From the Editor

Happy New Year Colorado chess players,

2025 was an incredible year of chess coverage for me. The year started in Wijk Aan Zee, then Freestyle in Paris & Las Vegas, London for the FIDE team championships, the Super Nationals in Orlando, numerous Colorado tournaments in between, and ending in Spokane for the K-12 Grade Nationals. All of this pales in comparison though to the highlight of becoming a first time grandpa in October this past year! I'll still be covering chess as best I can but my role as grandpa will be priority. Our new CSCA president Kevin McConnell takes the reigns from Earle Wikle to lead us into another great year of chess in Colorado. Thank you to both men and all those that volunteer around our state to keep Colorado chess alive and well. All of these tournaments don't just 'happen', it takes dedicated volunteers behind the scenes devoting their time to our beloved game. A thank you to Lloyd Gauthier too who is updating our club info and CSCA social media pages, "check" them out....

- John Brezina

CSCA President Kevin McConnell's Message

Happy New Year, I can't believe 2026 is already here! We held a special member's meeting on December 8th and voted on the newly amended CSCA bylaws. The vote was unanimous in favor and the new bylaws are posted on the CSCA website. We held a board meeting last month and under the new bylaws, voted two new at-large members to the board. Please join me in welcoming former board member Andy Starr and brand new member Lloyd Gauthier to our 2026 board. Andy has singlehandedly found and locked down the venue for our "Boulder Open" and Lloyd has been designing flyers for the CSCA for months and is a real addition to the board.

On Saturday November 22nd we held our very first Freestyle chess tournament. We had 31 participants and everyone had a great time! Now we are gearing up for the 2026 State Scholastic Chess Championships and hope you and your children will join us at STEM School of Highlands Ranch on February 13th, 14th and 15th for all of the state scholastic events! This year we will be holding 4 tournaments.

On Friday February 13th, we will be holding the Colorado State Scholastic Blitz Championship where we will crown the best speed player for K-5 and K-12. On Saturday February 14th, we will be holding the K-1 Colorado State Scholastic Chess Championship. This will be a one-day 5 round event and the tournament registration is up on the CSCA website. Also, on Saturday February 14th, we will hold the very first "Rising Talent" unrated scholastic championship for kiddos who don't want to jump through the hoops of getting both a Colorado State Chess Association membership as well as a United States Chess Association membership. This will be a one-day 5 round unrated tournament. Lastly, on Saturday and Sunday the 14th and 15th of February, we will hold the Colorado State Scholastic Chess Championship. This will be a USCF rated 6 round 2-day tournament to decide state champions for K-3, K-5, K-8, K-12 and our Colorado State women's champion.

There is one other tournament to tell you about in February. We are proud to announce another new one-day Saturday tournament. "Speed Saturday" is a one day tournament where you can compete in a quick chess tournament, a blitz chess tournament and a bullet chess tournament all in one day. You can play in all three tournaments and enjoy 29 games of chess in one day, or order these tournaments a la carte and play in just one or two of these tournaments.

March 6th through March 8th, we will be holding the Colorado Closed and Scholastic Closed State Championship. We will accept the 6 highest rated Colorado based players and the 6 highest rated scholastic players according to the February 2026 USCF supplemental ratings. We will also be featuring a Colorado State Challenger section and Scholastic Challenger section with the next 6 highest rated players. Registration for this tournament should be up on the CSCA website in the next week or so. Two weeks after this tournament we will hold the Colorado State Quick Chess Championship on Friday night March 20th, right before DCC's Spring Classic tournament.

That's a lot of information and I will stop and let everyone digest! We are off to a great start for 2026 and I look forward to seeing you at one or all of the tournaments!

With gratitude,

Kevin McConnell
President Colorado State Chess Association

Colorado Players at the 2025 National K-12 Grades Championships

By John Brezina

The 2025 National K-12 Grades Championship took place on Dec 12-14, 2025 in Spokane Washington. This USCF sanctioned event drew nearly 1500 kids from around the nation and there were a number of Colorado kids in attendance. There are many chess events around to cover, and this one piqued my interest since it is where my new granddaughter lives and we had already planned a trip out there that particular weekend.

One half of the enormous playing hall

About a month before I reached out to the organizers to get media access and take pictures of our Colorado players. It takes a lot of planning ahead of time when I cover these events around the world, not to mention lodging and transportation. For this event I needed to watch a Safesport volunteer video in addition to a background check since kids were involved and the process went well since I had previously worked with this staff earlier in the year at the SuperNationals. Once completed I researched the playing venue, the Convention Center in downtown Spokane, and round times that I could attend.

To the victors goes the spoils

I arrived Saturday afternoon in order to catch the start of round four. The players were all in one large room except for the K-1 group which had a slightly different schedule. I scanned pairings in order to find the 14 Colorado players in a sea of 1500! It was nice seeing some of the arbiters I have known for years here covering the kids as I usually see them in St. Louis with the top players in the world. After some announcements, it was time to start ushering parents out minutes before the start of the round.

John Schoenke
12th grade

Siddhishree Sundaram
2nd grade

I made my way around the large playing hall trying to capture as many of our players as possible, but some games ended rather quickly before I could reach them all. The main stage had tables filled with endless rows of trophies and nearby were the top DGT boards from each grade level. After an hour on the floor I headed out to the lobby where I met some of the parents and others I have known through chess. ChessKids was present with a booth headed by Fun Master Mike Klein who attended one of our Colorado State Scholastic tournaments several years ago. There was apparel for sale as well as food vendors and ample space for parents to anxiously await their kids' results.

FM Mike Klein working the ChessKid booth

But the most exciting area that drew quite a crowd was a table setup for GM Michael Rohde where he took on "all-comers" in blitz. It was my first time photographing this longtime American Grandmaster where our very own Henry Kovacs had a chance to play him. It was quite a game and fun to watch as a crowd gathered around including his mother who filmed the game. Unfortunately Henry had to eventually resign as he was a piece down and couldn't stop the GM from queening his pawn. After exploring more of the side events, I made my way back to the playing hall where some tough games were still in progress before heading out.

GM Rohde drew a crowd including Henry's brothers

Henry Kovacs resigning after a tough fight with the GM

I made my way back Sunday morning for round 6 starting at an early 9:00am. I could only photograph for an hour that morning as I had other obligations and therefore could not be around for the trophy presentations that afternoon. It was quite humbling to peruse the top player ratings in each grade. The top player in the entire field was IM Erick Zhao rated at a whopping 2513. And he is only in eleventh grade where he won his division with 6.5/7 points. Fourth grade and up had at least one player or more rated above 2000. Even second grade had a player rated at 1959, so never take a kid you face across the board for granted.

Our Colorado players are listed here with their grade, rating, and final score.

John Schoenke 12th grade (1849) 4.0/7

Amitai Sebba 11th grade (1910) 4.5/7

Ariana E Dani 10th (1692) 4.0/7

Henry Wallace Kovacs 9th grade (1884) 4.0/7

Felix McMillan 6th grade (1857) 5.0/7

James Corbett 6th grade (1216) 3.0/7

Eric N Gessler 6th grade (865) 3.0/7

Stepan Artemovich Rostovtsev 5th grade (1084) 3.0/7

Dylan Albert Kovacs 4th grade (913) 3.0/7

Christian Hardy 3rd grade (1182) 4.0/7

Micah Corbett 3rd grade (341) 1.0/7

Siddhishree Sundaram 2nd grade (1098) 4.0/7

Charlie Kovacs 2nd grade (1181) 3.5/7

Connor Wolf Gorby 1st grade (895) 5.0/7

It is worth mentioning the gratitude that parents deserve for making the trip out to such chess events for their kids. Most participants flew in from around the country, and adding that up with lodging is quite an investment. No different than sports or music endeavours that kids are involved with as well that take involved parents to facilitate. Flying out Monday morning on an early 5:00am flight, I was pleasantly surprised by all the chess kids in the gate area with their rather large trophies. Another nice surprise was being greeted by the Kovacs family just before boarding. Young Henry came over to say hi along with his two brothers that also play chess, Charlie & Dylan. A perfect weekend for me, visiting family and covering chess!

Amitai Sebba & his mother

Henry Kovacs & his mother

Dedicated parents make these tournaments happen!

Denver Chess Club Fall Classic 2025

by Earle Wikle

This year's DCC Fall Classic was held over National Chess Day at the Hilton Gardens located at the intersection of East Union Ave. and S. Syracuse St, in the Denver Tech Center area. The event is one of the Denver Chess Club's four premier weekend events held throughout the year. Peter Barley and I directed the event with 132 players in four sections (Premier, U1900, U1600, and U1300).

