lead abatement and fiberglass/cellulose insulation operations.

# R8GD SERIES

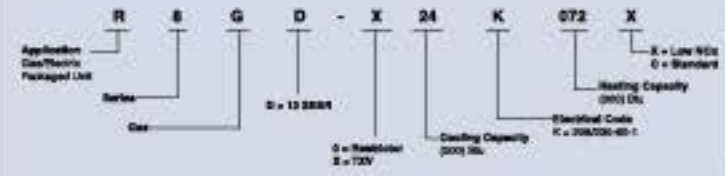

## Single Packaged Gas/Electric Units
## 13 SEER, R-410A, 80% AFUE
## 2 Ton thru 5 Ton Units

The R8GD Series single packaged gas/electrics are high efficiency self contained cooling units that can be installed on the roof or on a slab.The convertible unit design makes installations simple in all applications. Units are ETL and ETLc listed.

- Quality Compressor: State of the art Copeland Scroll compressor is standard equipment.
- Proven,Industry Standard Components: Easier service and availability.
- R-410A Refrigerant: Environmentally friendly.
- High and Low Pressure Switch: Added compressor protection.
- Micro-Channel Coils: Both indoor and outdoor all aluminum coils are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability.
- Liquid Line Filter Driers: Factory installed at a convenient location for service.
- Externally Accessible Service Ports: Quick access to refrigerant system without disrupting operation.
- Compact Footprint/Low Profile: Easy to handle and transport.
- Heavy-Gauge Full Perimeter Base Rails: Facilitates forklift handling and curb mounting.
- Convertible Air Delivery: Horizontal or downflow to accommodate rooftop or horizontal application.
- Galvanized Steel Cabinet: Polyurethane finish provides 950 hour salt spray protection to resist corrosion.
- Wire Guard Coated with Earth Friendly Epoxy and Mesh Hail Guard: Will never rust and protect the coil from being damaged by balls, lawnmowers, hail etc.
- Access to Controls and Major Components: Easy in and out service.
- Low Voltage Transformer: Includes 3 Amp fuse to protect low voltage circuit.
- Corrosion-Resistant Drain Pan: Quickly drains away evaporator condensate.
- One Piece Top for Great Fit and Finish, Total Seal: Well designed, quality construction. Drip edge on top panels whisks away rainwater. Embossed bottom pan keeps blower component compartment dry.
- Quiet Operation: Low vibration. 20" fan blade combined with custom venturi condenser fan.
- SmartLite ® Control Board: Provides extended life toigniters using hot surface ignition technology.Programmed to learn the heat-up characteristics of the igniter, then adapt the ignition time to the characteristics of the furnace so the igniter is energized appropriately.
- Hot Surface igniter: Innovative application of an appliance type igniter with a 20 year history of reliability.
- Accessories: Roof curbs and more.

## Single Packaged Air Conditioner
## P7RD-A 13 SEER, R-410A
## 2 thru 5 Ton Units
## Cooling: 24,000 to 56,000 Btuh

The P7 Series single packaged air conditioners are high efficiency self contained cooling and heating units that can be installed on a slab. Units are ETL and ETLc listed.