In the Premier section, newly titled FIDE Master Gunnar Andersen won the tournament with 4.5 points. Defeating Nation Master Griffin McConnell in the last round to take the lead after a second round draw with Candidate Master Dmitry Kishinevsky. NM Griffin McConnell and NM Matthew Wofford tied for second and third with 4 points. Ed Yasutake and Sikander Baker-Nagar tied for the U2100 prize with 3.5 points, and Shankar Parasuram won top upset in the Premier section.

In the U1900 section, Larry Wutt won the tournament with 4.5 points. Kenzie Moore placed second with 4 points, and Aaron Gindi and Ashwin Mathimaran tied for third placed with 3.5 points. Matt Baird won the top upset prize for the U1900.

In the U1600 section, Carter Edwards won the tournament with a perfect 5 points, Carter Worcester and David Cease tied for second and third with 4 points. David Cease won the top upset prize in the U1600.

In the U1300 section, Datreion Leverston and Landon Williams tied for first and second with 4.5 points. Noah Keene and Veronica Pinna tied for third place with 4 points. Also with 4 points, Christopher Laberge won the U1000 prize as well as the top upset U1300 prize.

Everyone had a good time and we look forward to keeping these events going at the Hilton Garden's.

2025 Winter Springs Open

by Earle Wikle

When I first came to Colorado Springs, I played my first weekend tournament in Colorado at the Winter Springs Open, run by Buck Buchanan in Manitou Springs. I knew Buck from when I first started playing chess back in Ohio. Just after Buck moved to Colorado, he came back to Dayton, Ohio where I played my first rated tournament. Buck was the joy of the occasion with Chuck Unruh and Richard Ling hugging each other at the door of the tournament room when Buck arrived. So when I moved to Colorado and got settled in, I sought out some chess, and low and behold there was Buck Buchanan. Buck always kept an interest in the Dayton Chess club in Ohio, and eventually he saw me become the president of the club and 6 time champion. So when I arrived in Colorado, Buck already knew of me and vaguely remembered me being introduced to him by Chuck Unruh at my first rated tournament. As many of you know Buck health has taken an unfortunate turn, and that is why I will do my best to keep this tournament and the summer tournament going, in honor of my friend Buck Buchanan.

The Open – June section was won by FM Gunnar Andersen with 4 points. A three way tie for second and third between, NM Eamon Montgomery, CM Rhett Langseth (Now NM, Congrats), and CM Craig Wilcox. In the U1800 – July section, Nick Hvizda won first with 4 points, and a three way tie for second and third between, Tristan Cruz, James Lamorgese, and Lincoln Mott. In the U1400 – August Section, Arjun Yarlagadda won first with 4 points, second place with 3.5 points was won by Brendan Mahoney, and third place was a tie between, Nathaniel Heithoff and Gerardo Cruz. It was a fun filled weekend of chess with blitz tournaments and the classical tournament. I look forward in continuing the tradition in Colorado Springs.

Buck Buchanan (2019)

Mindsets Chess in Education Conference in New York City

By John Brezina

The Mindsets Chess in Education conference took place December 6, 2025 in New York city. It was hosted by the National Scholastic Chess Foundation and the Kasparov Chess Foundation and explored the role of chess in education. I was made aware of this conference a year earlier at the St. Louis chess conference. That was such a great experience so I was looking forward to the next one. It is amazing how fast a year goes by when Sunil Weeramantry reached out to me to photograph the event. Such an honor after photographing his "retirement" event earlier this year in New York as well.

It was a ticketed event and sold out as more than 150 educators descended on New York at the beautiful Quorum event center which was next to Rockefeller Center. Anyone that has been to New York in December knows how beautiful it is decorated for the Christmas season. And the center of attention is always the big beautiful Christmas tree in Rockefeller Center overlooking the famed ice rink. Fortunately the weather cooperated through the weekend which allowed for much sightseeing. In addition to the great lineup of speakers for the conference, a pre-event reception was scheduled the night prior for ticket holders at the Hunter College Campus School where Sunil Weeramantry taught chess for over 40 years.

The Hunter College Campus

Fall's last gasps in Central Park

I made my way walking through Central Park stopping at the Chess & Checkers Club on my way to the Hunter College campus near the northeast side of the park. Hunter is a public school that caters to gifted students through a tough admissions program and excels in many fields including chess of course. The campus is an enormous brick building resembling a castle and was established in 1869. It was my first visit to the school and guests gathered near the auditorium where food and drinks were set up along with chess boards. Everyone mingled and socialized before Sunil took the stage to welcome patrons and some special guests which included Jeff Bulington, Dr. Barry Hymer & Grandmaster Peter Wells amongst others. Hunter principal Dawn Roy joined Sunil onstage and they reminisced about their long relationship at the school where chess is part of the curriculum.

Sunil and principal Dawn Roy onstage

Hunter's full chess trophy case

The conference took place early the next morning with a continental breakfast beforehand which gave people a chance to connect with educators and chess personalities from across the country. It was a first class experience from the time you entered the building and made your way up the escalator to the ultra-modern designed Quorum reception area where the doorman professionally welcomed you. I met the men there that were responsible for this spectacular gathering: Sunil Weeramantry & Robert McLellan from the National Scholastic Chess Foundation along with the President of the Kasparov Chess Foundation Michael Khodarkovsky. A great lineup of speakers were invited including the former world chess champion Garry Kasparov.

The entrance to the Quorum center

A room overlooking the busy New York streets below showcased chess sets from around the world as guests enjoyed their coffee. Many old friends reunited as they gathered before the start of the conference including Sunil's longtime friend Bruce Pandolfini. I made my way into the Grand Hall before the crowd and entered into a stunning conference room with a 270 degree video display overlooking the room with an incredible sound system. The front of the hall had a stage and podium set up with a room full of chairs and tables ready for the guests.

Worldly chess sets above the NY streets

The Grand Hall ready for the conference

Last call on the coffee was made for people to start making their way into the Grand Hall where Robert McLellan was at the podium to start off the day by introducing Sunil & Michael to the stage. They both welcomed everyone to this gathering of chess educators and shared some of their respective foundations work in the chess community. Then the first speaker of the day was introduced, Jeff Bulington, director of the Franklin Chess Center in Meadville Mississippi. He transformed the school by introducing chess to students that had never been exposed to it and showed the power of chess in education. It was so transformative that 60 Minutes did a segment on the chess center that is well worth watching. The Q&A session after his talk was most engaging as it allowed for a greater conversation on chess in education.

Michael Khodarkovsky & Sunil Weeramantry

Jeff Bulington started off the conference

The next panel discussed the philosophy of games and learning through play before taking a short break for coffee. I stayed near Sunil to capture some photos of his long time friends that gathered along with fans of his. Next up was stu-

dent engagement through literacy & improvisation. First to speak was Alan Abrams who co-authored Great Moves: Learning Chess through History with Sunil and Robert McLellan. Then Mike Amori, an educator from the Chatsworth School in New York, captured the attention of guests with his animated and exceptional story telling skills which showed how to engage with kids.

Sunil & friends during the coffee break

Co-author Alan Abrams at the podium

The audience paying close attention

The next speaker was the newly appointed executive director of the National Scholastic Chess Foundation, NM Matan Prilleltensky. He had replaced Sunil Weeramantry at the helm of the foundation where Sunil served for over 40 years. His talk was titled A Mastery Based Approach to Chess Education that highlighted teaching the skills that students need not only for chess but all through life. While he continued to speak I stepped out as the next special guest speaker was arriving where I was able to capture the first moments of his arrival.

Garry Kasparov arrives

Sunil Weeramantry then took the podium to introduce the most anticipated speaker, who really needs no introduction, Garry Kasparov. I've been fortunate to have heard Garry speak a number of times including in our own backyard in Boulder Colorado recently (see our January 2025 issue). He can command an audience with his incredible intellect and speaking skills like no other. He reflected on how chess education must evolve as society transitions to an artificial intelligence world amongst many other subjects. I try to capture as many photos as possible since I feel I'm covering history when photographing him. His stories and connections to chess are legendary and are in so many books I have read. After his talk, guests had a chance to ask questions of the former world champion and hands raised around the room to get that rare chance. There were more questions than time would allow, so in order to stay on schedule, Mr. Kasparov had to bid farewell. An hour lunchtime break was announced where a buffet table was set up in the lobby.

Mr. Kasparov charming the crowd

The Q&A was popular with the champion

I came around to the exit area of the stage in the lobby area where many fans had lined up to try and catch a glimpse and autograph from Mr. Kasparov. There are two only other chess players I know that can draw a crowd such as this anytime they appear, Magnus Carlsen and Hikaru Nakamura. At least that has been my experience I have witnessed many times before. Security details got in place and readied to usher the former champion through as people anxiously awaited. But he had to whisked through without stopping as he was on a tight schedule to appear at another meeting that afternoon. He was taken into a back private room for lunch with special VIP guests. I was fortunate to be invited in for photos with him after they had finished eating. Soon after he was escorted out by his right hand man Michael Khodarkovsky and security detail.

A lunch buffet is served

Some lucky VIP's meeting Mr. Kasparov

After a nice relaxing lunch, everyone returned for the afternoon lineup of speakers. Sunil joined other chess educators on a panel to discuss chess in the curriculum, a subject dear to his heart. The next panel titled Building a Bridge from High School to Competitive College Chess was spearheaded by GM Alexander Onischuk as the chess program director at Texas Tech University. Along the same lines the next panel described teaching chess as an academic subject for college credit. Three teachers spoke: Alexey Root from University of Texas Dallas, Jeff Day from Texas Tech University, and Jonathon Singler from Webster University.

One final coffee break before the last two panelists. It was a great time to mingle and connect with those that spoke on stage and swap contacts. Many took photos in the Grand Hall to remember such a wonderful experience. Sunil returned to the podium to introduce the next panel of speakers and joined them as well to discuss the "defining success at chess". Will Trepp of The Rockport Group touched on the benefits of chess and how it applies to one's profession. Chess has many transferable skills to the real world job scene, primarily a problem solving skill. Also speaking was Mississippi's state chess champion Master Benson Schexnaydre, the only homegrown player in the state to ever reach master status. Of special note was watching a proud Jeff Bulington in the back of the room video recording his state champion.

The final coffee break in the lobby

Sunil & Will Trepp discuss success & chess

Last but not least was the keynote address by GM Peter Wells and Dr. Barry Hymer. Their acclaimed book, *Chess Improvement: It's All in the Mindset*, was the catalyst for their talk. Touching on the subject matter of how the struggling growth mindset in chess evolves and is different for everyone that plays. We have all reached struggling points on the ladder rungs of chess. After a short Q&A session it was time to wrap things up. Before that, representatives from the St. Louis Chess Club were called up to the podium to make a special announcement. The Chess Conference returns to St. Louis in 2026 on October 22-24. I highly recommend getting tickets early and start planning now.

GM Peter Wells and Dr. Barry Hymer

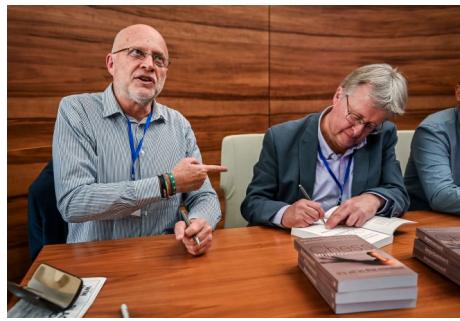

The conference returns to St. Louis in 2026

Sunil Weeramantry & Michael Khodarkovsky returned onstage one final time to thank everyone for joining the 2025 conference and to join them in the lobby for a cocktail reception. A great end to the day to catch up and discuss the conference with others. Also set up in the lobby was a table for a book signing by the key-

note speakers GM Wells and Dr. Hymer. A line formed quickly to get a signed copy of their book and a short chat with the ole' chaps from England. Everything wrapped up at about 6:30pm at the Quorum, but the night was still young.

Books ready to be signed at the reception

The authors arrive for the fans

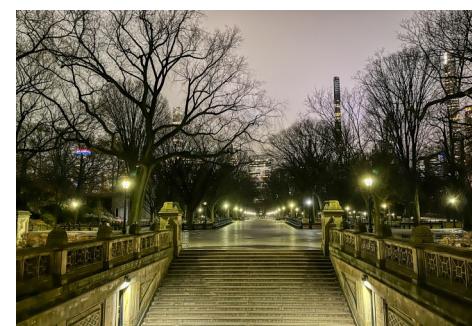

A great ending to the conference

There was another late night reception that all ticket holders were invited to, a special evening at La Fonda, a Puerto Rican eatery and bar. It was located in upper Manhattan, so a short drive or subway ride was necessary. A new pop-up chess business called Chess Place sponsored the event and provided gift bags as you entered the restaurant. There was a great live jazz band playing while tables were lined with chess sets for a great evening of fun and entertainment. Each guest received a meal off their menu and two drink coupons. I can personally attest that the food was excellent! I tried to capture the ambience of the night in photos while trying to slip in an occasional game of chess. An incredible day and night of bringing a wonderful community together

through our great game of chess. Chess has always been much more than just a game to me, but an art through my camera lens and a builder of great friendships I have made all around the world. Enjoy these last photos from the late reception and New York at night...

Great music, great food & drink, great company, and chess! A perfect evening

Beautiful Central Park at night

The Rockefeller Center Christmas tree

Checkmate USA vs INDIA

By John Brezina

October 4, 2025

It was back in June when I first learned of this exciting new chess exhibition and format while speaking to organizer Salim Belcadi in London at the FIDE Team Championships. He was excited to tell me about this planned tournament in Arlington Texas and had invited me to attend. The players and format had me intrigued, and being an easy flight from home I could not say no. Since it was just a one night event on the weekend, my wife would be joining me for the quick visit to the Dallas area.

Outside the arena on a hot day in Texas

The USA vs India match would be a spectacle like no other chess event I have attended. Five players from each country would be paired up with their counterparts. The top pairing was the world champion Gukesh Dommaraju vs Hikaru Nakamura. If that wasn't enough alone, Fabiano Caruana was paired against Arjun Erigaisi. US women's champion Carissa Yip faced newly crowned grandmaster Divya Deshmukh. The two 15-year-olds, Tanitoluwa Adewumi and Ethan Vaz, would later electrify the audience of youngsters. And finally a pairing I was excited to see was between two well known chess personalities and streamers, IM Levy Rozman vs IM Sagar Shah.

The incredible lineup of players

The format started out in a game with both players having 10 minutes plus a one second increment once the players were under one minute on their clock. Draw offers and resignations were prohibited and all games had to be played to checkmate. A flag fall or a theoretically drawn position would end the game as well. In case of a draw, the match continued with faster games. First a five minute game, and if necessary, one minute bullet games until a decisive result was reached. And all of this happened front and center on the stage while fans could make all the noise they could muster for their favorite players one match at a time. Think of a boxing match with noisy fans while player(s) were literally 'throwing' pieces instead of punches, in the end anyway.

The E-Sports arena set for chess

This was a complete turnaround from normal chess where spectators had to remain silent. The E-sports arena in Arlington had over one thousand spectators all cheering on their players, an electric atmosphere that chess has never seen. We arrived early in the afternoon before the match later that evening where we met Salim and his wife and received our passes. Being early allowed me to get some photos of the venue and extra exhibitions that were taking place. The lobby area as you entered had a nice merchandise shop setup along with some chess tables where some special guests were taking on all-comers on blitz.

As people continued to pour in, there seemed to be an equal number of both US and Indian fans as told by the special team jerseys that were being sold and worn. Another special addition was a book signing table setup for Chess.com CCO Daniel Rensch. I was fortunate to get my signed copy early by him before the crowds and I can attest that his story is quite remarkable. Dark Squares is a fascinating look into his early years and how chess had "saved his life". The lobby filled up and everywhere you turned, something exciting was going on. In a middle table, Norwegian GM Aryan Tari had fans lined up for a chance to play blitz and signed autographs. Another side table had US GM Jeffrey Xiong playing two games at once in blitz. Next to him was 15-year-old GM Andy Woodward blitzing all comers too.

Danny Rensch signing his book

Fans line up to play GM Aryan Tari

GM Jeffrey Xiong plays two at once

While all this was taking place, I entered into the playing zone hall where final preparations were being made for the match. A beautiful venue with a large video screen backdropped over an enormous stage. A sea of seats for fans lined the floor with a special VIP section up front. We made our way backstage where players and staff were getting ready and came across Tani Adewumi and his father. I have followed Tani's story for some time and have been fortunate to have met them several times. Not only did I get to introduce my wife to them, but also commentator James Dash who was also getting ready to go onstage. We spoke with him for some length as I have met him at the Freestyle chess events where he has been a regular commentator and brings a great energy to the game.

A fan's view of the stage and screens during the Q&A

Back on the floor a number of fans were in their seats early for the media segment with the players onstage taking questions from the media first and then some lucky fans. What a great way to start off the event, a chance to ask the world champion a question. Some video presentations highlighted the players and pumped up the crowd. Afterwards the players returned backstage until the "kickoff". I went back into the lobby where it was near capacity and bustling with chess activities. About thirty minutes before showtime, an announcement was made to line up and enter the playing hall where the lighting set a great ambience for this entertaining chess format.

Fans line up to enter the stadium

Even the seats in the back had a good view of the raised stage and players but more so with the giant screen above them that also displayed the players heart rates.

Vendors in the back sold drinks and popcorn and it looked more like a movie setting than your typical chess game. The hosts took the stage, James Dash and Twitch streamer Jules Gambit, who welcomed fans to this unique experience. Then James, with a WWF announcing voice, first introduced the Indian team one at a time to great fanfare and screams from the audience. First Arjun Erigaisi entered from the back of the hall and whisked his way through the aisles around the crowd getting high fives and well wishes from fans. Each player enjoyed the same fanfare with the world champion getting the loudest cheers as the final entrant for the visitors.