- Quality Compressor: State of the art compressor is standard equipment.
- R-410A Refrigerant: Earth friendly non-ozone depleting refrigerant.
- Hi Pressure Switches: Ensure long compressor life.
- Micro-Channel Coils: Both indoor and outdoor all aluminum coils are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability.
- ECM Blower Motor: Fixed torque energy efficent brushless DC ECM motor.
- Permanently Lubricated Condenser Motor: A heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance and is completely protected from rain and snow.
- Low Voltage Transformer: Includes 3 Amp fuse to protect low voltage circuit.
- Compact Footprint and Profile: Make the P7 Series easy to install and transport.
- Liquid Line Filter Driers: Factory installed at a convenient location for service.
- Designed Using Galvanized Steel: With a polyester urethane coat finish. The 950 hour salt spray finish is 1.5 mil thick and resists corrosion 50% better than comparable units.
- 0" Clearance: To combustibles on duct side of the unit allows for installations in tight areas.
- Wire Guard Coated with Earth Friendly Epoxy and Plastic Mesh Hail Guard:: A guard that will never rust and protects the units coil from being damaged.
- Raised Base Pan: Allows water to drain away from the unit.
- Easy Access: To the evaporator coil for cleaning and general maintenance.
- Easy Compressor and Control Access: Designed to make servicing easier for the contractor, access panels are provided to all controls and the compressor from the side of the unit. HV low service ports allow access without disrupting operation.
- Drain Trap: Design optimizes drainage capabilities.
- RemovableTop Grille Assembly: Allows ease of service to the fan motor.
- Optional Electric Heat: Field installed 5 – 20 KW.
- Duct Collars: Reduce Installation costs.
- Return diameter: 14"; Supply diameter: 12"

- R-410A Refrigerant: Environmentally friendly.
- Designed using galvanized steel: With a polyester urethane coat finish.The 950 hour salt spray finish resists corrosion 50% better than comparable units.
- Both indoor and outdoor coils: Are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability.
- The service valves are easily accessible: And simplify servicing of the refrigeration system.
- A wire guard coated with Earth Friendly Epoxy and mesh hail guard that will never rust: Protects the coil from being damaged by balls, lawnmowers, hail, etc.
- Designed to make servicing easier: For the contractor, access panels are provided to all major components and the compressor.
- 0" clearance: To combustibles on duct side of the unit allows for installations in tight areas.
- Easy access: To evaporator for cleaning and general maintenance.
- Drain trap: Design optimizes drainage capabilities.
- Easy to install: Electric heat strip provides up to 20 kw of heat output.
- Compact footprint and profile: Make the Q5 Series easy to install and transport.
- High and low pressure switches: Added compressor protection.
- Suction Accumulator: Protection from liquid flood back and future compressor failures.
- Demand defrost standard: Provides additional energy savings in heating by defrosting only when necessary.
- Three minute restart time delay: When the unit shuts down, a three minute delay keeps the unit from restarting, eliminating the highest cause for compressor failure.
- Quiet operation and low vibration: Swept-wing fan blade combined with custom Venturi condenser fan.
- Compressor sound blanket is standard.

# DS4(B,Q)D-KB/KC SERIES

## High Efficiency Air Conditioner
## 13+ SEER, 1.5 - 5 Ton Capacity

The DS4(B,Q)D series now offers the choice of an air conditioner that uses more efficient and environmentally friendly refrigerant designated R-410A. The unit, when combined with our matched indoor coils, offers a full line of quality, split-system air conditioning systems. Units are ideally sized for manufactured housing applications.

- R-410A Refrigerant: Earth friendly non-ozone depleting refrigerant.
- Permanently Lubricated Motor:A heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance and is completely protected from rain and snow.
- RemovableTop Grille Assembly: Allows ease of service from the top without disconnecting fan motor leads.
- Composite Base Pan: Absorbs sound and corrosion resistant. Composite is also stronger and lighter than steel.
- One Piece Top/Orifice: Designed for maximum airflow and quiet operation.
- Easy Compressor and Control Access: Designed to make servicing easier for the contractor, access panels are provided to all controls and the compressor from the side of the unit.
- Compressor: All models utilize quiet and efficient Copeland Scroll Compressors.
- Durable, Attractive Cabinet: Designed using galvanized steel with a polyurethane finish. The 950 hour salt spray finish is 1.5 mil thick and resists corrosion 50% better than comparable units.
- Steel Guard™: Protects the unit coil from being damaged by balls, lawn mowers, hail, etc.
- High Pressure Switch: Protects against abnormally high system pressures. Auto-reset feature prevents nuisance service calls.
- Liquid Line Filter Drier: Included with outdoor unit.
- Micro-Channel Coils: All aluminum coils in all models which provides high corrosion resistance.

- Permanently Lubricated Motor:A heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance and is completely protected from rain and snow.
- Time /Temperature Defrost:A reliable, industry standard control offers various time settings to meet any type climate.
- RemovableTop Grille Assembly: Allows ease of service from the top without disconnecting fan motor leads.
- Composite Base Pan: Absorbs sound and corrosion resistant. Composite is also stronger and lighter than steel.
- Steel Guard™: Protects the unit coil from being damaged by balls, lawn mowers, hail, etc.
- One Piece Top/Orifice: Designed for maximum airflow and quiet operation.
- Suction Accumulator: Protection from liquid flood back and future compressor failures.
- Common Suction Service Port: This port allows the contractor to read the suction pressure in all modes of operation without removing any panels, saving time and increasing serviceability.
- Five Minute Restart Time Delay: When the unit shuts down, a five minute delay keeps the unit from restarting, eliminating the highest cause for compressor failure.
- Hot Gas Muffler: Reduces compressor noise and vibration.
- Easy Compressor and Control Access: Designed to make servicing easier for the contractor, access panels are provided to all controls and the compressor from the side of the unit.

# DT4BF-KA/B SERIES

## R-410A Ultra High Efficiency Heat Pump
## 16 SEER Residential System
## 2 - 5 Ton Capacity

The DT4BF-KA/B series now offers the choice of a heat pump that uses a more efficient and environmentally friendly refrigerant designated R-410A. The DT4BF-KA/B Series of heat pumps offers exceptional performance as well as environmental protection. These models, when matched with our variable speed air handlers or variable speed equipped gas furnaces, offer a line of high quality heat pump systems rated up to 16 SEER and 9 HSPF.

- R-410A Refrigerant: Earth friendly non-ozone depleting refrigerant.
- Copeland Scroll UltraTech™ Compressor: The Ultra Tech Compressor operates with 2 stages of heating and cooling capacities to provide superior comfort and efficiency. Copeland's proven and simple design equates to years of comfort and reliability for the homeowner with virtually silent operation.
- Durable, Attractive Cabinet: Designed using galvanized steel with a polyester urethane finish.The 950 hour salt spray finish is 1.5 mil thick and resists corrosion 50% better than comparable units.
- Composite Base Pan: Absorbs sound and is corrosion resistant. Composite is also stronger and lighter than steel.
- Demand Defrost: Provides additional energy savings in heating by defrosting only when necessary.
- Copper Tube / Aluminum Fin Coils: Both indoor and outdoor coils are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability.
- RemovableTop Grille Assembly: Allows ease of service from the top without disconnecting fan motor leads.
- Low Pressure Switch: Loss of charge protection ensures long compressor life.Auto-reset feature prevents nuisance service visits.
- High Pressure Switch: Protects against abnormally high system pressures. Auto-reset feature prevents nuisance service visits.

# B6VMAX SERIES

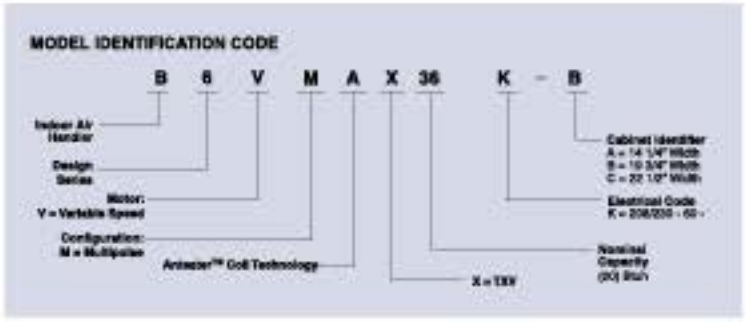

## Air Handler with TXV
## 13-19 SEER Residential System
## 18,000 - 60,000 Btuh (Heat Pump & Air Conditioner)
## R-410A Refrigerant

The B6VMAX Series of air handlers, when combined with our heat pump or air conditioner, offers a full line of quality, split system heating and cooling equipment.