Sagar Shah high-fiving fans at the start

Then the home team. The stadium turned up a notch in volume as Fabiano Caruana was first introduced for team USA. He was followed by Tani and then Carissa Yip who relished in high fiving fans as they made their way through fans and then onto the stage. The volume rose again as the number one chess YouTuber, Gotham-Chess' Levy Rozman, made his way through an ecstatic stadium and played to the crowd as he moved onto the stage. And just when you think it couldn't get more wild and loud, number one chess streamer and number two player in the world, Hikaru Nakamura was introduced and entered the stadium draped in the USA flag garnering loud cheers. He made his way through droves of fans and finally through the front VIP section past his brother Asuka Nakamura and step-father Suni Weeramantry before completing the field onstage.

Hikaru making his way to the stage while his brother Asuka takes a photo

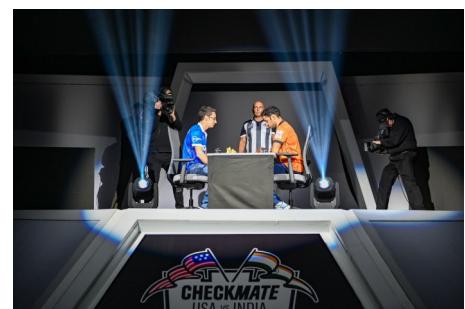

A familiar VIP

James Dash invited the captains Hikaru & Gukesh to the front of the stage to speak a few words, or perhaps a little "trash talking", to get things started. With that aside, the first pairing was called to the table, Fabiano & Arjun. Fans for both cheered wildly as they approached and shook hands as they sat down across from each other. Then the lights darkened in the stadium with only a spotlight shining on the gladiators. The arbiter, dressed as a referee, checked with both players if they were ready, had them shake hands, and then let the battle begin as if boxers were in a ring. Fabiano continued his excellent form as he just came off the Grand Chess Tour Finals win in Brazil days earlier, taking Arjun down in 60 moves. The crowd went wild as the win flashed across the big screens. Team USA 1, Team India 0.

The captains flank hosts Jules & James

The dramatic start of the match

During the game, in the back of the playing hall, another stage was set for the broadcast team that included co-host James Dash, GM Robert Hess, and GM Harshit Raja. A great commentary team to help spice the games up with their quick and cunning analysis live for the crowd. Next up were the youngsters, Tani & Ethan. After speaking to the audience with a short introduction, another dramatic and visual start to the game where both players' heart

The great commentary team: GM Robert Hess, James Dash, and GM Harshit Raja

rates were the highest, even before the start of the game. Both fought tough as veterans at the board and seemed deadlocked. Fans began chanting Tani, Tani, Tani! Indian fans started chanting Ethan, Ethan, Ethan! Perhaps motivated by the audience, Ethan sacrificed an exchange to try and start something. But Tani held tough and found the eventual checkmate to an erupting crowd. Afterwards, Jules interviewed a beaming Tani who was enjoying his victory on stage. Team USA 2, Team India 0.

The youngsters start their game

Tanitoluwa Adewumi at the board

The ladies were up next. Divya had just recently earned the Grandmaster title and Carissa had already earned her second GM norm. These two will be facing each other many times in the years ahead no doubt. The opening started normal but Divya slipped shortly after by losing a piece with a great find by Carissa. While Divya tried fighting on, being up a knight, Carissa cruised to a comfortable win to secure the match. Team USA 3, Team India 0. Nobody expected such a lopsided start. Would the remaining two pairings play now that the match was decided? Of course, it was what the fans were here for!

A future GM vs a newly crowned GM

Fans cheer on Carissa Yip's victory

I was excited for the next game between Levy and Sagar, and so were the fans as could be heard in the stadium. I've met them both, but never have photographed them at the board or watched them play live. My wife and I were fortunate to have VIP passes where she was able to sit in the front row next to the world champion's father Rajinikanth and Sagar's wife Amruta. What a pleasure to introduce her to both of them. While I was mostly moving around to take photos, I came back to our seats occasionally and before the start of Sagar's game. I asked Amruta what it was like sitting in the audience and watching her husband play in front of such a crowd. A reversed role for both of them since they usually are working hard on the other side of the cameras for Chessbase India. She said she was a bit nervous and excited at the same time.

Anxious Amruta watching her husband

The world champion's father Rajinikanth

A little jesting before the game begins

The players were called up to the front of the stage to great applause as two of the most recognized chess personalities on YouTube. Levy first pumped up the crowd by encouraging lots of cheering and then started a little trash talking. All in kind spirits for the match setting. Sagar responded in kind, but both sat down with great respect for each other and shook hands. Levy engaged the crowd repeatedly, even letting the audience call out his opening move. 1.f4! Both of these players are International Masters and know the game well. Levy has played more recently than Sagar has, but he showed great skill and intensity at the board. An unusual game ensued but fizzled into a repetition of moves where Levy once again asked the crowd if he should take the draw. A resounding yes and the first draw of the night. The pressure is turned up as they prepare for another game, but at five minutes.

Levy engaging the fans in game one

An intense Sagar Shah during game two

Sagar started strong by capturing an early pawn. But as often in blitz, chaos took over as both players were extremely low on time. Sagar knocked over some pieces by accident as happens and the referee stepped in to penalize the Indian player. Sagar could not recover and blundered a piece and the game by running out of time. A respectful handshake between the two as

the crowd erupted again. Levy was called up by Jules again to address the crowd. He was in his element and commanding the crowd for their enthusiasm and enjoyment of this new and wild format of chess. There was only one game left for the visiting Indian team to salvage some pride.

Levy Rozman reveling in his victory

Finally the marquee match between the world champion and the number two player in the world. Hikaru and Gukesh were called up to speak a few words before sitting down to close out the match. Hikaru played with white pieces as all the American players did, with the thought that there would be a possible rematch in India where they would play all games with white. Their first game ended in a draw after a quiet game where no one pushed too hard. The five minute blitz game was more tense but fizzled out into another draw, setting an epic final bullet game.

The start of the epic match

The world champion draws game 1 & 2

Another rule was that they were not allowed to play the same opening moves in consecutive games of their individual match, so Hikaru opened with the dubious 1.b4! Nakamura is in his wheelhouse playing bullet as everyone knows. The world champion took advantage and looked better early on until time pressure

took over. Gukesh, under extreme time pressure, slipped into a mating net and the crowd went wild. Hikaru, seizing on the crowd's emotions after such an intense game, picked up the defeated enemy king and flipped it into the audience! I was filming this final game while taking photos front and center in the middle of the crowd where the flipped king flew right over me. The energy level was palpable around me as the screens flashed the USA victory with a clean sweep over the Indian team.

Sunil & Asuka watching the climax

Fans on the edge of their seats for the end

Hikaru pumping up the crowd after the king flip and checkmate on the board

A familiar face livestreaming the finale

What an incredible finish to a fun and professionally run exhibition of chess in a format never seen before. The US team lined up onstage to all speak a few words to the fans and thank everyone involved in putting such an event together. A nod to their worthy opponents as well who put up

an incredible fight despite the lopsided finish. The final presentation was from a representative from TAG Heuer Carrera watches who presented each player on the winning team with one of their beautiful watches.

Caruana holds up his new watch prize

The victors! Team USA

Fans lined up to try and get a photo or autograph from the players before they headed backstage. Many obliged as best they could with such large crowds. I made my way backstage where players came back and still took time to meet and take photos with many of the staff members who helped make everything happen. Some lucky VIP fans also had a chance to get autographs and photos as well backstage even after such a long and exciting evening. I hope that sponsors can get behind more of these kinds of events as it made for an exciting night of chess. The reasonable ticket prices were well worth the value for the long night of chess and entertainment. Thank you to Salim Belcadi and sponsors for putting such an extraordinary event together. Looking forward to the rematch in India...

Some lucky young VIP fans getting an autograph from Hikaru backstage

Head Monk

By Paul Anderson
Colorado Springs Chess Club President

The Colorado Springs Chess Club is an affiliate of Chess.com and meets every Sunday night for online chess. We typically have a 30-minute, Blitz Arena at 6:15pm followed by a Rapid Swiss at 7:00pm (4SS, G/10+5).

https://www.chess.com/club/colorado-springs-chess-club?ref_id=7846680

However, things are changing.

The attendance numbers are down this year. With a membership of over 800, you would think we could get a handful of players to show up on a Sunday night! Of course, I am not one to talk, as I am part of the reason for the decrease. My numbers are down from 43 events in 2024 to 28 in 2025.

My excuse for not showing up on Sunday night is that I got a new job this year: Head Monk.