- Energy Efficient Variable Speed ECM Motor: Advanced technology provides 16 field-selectable cooling airflows and automatically sets heating airflows based on the amount of installed heat.
- Quiet Blower Operation: Extra quiet and smooth blower on and off cycles.
- Constant airflow: Motor automatically adjusts to different static loads.
- Reduced air stratification: This results in improved air quality by optimizing humidity removal and filtration capabilities.
- Multi-poised: Can be used in horizontal, upflow, downflow and vertical applications.
- Built in Filter Rack: makes the air handler easy to service.
- Plug-in Heater Kit: Available in 5 kw through 30 kw (Not for use in 115 Volt units)
- Circuit Board: Incorporating blower time delay relay, low voltage terminal strip, and heat-strip sequencing.
- Breaker Accessibility: Breaker accessible from the front of the unit when heater is applied.
- Plastic Drain Pan: Provides corrosion resistance.
- Durable Cabinet: Galvanized steel with a polyurethane finish. The finish will endure 950 hours of salt spray and resist corrosion 50% better than comparable units.
- Designed to meet the requirements 610.2.A.2: Meets Florida building code requirements for air leakage.
- Thermal Expansion Valve: Factory installed externally equalized thermal expansion valve provides precise refrigerant control under varying load conditions.
- Cabinet Insulation: 1" insulation with an R-value of 4.2 contributes to quiet operation and prevents cabinet sweating in difficult applications.
- AnteaterTM Coil Technology: Copper alloy with zinc additives to stop formicary corrosion.

This product carries a 5-year all parts warranty. When installed with a matched outdoor unit, the air handler will carry the outdoor system warranty.

# B6BMM0 SERIES

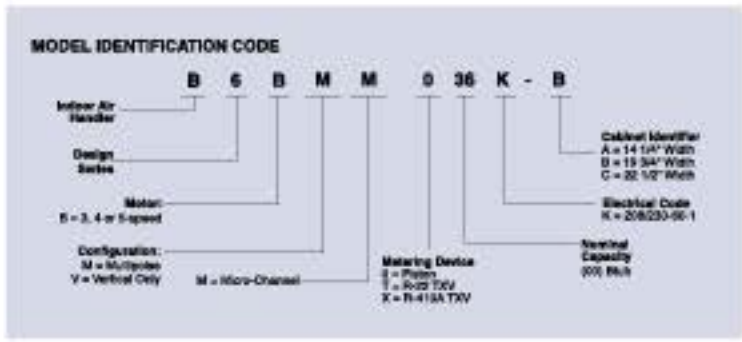

## Air Handler
## 13 SEER Residential System
## 18,000 - 60,000 Btuh (Heat Pump & Air Conditioner)

The B6BMM0 Series of air handlers, when combined with our heat pump or air conditioner, offer a full line of quality, split system heating and cooling equipment.

- Durable, Attractive Cabinet: Galvanized steel with a polyester urethane finish. The 950 hour salt spray finish resists corrosion 50% better than comparable units. The plastic drain pan is corrosion-resistant.
- Multi-poised: Can be used in horizontal, upflow, downflow and vertical applications.
- Multi-speed: Gives flexibility of installation.
- Ease-of-Service: Plug-in wire connections and built-in filter rack makes the air handler easy to service.
- Plug-in Heater Kits: Available in 5kw - 30kw (Not for use in 115 Volt units)
- Circuit Board: Incorporating blower time delay relay, low voltage terminal strip, and heat-strip sequencing.
- Air Handler Control Board: Controls time-sequencing of heat stages with field-selectable sequence timing.
- Breaker Accessibility: Breaker accessible from front of unit when heater is applied.
- No Fasteners on Sides or Back: Smooth surfaces for ease of installation.
- Designed to Meet the Requirements 610.2.A.2: Meets Florida building code requirements for air leakage.
- Micro-Channel Evaporator Coil: All aluminum design to prevent leaks caused by corrosion formicary.
- Cabinet Insulation: 1" insulation with an R-value of 4.2 contributes to quiet operation and prevents cabinet sweating in difficult applications

This product carries a 5-year all parts warranty. When installed with a matched outdoor unit, the air handler will carry the outdoor system warranty.

# EVAPORATOR "A" COIL 410A

## (includes drain hose & clamp)

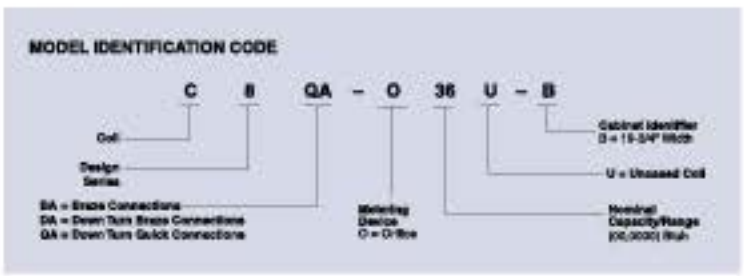

Anteater COIL TECHNOLOGY

The NORDYNE line of AnteaterMC® Micro-Channel evaporator coils eliminates leaks caused by formicary corrosion. These products are ideally suited for climates and environments where formicary corrosion is an ongoing problem.

Anteater MC coils feature an all-aluminum Micro-Channel construction. This coil design provides water management and thermal performance results equal to the standard copper tube-in-fin designs, except with superior resistance to formicary corrosion and galvanic corrosion.

Benefits include:
- Same size as traditional tube-in-fin coils
- Eliminates both formicary and galvanic corrosion
- Reduced weight _ approximately half the weight of a traditional coil
- Easier handling and servicing of units

# REPLACEMENT R-22 COILS & LINE SETS

The REPLCOILs were designed to match with a wide variety of outdoor condenser families. These coils also have enhanced corrosion protection. The REPLCOIL## is an Anteater® copper tube aluminum fin coil. The REPLCOIL##M is an AnteaterMC® Micro Channel coil.

The REPLCOILs all have the same copper stub connections, whether for a residential or manufactured housing application. When ordering a replacement coil for a C3, C4, or C5, a QA (Quick Connect) or DA (Downturn) connection kit is available. These kits are needed to be able to re-use the existing lineset connections. If ordering a C6 coil, a TXV \kit must be ordered as well.

The REPLCOILs are piston ready coils. If the coil application requires a piston, the contractor would open the distributor and install the piston (refer to installation instructions included with the coil). However, if a TXV coil is being replaced, a TXV tube kit is available to make the TXV line up with the existing line set connections.

# CMF2 SERIES

## Oil and Gas Furnace

The CMF2 Series Furnace is a classic and time honored design. The CMF2 is a versatile and reliable product used in Manufactured Housing and other applications such as space heating, garages, hunting camps or single story residential structures. The new model CMF2 Furnace incorporates a multi-speed blower and multi-fired burner. Classic design countered with new technology make the new CMF2 today's choice for a multi-application fossil fuel heating appliance.

- Three speed custom fit and painted blower for efficient, quiet operation.
- Multi-firing technology in gas and oil burner.
- Resized auxiliary limit switch eliminates nuisance cycling.
- Beckett oil burners are standard equipment.
- Classic 18" width dimension for tight replacement jobs.
- MA 100, MA 200, and CB 200 bases for versatility in applications.
- Drum/Tubular heat exchanger assures long life.

## Gas Furnace
## 95.1%+ AFUE
## 45,000 thru 72,000 Btu/h

The CMF95 Series Furnace is a classic and time honored design. The CMF95 is a versatile and reliable product used in Manufactured Housing and other applications such as space heating, garages, hunting camps or single story residential structures. The new model CMF95 Furnace incorporates a multi-speed blower and multi-fired burner. Classic design countered with new technology make the new CMF95 today's choice for a multi-application fossil fuel heating appliance.