After 26 years of being Assistant Monk, I was thrust into the leadership role at the Gaming Monks chess booth in Larkspur, Colorado.

This means that I have to show up both Saturday and Sunday for 8 weeks at the Colorado Renaissance Festival to keep this chess promotion tool going that Buck Buchanan started when he was the President of the Colorado State Chess Association.

I wasn't sure I would like playing all 16 days at the chess booth, as I was only Assistant Monk for 2-3 days in the past three years with Buck. However, it turned out to be the highlight of my chess year.

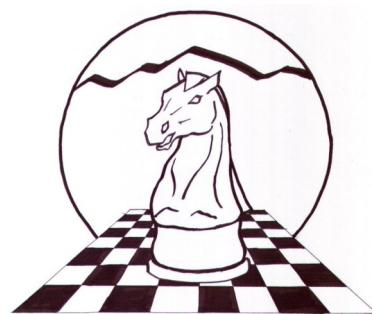

Fortunately, the 2025 President of the Colorado State Chess Association, Earle Wikle, stepped in to help out as Assistant Monk to keep this long-standing tradition going. Many thanks to him for his assistance as I learned the ropes at my new level of Monkdom.

I finished the year +534-11=0 with a 97.98% winning percentage. It is quite the ego boost and a nice reminder that, perhaps, I do have a talent for chess after all.

But, after close to 40 games a day, on a huge chess set, needless to say, I am too wiped out to play more chess online Sunday night.

So, if you want to play me next summer on Sundays, you'll have to stop by the chess booth!

Tuesday Night Chess

By Paul Anderson
Colorado Springs Chess Club President

The Colorado Springs Chess Club is an affiliate of USCF and meets every Tuesday night for OTB chess. We typically have a month-long, Swiss tournament (G/90+30) at 6:00pm. See the calendar for details:

<https://sites.google.com/view/colorado-springs-chess-club>

However, things are changing.

The attendance numbers are up this year. With only a dozen or so Supporting Members, you would think only a handful of players would come down to the club on a Tuesday night! But our numbers are the best we've had since I have been running things.

Year	Total	Unique	Events	Average
2025	351	110	21	16.71
2024	303	95	14	21.64
2023	234	95	13	18.00
2022	126	56	11	11.45
2021	117	61	8	14.63
2020	64	31	6	10.67
2019	280	71	19	14.74
2018	323	62	20	16.15
2017	232	50	19	12.21
2016	201	54	16	12.56
2015	157	52	13	12.08
Grand Total	2388	428	160	14.93

While space prevents me from mentioning all 110 players who came out to play some chess in 2025, I do wish to thank all of them for helping make the club a continued fixture in the Colorado Springs entertainment scene.

However, I do have some space to mention our 2025 champions.

In October, we held our 59th Colorado Springs City Chess Championship. Daniel Marmer won his first city title and became the 39th player to hold this title.

In November, we held our 2nd Colorado Springs City Quick Chess Championship. FM Gunnar Andersen came back for a 2nd city title, this time a Quick one in addition to his Speed title. He became the 2nd player to hold this title.

Unfortunately, Gunnar was too Quick for me and finished his games before the prize presentation. (see below: right, Paul Anderson, not pictured, Gunnar Andersen)

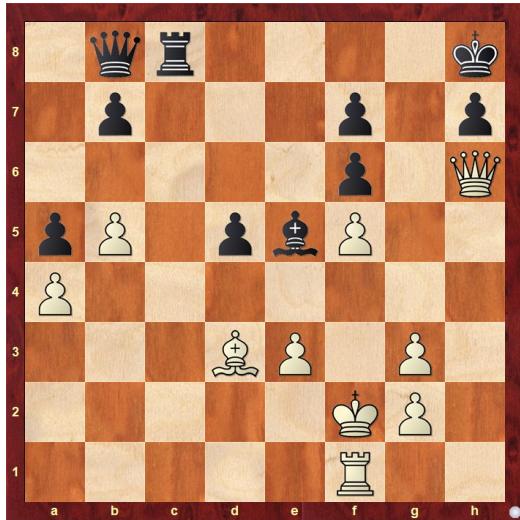

In December, we held our 30th Colorado Springs City Speed Chess Championship. Rhett Langseth decided to stay ahead of Gunnar and picked up his 3rd city title (1 City, 2 Speed). He has moved into 5th place on the All-Time title list behind LM Josh Bloomer (11), Dan Avery (10), Paul Anderson (8), and NM Buck Buchanan (5).

The Banquet

Jeffrey Baffo, Oct 2025

Greetings, dear reader. Today I have a sumptuous spread for you to sample. Choice morsels of Chess Wisdom for your discerning pallet. Consider the following diagram, White to move. Our example comes from Art of Attack(1)

Clearly, swinging the Rook over to the h1 must be the correct idea. But, how to continue? Let's assume 1.Rh1 Kg8! as our starting moves. 2Vukovic explains that Black's deviously simple idea is to just run away towards the Queen side, for instance 2.Qxh7+ Kf8 3.Qh8+ Ke7 and Black is doing well, thank you very much. Hmm... White has got to have something better!

1.Rh1 Kg8 2.Kf3! In Art of Attack, Vukovic presents a breathtaking idea: a rook lift to h5, which, he says, is to be followed by the sacrificial thrust Rg5+!! fxg5 f6!, seemingly sealing Black's fate with a poetic mating net. It's the kind of tactic that makes hearts race—a truly beautiful, inspiring motif. But beauty, however dazzling, must answer to truth. Modern engines reveal a sobering reality: after 2.Rh5 Bxg3+ 3.Ke2, Black's quiet reply Re8! (See line below.) turns the tide. The once-inevitable mate dissolves into a forced draw, or worse, a loss if White presses forward too hard. The true path to victory lies not in brilliance, but in humility: 2.Kf3!, a quiet king move that sidesteps tactical pitfalls and prepares the attack with discernment. Now 3.Rh4 is a simple and unstoppable Rook lift, ending the game very quickly. The possibility of Black's saving resource 3... Re8 is a classic example of a beautiful idea being slain by an ugly fact—a reminder that even in chess, the heart can deceive, and humility often leads to exaltation.

“But when you are invited (to the Banquet) go and sit in the lowest place, so that when your host comes, he may say to you, ‘Friend, move up higher.’ Then you will be honored in the presence of all who sit at table with you.”

— Luke 14:10 (ESV)

3...Re8!= 4.Rg5+ fxg5 5.Qxg5+= And White must humbly accept the shared point, since Vukovic's mating idea actually loses (5.f6?? Rxe3+! 6.Kxe3 Qf4+ 7.Ke2 Qg4+ 8.Kd2 Qb4+ 9.Ke2 Qe1+ 10.Kf3 Qf2+--)]

¹ Vuković, Vladimir (2004). The art of attack in chess (Reprint ed.). Everyman Chess. (Original work published 1965, p. 103). Highly recommended! This is one of those foundational works you can build your chess education on. A Masterclass for attacking the King.

² Vukovic's comment shows that he considered this crucial Black resource but incorrectly dismisses it; "After 3.Ke2, Black can do nothing in the face of Rg5+ and f6..."

Rules vs. Analysis; Trust, but Verify 1

by Jeffrey Baffo, Nov. 2025

This article explores a subtle moment in a classic Karpov game where a well-known pedagogical principle—piece redundancy—is challenged by modern analysis. Rather than disproving Dvoretsky’s insight, I aim to refine it, showing how today’s tools can help students think critically, honor legacy, and grow in discernment.

In chess teaching, two camps often emerge: one that reveres principles as trustworthy guides, and another that dismisses them as outdated dogma in the face of concrete analysis. But the truth lies not at either extreme. The mature player learns to walk the golden path between them—trusting rules as starting points, but verifying them through calculation, context, and discernment. Principles illuminate the board; analysis confirms the path

“What is the rule we’re examining here? Ah, dear reader, I’m so glad you asked. Succinctly put it is the The Rule of the Redundant (Superfluous) piece. When an opponent has more than one piece aimed at an important square. No less a legendary coach/teacher than Mark Dvoretsky put it this way; “(since) only one (of the opponent’s pieces) will be able to occupy the (strategically important square) the others will turn out to be superfluous.”

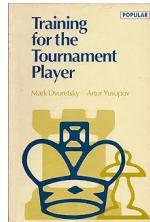

First let’s get some context on our source material;

Training for the Tournament Player(2) (1993) is a curated collection of Dvoretsky’s training materials and lessons, compiled with Artur Yusupov. It reflects their shared pedagogical philosophy and Russian training methods done in a modular and stand-alone lesson-based format. Our particular examination is the lesson on Superfluous piece, pages 98-101.

In Training for the Tournament Player, Dvoretsky introduces the concept of the redundant piece—typically a Knight—that duplicates the function of another without adding new pressure or coverage. When defending against such a setup, one should resist the temptation to exchange these seemingly active pieces. Doing so often relieves the opponent of their own inefficiency, allowing them to re-coordinate without cost.