- Classic 18" width dimension for tight replacement jobs.
- Beckett gas burners are standard.
- 100% fired and tested: All units and each component are tested on the manufacturing line.
- 30 second blower delay at start-up assures a warm duct temperature at furnace start-up. Adjustable blower off settings (60, 90, 120 and 180 seconds).
- 30 second post purge increases life of heat exchanger.
- Hot surface igniter: Innovative application of a silicon nitride type igniter. Utilizes proven Smartlite® technology.
- Color coded wire harness: Designed to fit the components, all with quick-connect fittings for ease of service and replacement.
- Flexible category IV venting system: May be vertically or horizontally vented using either a one- pipe or two-pipe system for maximum flexibility in installation.
- High Static Blowers: All models equipped with high static blowers.
- Tubular primary heat exchanger: Heavy gauge aluminized steel heat exchanger and stainless steel secondary heat exchanger assures a long life.
- 60 second fixed cooling cycle blower-off delay (TDR ) increases cooling performance when matched with a NORDYNE coil.
- Multi-speed direct drive blower: Designed to give a wide range of cooling capacities.Switches on PCB, provide ultra easy motor speed selection.
- LP convertible: Simple burner orifice and regulator spring change for ease of convertibility.
- Diagnostic lights for easy troubleshooting without counting flashes: Dedicated light for flame signal strength and 2 lights in combination to indicate all other fault codes with easy to recognize states without counting flashes.
- AC ready: Up to 3 tons.

The CMF 95 Series furnace doesn't use the traditional CMF roof jacks listed on page 244. It uses PVC-ABS pipe.

# M1 SERIES FURNACES

## M1M* Hot Surface Ignition
## M1B* Gas Gun

The M1 Series furnace is designed for all sizes of manufactured and modular homes. These units incorporate high efficiency, reliability, and low maintenance. Units may be installed free standing in a utility room or enclosed in an alcove or closet. M1 Series furnaces are available in A/C adaptable or A/C ready, with or without coil cavity box, multiple blower combinations for cooling requirements, and many burner options.

- Sealed Combustion System: Vents exhaust gas directly outdoors and draws in 100% outside air for the burner.
- Easy Open Pawl Latch: Secures the door firmly for transit, yet allows easy removal for access.
- Choice of Air Conditioning Options: From 2 to 5 tons A/C ready.
- Large, Effective Air Filter: Room air is cleaner with this permanent washable filter.
- High Efficiency Drum Heat Exchanger: Delivers optimum heat transfer with low air resistance.
- Appliance Quality Door: Protects against rust and other corrosion. Baked enamel finish allows for easy cleaning.
- Fully Insulated Cabinet: Insures minimized heat loss and quiet operation.
- Reliable Burner: With uniform flame pattern extends life of heat exchanger.

## High Efficiency / Direct Vent
## Condensing Downflow Gas Furnace
## Induced Draft - 95%+ AFUE, Input 45,000 thru 72,000 Btuh

The high efficiency downflow gas furnace is designed for both Manufactured Housing and Modular Housing. It may be installed in a utility room, or enclosed in a closet. CSA design certified for use in the United States and Canada.