Conversely, if you are the one holding the redundant pair, your goal is to either exchange or reposition one of them to restore dynamic balance—what we might call “full employment.” This principle echoes broader themes in Dvoretsky’s pedagogy: precision, restraint, and the art of not helping your opponent solve their problems. This rule is both true and important.

¹“Trust, but verify” (Russian: доверяй, но проверяй, doveryai, no proveryai) is a Russian proverb that became widely known in English after Suzanne Massie, a scholar of Russian history, introduced it to President Ronald Reagan. He used it frequently during arms control negotiations with Soviet leader Mikhail Gorbachev.— Wikipedia

²Authors: Mark Dvoretsky (renowned Russian trainer) and Artur Yusupov (former World Championship semi-finalist and student of Dvoretsky). First English Edition: Published in 1993 by B.T. Batsford, translated from the original German edition (1991).

One of the games Dvoretsky chooses to illustrate the concept is given below.

Karpov,Anatoly (2725) - Dolmatov,Sergey (2535)

IBM Amsterdam, 1980 [B33, Sicilian Pelikan/Sveshnikov]

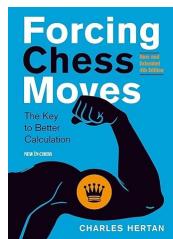

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Rb8 13.Be2 Bg5 14.0-0 Be6 15.Qd3 Qd7 16.Qg3 f6 17.Rfd1 a5 18.Na3 Na7 19.h3 Kh8 20.Bg4 Rfc8 21.Bxe6 Qxe6 22.Qd3 Rc5 23.Nc2 g6 24.b4 axb4 25.Ncxb4 Rb7 26.a4 bxa4 27.Rxa4 f5 28.Ra6 Nc8 29.Ra8 Kg7 30.Qe2 fxe4 31.Qxe4 Qf5 32.Qe2 Rf7 33.c4 Bh4 34.Rf1 Ne7 35.Ra6 Qd7 36.Qe4 Nxd5 37.Nxd5 Be7 38.Rfa1 Bf8 39.Qe2 Rc6 40.R6a3 Rc5 41.Rf3 Rxf3 42.Qxf3 Qf7 43.Qg4 h5 44.Qe4 Rc8 45.Ra3 Qf5 46.Ra7+ Kh6 47.Qe3+ g5 48.Qe2 Rb8 49.g4 hxg4 50.hxg4 Qb1+ 51.Kg2 Rb7 52.Rxb7 Qxb7 53.Qf3 Qc8 54.Qf6+ Kh7 55.Qf7+ 1-0

An excellent win by Anatoly Karpov; Engine rated this very accurate, 94.9%, for an in-game performance rating of 2900. Where then, did Dolmatov go wrong? Since he was gradually squeezed to death by Karpov's Patented Python Play, that's not so easy to pinpoint. I'd judge (with engine help, of course!) that it was somewhere around move 38, where he started to place (or be forced) his pieces passively. Even though Dolmatov was able to successfully trade pieces (the time-honored method to ease the defense) until there were only the Queens and a single piece each left, Karpov never let go of his dangerous King-directed initiative, despite the greatly reduced material. Dolmatov kept on heroically until he found himself staring at a force mate.

Our point of interest is after 33...Bh4 34.Rf1 Ne7 Our author tags Black's 34th move as an error, exchanging off one of White's Knights, helping White solve the redundant piece. However, Dvoretsky's suggested improvement; 34...e4 which he confidently asserted would "give Black a good game..." does not work. He gives no analysis or lines, just an overarching theme; that, at some point, Black would be able to execute the maneuver Qf5/e5/d4 and "exert pressure" on c4".

Dvoretsky's recommendation of 34...e4 is thematic, aiming for central pressure via Qf5–e5–d4. Yet engine analysis reveals a subtle refutation: 35.Ra3!, followed by the unstoppable Re3. This "forcing retreat," as Charles Hertan(3) might call it, turns Black's advanced pawn into a target. If Black attempts to prevent the lift with ...Bg5, White responds with f4!, challenging the bishop and opening lines. The envisioned queen maneuver collapses under tactical scrutiny. This moment reminds us that even elegant strategic ideas must be tested against the cold clarity of calculation. Respect the Rules but calculate the consequences. Trust—but verify.

3Charles Hertan's Forcing Chess Moves: The Key to Better Calculation offers a refreshingly practical approach to tactical training, urging players to adopt "computer eyes" by prioritizing forcing moves—checks, captures, and threats—as the gateway to deeper calculation. It's widely praised for helping players overcome human bias and recognize winning ideas that often go unnoticed. New In Chess, 2008, reprinted 2019

Botvinnik, Mikhail (2627) - Alatortsev, Vladimir (2499) [E85]

URS-ch07 Moscow, 10.1931 [Baffo, Jeffrey//F17/Stockfish]

King's Indian Defense: Sämisch, Orthodox Variation

1.d4 Nf6 2.c4 g6 3.f3 Bg7

[Today, the well-versed opening student would realize that "...due to the weakness of d4...as Botvinnik himself would observe decades later the Gruenfeld type response 3...d5 4.cxd5 Nxd5 5.e4 Nb6 6.Bc3 was = and would lead to dynamic play for both sides. But a young up and comer, Botvinnik was very enthusiastic about 3.f3, -- waxed enthusiastically about 3.f3 "...it is very strong not to develop the Queen's Knight, but (to play) 3.f3, after which Black cannot play the Grunfeld Defense..."]

4.e4 d6 5.Nc3 0-0 6.Bc3 e5 7.Nge2 Nc6?! [A better chance at counterplay would be 7...exd4 8.Nxd4 c6 9.-- ♕d5?] 8.Qd2 Nd7 9.d5 [9.0-0-0 Soltis's notes in his wonderful 2014 book(1) on Botvinnik that long castles is a little too frisky due to 9...Nb6 10.b3 exd4 11.Nxd4 a5?] 9...Ne7 [9...Ncb8 to re-route to c5]

10.g3 [Soltis passes over this move but Stockfish (Chess.com's version) puts this down as Botvinnik's only error in this game, preferring the belligerent 10.h4. My Fritz engine and it's "Live Book" feature prefer 10.g4 thinking about 40 ply deep.] [10.h4; 10.g4]

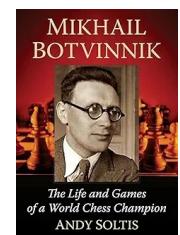

10...f5 11.Bg2 fxe4?! [Another small error, relieving the tension prematurely. Stabilizing the center like this helps White use his space advantage to greater effect. 11...Nf6 or ...a6 kept more chances of counterplay] 12.fxe4 Nf6 13.h3 b6? [Soltis queries this but does not amplify on the punctuation. Both Fritz and Stockfish think it's just a normal move.]

14.b3 Kh8 15.g4 Neg8 16.Ng3 Bd7 17.0-0-0 [Soltis makes a strange comment that "White can keep the Queenside closed or exploit attempts to open it..." He then says Black should try to open the Queenside with ...b5. These are two self-contradicting statements with equally internally opposed lines to go along with them. It would be more accurate to say something like "Black can play in risky style to open the Queenside, but White can always exploit that. Meanwhile, he himself has a way to force open lines for his attack..."] 17...h6? [Creating a target for White's pawn attack.]

18.g5 hxg5 19.h4 Bg4 [19...g4 Soltis points out that Black has no good way to keep lines closed. 20.h5 g5 21.h6+--] 20.hxg5+ Nh5 21.Nce2 Ne7 22.Rh4 Qd7 23.Rdh1 Kg8 24.Rxg4! (See diagram below)

Take a moment to notice how White's solid pawn structure and advantage in space make it impossible for Black's pieces to contribute to the defense of the Black King. His Queen Rook and Queen Knight are kept out. These advantages allow for White's exchange sacrifice, drawing the Black Queen into a deadly trap.] Qxg4 25.Bh3 Qf3 26.Rf1 Nxg3 27.Be6+! [Taking the Queen wins too, but the game continuation is much stronger.] 1-0

1 Andrew Soltis' *Mikhail Botvinnik: The Life and Games of a World Chess Champion* (2014) is a richly detailed and deeply researched portrait showing both the strategic genius and complex humanity of the Soviet Chess patriarch.

Forcing vs. Forceful, looking beyond “Checks, Captures, Threats”

Jeffrey A. Baffo, Nov. 2025

The diligent chess learner will at some point in his upward climb hear the advice to “...always look for checks, captures, threats!”. True words. This tactical trilogy is the cornerstone of sound play. If a player truly mastered and consistently applied that to his chess games, I’d wager he’d quickly be a competent tournament player, say in the 1600-1800 ELO range. However, chess is too complex for a one-size fits all approach. Looking for Checks, Captures, and Threats is like remembering to hold your breath if you go beneath the water. Undeniably essential, but not enough for the deep-sea exploration.