- 100% fired and tested: All units and each component (both mechanical and electrical) are tested on the manufacturing line.
- Clean and quiet operation: Due to the unique design of in-shot burners, location of inducer and use of insulation.
- Fixed 30 second blower delay: At burner start-up assures a warm outlet air temperature at furnace start-up. Adjustable blower off settings (60, 90, 120 and 180 seconds).
- Fixed 30-second post purge: Increases life of heat exchanger.
- Dependable, hot surface ignitor: Innovative application of silicon nitride type igniter. Utilizes proven Smartlite® technology.
- Tubular primary heat exchanger: Heavy gauge aluminized steel heat exchanger assures a long life.
- Stainless steel secondary heat exchanger: Assures a long life.
- 90 second fixed cooling cycle blower-off delay (TDR): Increases cooling performance when matched with a NORDYNE coil.
- Sealed combustion approved for direct vent furnace, category IV venting system: May be vertically or horizontally vented using a two-pipe system for maximum flexibility in installation.
- LP convertible:Simple burner orifice and gas valve regulator change for ease of convertibility.
- Multi-speed direct drive blower: Designed to give a wide range of cooling capacities. Switches on PCB, provide ultra easy motor speed selection. 40VA transformer included.
- 3 amp fuse protection against low voltage shorts: Protects transformer and control board.
- Low voltage terminal board: For easy field wiring.
- Easy open pawl latch: Secures the door firmly for transit, yet allows easy removal for access.
- Appliance quality door: Protects against rust and other corrosion. Baked enamel finish allows for easy cleaning.
- Fully insulated cabinet: Insures minimized heat loss and quiet operation.
- Color coded wire harness: Designed to fit the components, all with quick-connect fittings for ease of service and replacement.
- High efficiency blower kits maximize efficiencies.On select units, a SEER improvement of up to 1 point is realized.
- Diagnostic lights for easy troubleshooting without counting flashes: Dedicated light for flame signal strength and 2 lights in combination to indicate all other fault codes with easy to recognize states without counting flashes.
- Incorporates integrated control board with connections for electronic air cleaner and humidifier.

# E3EB-XXX-H SERIES

## Downflow, Upflow Electric Furnaces

The E3 Series furnace is designed for all sizes of manufactured and modular homes. These units incorporate reliability and low maintenance. Units may be installed free standing in a utility room or enclosed in an alcove or closet. E3 Series furnaces are available A/C adaptable or A/C ready, with multiple blower combinations for cooling requirements.

- Choice of Air Conditioning options From 2 to 5 tons A/C ready.
- Easy Open Door secures the door firmly for transit, yet allows easy removal for access.
- Effective Air Filter Universal disposable filter is readily available and simple to replace.
- Nichrome Heating Elements provide long lasting, efficient heating.
- Appliance Quality Door protects against rust and other corrosion. Baked enamel finish allows for easy cleaning.
- Fully Insulated Cabinet insures minimized heat loss and quiet operation.
- Safety and Dependability: Auto reset controls protect unit's electrical circuitry and help ensure trouble free performance. Built in circuit breakers for extra safety.
- Adaptable: Unit can be adapted to provide dependable heating in either downflow or upflow mode.
- Versatile: Works with self-contained or split system air conditioners or heat pumps.
- Dimensions: 20" wide, 29" high, 24.5" deep

## LASER CLEAN VENTED HEATING SYSTEMS

All the comfort of a central heating system in one compact, room-sized unit.

A laser vented heater is the perfect solution for those hard to heat rooms or areas - all too common in many homes today. This is especially true in older homes and those with additions where a central heating system is just not enough. Now every problem area can be made livable. A laser heater provides all the comfort and convenience of a central heating system in one small, efficient unit at a fraction of the cost. It is also ideal for heating summer homes, hunting camps, and is certified for installation in mobile homes and manufacturing housing.

## PORTABLE UV-AIRE® AIR PURIFICATION MODELS

The portable UV-Aire models combine the purifying power of UV with high efficiency and carbon filtration to reduce dust, pollen, odors, and VOCs. The UV-Aire portables are recommended for anyone with allergies, a respiratory illness, or a compromised immune system.

The high intensity ultraviolet light attacks airborne mold, bacteria, and viruses. The high efficiency filter traps allergens, dust, and pollen. The carbon filter removes odors and attacks VOCs (volatile organic compounds).

## E-LITE® BY DIVERSITECH

E Lite® is a plastic pad designed as a mounting base for air conditioning condensers. The rugged design provides uniform and generous ribbing for optimum, self-leveling ground support without inserts. Injection molded from polypropylene, the resulting pad is lightweight, but not too light. A subtle texture prevents unit slide and presents a classic appearance, which is enhanced by rounded edges and a concrete gray color.