Beyond checks, captures, and threats lies an ocean of subtlety—moves with quiet power, that shape the game without seeming to force anything at all. These are not the brute-force checks and captures that compel an opponent’s hand, but rather what I call *forceful* moves—ideas so potent that they alter the landscape of the position regardless of how the opponent replies. A forceful move may look quiet, even retreating, yet it carries within it hidden power: it denies escape squares, reassigns functions, or sets traps that cannot be sidestepped. Unlike forcing moves, which limit choices, forceful moves expand pressure until every choice is poisoned. They are the subtle levers of control that engines spot so quickly, but humans often overlook because they defy our instinct to always move forward.

**Christiansen, Larry Mark (2566) - Zhu Chen (2538) [A28]
USA-CHN Summit Seattle (3.6), 16.03.2001**

1.c4 Nf6 2.Nc3 e5 3.Nf3 Nc6 4.d4 exd4 5.Nxd4 Bc5 6.Nxc6 bxc6 7.e3 0-0 8.Be2 Qe7 9.0-0 Ne4 10.Nxe4 Qxe4 11.Bd2 Qe7 12.a3 Bd6 13.Qc2 c5 14.Bd3 Qh4 15.f4 Bb7 16.e4 f6 17.Rf3 h6 18.Raf1 Rae8 19.Rg3 Kh8 (see diagram below) 20.Qd1 f5 21.e5 Be7 22.Be1 Bd8 23.Rxg7 Qxe1 24.Rxe1 Kxg7 25.Bxf5 Re7 26.Qh5 Kg8 27.Re3 Rg7 28.Rg3 Bg5 29.Qg4 Bf6 30.Qh3 Bg5 31.fxg5 Rgf7 32.gxh6+ 1-0

Diagram: White to move. (Black has just played 19... Kh8) The quiet retreat 20.Qd1!!—not forcing, but forceful—transforms the position by trapping (denying her the g4 square.) Black’s queen and enabling Rh3 with devastating effect. Visually, humans have a curious blindness to backwards moves. This move also seems to drop an important center pawn to boot, all in all, a move a person would struggle to even include for serious analysis, let alone choose in a serious tournament game.

The beauty of chess lies not only in its tactics but in its truths—quiet, layered, and often hidden in plain sight. Moves like 20.Qd1!! remind us that strength isn’t always loud, and control isn’t always direct. To train the eye for such forceful subtleties is to step into the strategic soul of the game. In the game above, trapping the Black Queen is not affected by the apparent insufficient guard on the e4 pawn, to wit; 20.Qd1 Bxe4 21.Bxe4 Rxe4 and 22.Rh3 throws a net unceremoniously on her Ladyship. Training yourself to look for *forcing* moves is the foundation, being able to find *forceful* moves is the pinnacle.

Elements of the Pin 1—Tactical Chess Techniques; #4, “The Pin” 3 Dec. 2025

Element 1: Definition & Geometry

- A pin is a tactic involving **three pieces in a line** — diagonal, vertical, or horizontal.
- The pinning piece (attacker) aims down the line.
- The pinned piece (middle) belongs to the defender.
- The shielded piece (rear) is the more valuable piece being protected. (Standard phrasing: “the more valuable piece behind.”)
- The essence: the pinned piece is restricted because moving it would expose the shielded piece.

Element 2: Types of Pins

- Absolute Pin: The shielded piece is the king. The pinned piece cannot legally move.
- Relative Pin: The shielded piece is valuable (queen, rook, etc.). The pinned piece can move, but doing so would expose the shielded piece to capture.
- Threat Pin: The pinned piece is shielding a critical square (e.g., guarding against back rank mate). Moving it would unleash disaster.
- Cross Pin: A piece is pinned along two lines simultaneously — rare, but devastating when it occurs.

Element 3: Tactical Outcomes

- Material gain: The pinned piece may be captured because it cannot escape and cannot be defended.
- Mating attack: Pins (especially absolute pins!) often support checkmating nets by immobilizing defenders.
- Forced immobility: Sometimes the pinned piece must “die in place,” sacrificed to protect the shielded piece.
- Exploitation: Increasing the pressure on a pinned piece. Attacker can use superior force to pile up more attackers against the pinned piece than the defender can cope with, winning material and/or forcing positional concessions.

Element 4: Strategic Implications

- Immobilization: Even if defended, the pinned piece is shackled and cannot fulfill other duties.
- Pressure motif: The attacker gains leverage by tying down the pinned piece.
- Positional weakness: A knight pinned to a queen may still defend squares, but its potential is frozen.
- Long-term bind: Pins can create enduring positional problems, not just immediate tactical threats.

Element 5: Illustrations & Examples

- A pinned piece is chained — present on the board, but powerless to act.
- Absolute pin → “You cannot move — the law forbids it.”
- Relative pin → “You may move — but the cost will be high.”
- Threat pin → “You are guarding a gate — abandon it, and the enemy walks in.”

Illustration

phatchess (1964) – Simon (2141) [C48 Spanish 4 Knights] Rapid game, Chess.com 3 December 2025

The reader is invited to play along to the moves of the following game and see almost all of the elements of pin come to life in an actual game.

1.Nc3 Nf6 2.e4 e5 3.Nf3 Ne6 4.Bb5 d6 (diagram) 5.d4 Bg4?? 6.d5! a6 7.dxc6? axb5 8.cxb7 Rb8 9.Qd3 c6 10.Be3?! Rxb7 11.Rd1?! Be7 12.h3?! Bxf3 13.gxf3 0–0 14.f4 b4?! 15.Na4? Qa5 16.b3 exf4 17.Bxf4 d5? 18.e5?! Ne4 19.Rg1? Bh4?! 20.Bg3? Bxg3! 21.fxg3 Qa7 22.Qd4 Qb8 23.Rd3 Re7 24.Kf1 Rxe5 25.g4 Qd6 26.Rg2 Qf6+ 27.Kg1 Rfe8 28.Nc5 Nxc5 29.Qxc5 Re1+ 30.Kh2 Qf4+ 31.Rdg3 R1e2 32.Qg1 Re1 33.Qf2 Qd6 34.Rg1?! R1e2 [Simon2141 won by resignation] 0–1

White to play his 5th move. Black faces an absolute pin, as indicated by the green arrow. In element order; His white squared Bishop is the **Pinning Piece**, the Black Knight is the **Pinned Piece** and the Black King is the **Shielded Piece**. Here White played **5.d4** threatening to push again (6.d5) to intensify the pin. See how Black responds in our next diagram.

As you can see in our game score above, Black does not break the pin (5...Bd7 or Nd7) nor does he kick (5...a6) the pinned piece. Rather he creates his own (relative) pin. See the situation illustrated below.

After the moves **5.d4 Bg4**, we see Black establishing a **relative pin**. The pinning piece (Black Bishop) is worth about 3 points. The Pinned piece (White Knight) is about equal value. However! The Shielded Piece (White Queen) has triple that value at about 9 points! Trading 3 for 9 is not a good idea! But what about what Black did? Is Black's choice a good move? See our next diagram.

Black has chosen to “**Kick**” the pinning piece with 6...a6 (see arrow) which, forces White to pick from 3 options; exchange pieces (White’s Bishop for Black’s Knight) abandon the pin (leave the pinning diagonal a4-e8) or maintain the pin by 7.Ba4. But doesn’t 7.Ba4 allow Black to break the pin with 7...b5 (?) I certainly thought so. (Spoiler alert; I was wrong!!)

I chose to exchange pieces (and went on to lose...was this cosmic justice/punishment for missing the right move?) with 7.dxc6 (see game score) but I had a much better move. See next (analysis) diagram.

Here’s what could have happened. After 7.Ba4 (maintaining the pin) if Black tries to break the pin with the aggressive pawn thrust b5, White simply takes it! In other words White’s pin is so powerful he’s willing to give up a piece (temporarily) to keep it!. The moves that got us here were. **7.Ba4 b5 8.Nxb5** which will lead us in to our final diagram.

To catch us up, the moves that got us here were **1.Nc3 Nf6 2.e4 e5 3.Nf3 Nc6 4.Bb5 d6 (diagram) 5.d4 Bg4?? 6.d5! 7.Ba4 b5 8.Nxb5 axb5 9.Bxb5**. Black’s Knight is *still* pinned and attacked twice. White will win back his Knight and in the end be two pawn up with very good winning chances.

Summary

Pins are among the most frequent and forceful tactics in chess, appearing in almost every game at every level from beginner skirmishes to grandmaster. Their strength lies in the way they immobilize a defender, often turning a single alignment of pieces into lasting pressure, material gain, or even a decisive mating attack. To understand and employ pins properly is to unlock one of the game's most reliable weapons; to neglect them is to miss countless opportunities. Mastering both the use of pins and the art of breaking them will elevate your play dramatically, sharpening your tactical vision and deepening your strategic awareness.

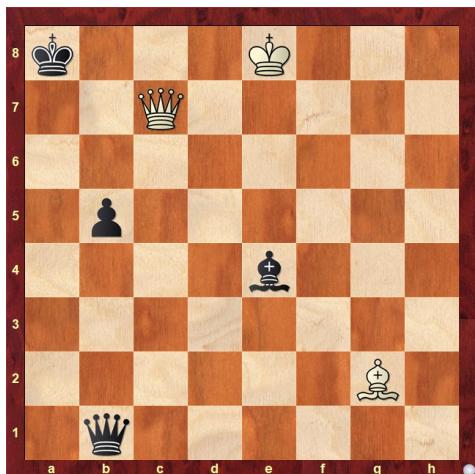

Pins are important and powerful, and knowing how to defend against them is just as vital. A pinned piece can often be liberated through careful technique: breaking the pin by moving the shielded piece out of danger, interposing another defender between attacker and pinned piece (ideally one of equal or lesser value than the shielded piece), or kicking the pinning piece away with a pawn or minor piece attack. Each of these methods restores mobility and prevents the attacker from exploiting the bind. By mastering *both* the art of employing pins and the skill of neutralizing them, players gain a complete understanding of this fundamental tactic — reaping the benefits while avoiding the dangers.

□ Glossary of Pin related Terms

- Pin: A tactic where a piece (the pinned piece) cannot move without exposing the more valuable *shielded piece* (standard phrasing: “valuable piece behind”) to capture.
- Shielded Piece: The rear piece in a pin — the one being protected. If it is the king, the pin is absolute; if it is another valuable piece, the pin is relative.
- Absolute Pin: A pin against the king. The pinned piece cannot legally move, since doing so would expose the king to check.
- Relative Pin: A pin against a valuable piece (queen, rook, etc.). The pinned piece can move, but doing so would expose the shielded piece to capture.
- Threat Pin: A pin where the pinned piece is shielding a critical square (e.g., guarding against back rank mate). Moving it would unleash disaster even if no immediate capture occurs.
- Cross Pin: A rare but powerful situation where a piece is pinned along two lines simultaneously (for example, both vertically and diagonally). See bonus diagram.

Breaking a Pin: The act of neutralizing a pin. This can be done by:

- Moving the shielded piece (standard phrasing: “the more valuable piece behind”) out of the line of attack.
- Interposition Defense: Placing another piece between the pinning and pinned pieces to block the line of attack. Importantly, the value of the interposed piece is usually equal to or less than the shielded piece — otherwise the defense may be self-defeating.
- Exchanging or forcing away the pinning piece.
- Kicking the Pinning Piece: A common defensive tactic where the defender attacks the pinning piece (often with a pawn push) to force it to retreat or exchange. Example: after ...Bg4 pins a knight on f3, White plays h3 to “kick” the bishop.

Bonus diagram. Illustrating the cross-pin; White to move plays 1.Qh7! winning.

Elements of Positional Play, #1; Position Over Submission —

Critical Mass and the Path to Victory(1)

By Jeffrey Baffo

Element 1: Definition & Core Idea

- Position over submission is the principle that control and domination of the board are the true foundation of victory.
- Once positional advantage reaches critical mass—when your pieces are harmonized and the opponent's options restricted—the chance for a decisive finish will always present itself.
- The essence: tactical victory flows naturally from positional superiority.

Element 2: The Trade-Off

- Even from a dominant position, the final blow may require heavy lifting: precise calculation, patient maneuvering, or the discipline to wait until the attack becomes unmistakable.
- The tighter your positional grip, the simpler the tactical finish becomes.
- A loose, murky position demands brilliance to convert; a commanding one makes the win flow naturally.

Element 3: Practical Outcomes

- Clarity of Attack: When positional control is strong, the finishing combination is easier to see and execute.
- Safety in Waiting: If the winning line is not yet clear, continue grinding, tacking, and tightening until clarity arrives.
- Guarantee of Victory: Positional domination ensures that opportunities for decisive tactics will eventually appear.

Element 4: Strategic Implications

- Control First: Prioritize development, space, and coordination over speculative attacks.
- Critical Mass Threshold: Recognize when your position has accumulated enough force that the opponent is bound to collapse.
- Conversion Discipline: Train yourself to resist premature attacks; wait until the tactical finish is visible and reliable.

Element 5: Illustrations & Examples

- In the Alekhine–Albin–Chatard Attack, White's early pawn sacrifice is not about grabbing a quick knockout, but about building pressure. Once the pieces are harmonized—knights on strong outposts, rooks connected, queen poised—the opponent's defenses collapse.
- Fighters in combat sports know the same truth: secure dominant position, and the submission will eventually present itself.

Example game; phatchess (1671) - Dray_mond11 (1657) [C13 French Defense Alekhine/Albin/Chatard attack] On line blitz, Game in 5, no increment., 08.12.2025

1.e4 e6 2.d4 d5 3.Nc3 Nf6 4.Bg5 Be7 5.e5 Nfd7 6.h4 Bxg5 7.hxg5 Qxg5 8.Qd3 Nc6?! (See diagram below)
 9.Rxh7 9...Rxh7 10.Qxh7 Ndx5 [10...Nxd4 11.Nge2 Nxe2 12.Bxe2 Qxe5]
 11.dxe5 Qxe5+ 12.Be2 d4 13.Nf3 Qa5 14.Qg8+ Ke7 15.Nxd4 Nxd4 16.0–0–0 Nxe2+ 17.Nxe2 Qg5+
 18.Kb1 b6 19.Qd8# 1–0

Here I wrongly choose to attempt the “submission”, that is to say, I cash in my strong initiative for a lowly Rook pawn Rxh7. The right choice was POSITION! Suffocate my opponent by 9.Nf3! when Black may not be losing but he is certainly in a cramped, defensive position with no counterplay. White, on the other hand still keeps the option of winning Black’s h-pawn later. After 9.Nf3 Black has the dismal choice between 9.Nf3 Qe7 (9...Qg6 10.Qxg6 fxg6 11.Nb5) 10.Rxh7 Rg8 11.0–0–0 in both cases White is firmly in command with good winning chances.

Summary

Positional domination is the guarantee of victory. The submission—whether checkmate, decisive attack, or material win—flows naturally once control reaches critical mass. The art lies in knowing when to strike and when to wait. By mastering both the patience to build position and the calculation to finish, players elevate their game from opportunistic tactics to inevitable triumph.

He Missed the Gist

Jeffrey A. Baffo, Dec. 2025

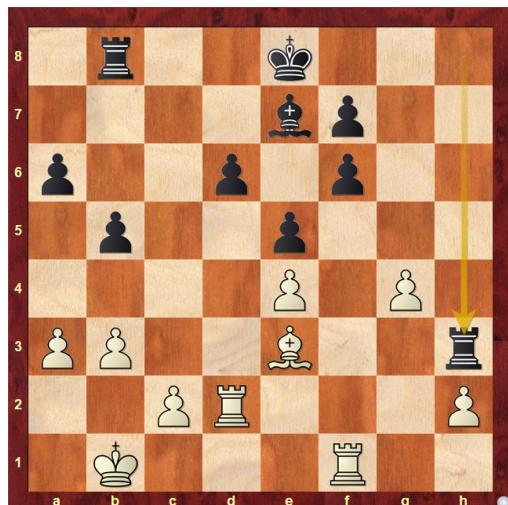

In chess analysis, the first and most essential task is to **grasp the gist of a position** — its heart, its essence, the underlying imbalances that define what is truly at stake. It is tempting, almost irresistible, to dive straight into calculating moves and variations. Yet calculation without context is like packing for a journey without knowing the destination: you may fill the suitcase, but with the wrong things. The gist tells you where you are headed. It reveals whether the struggle is about pawn structure, piece activity, king safety, or initiative. Only once the core imbalance(s) is understood does calculation become meaningful, because then each line is weighed against the true demands of the position.

To miss the gist is to risk chasing shadows — flashy tactics or promising strategy that look appealing but fail to address the deeper currents of the game. To perceive it is to anchor your analysis in reality, ensuring that every move you consider is tested against the position's essence. This is why masters like Silman insist on beginning with imbalances: they are the compass that guides calculation. Without them, analysis is aimless; with them, it becomes purposeful, precise, and profound.

Position 67, Reassess Your Chess Workbook(1)

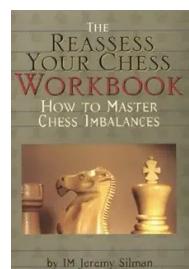

White to move. Clearly, he must reestablish approximate material equality by recapturing the Queen. But for this move only, he has the option to insert 17.Nxf6+. The big question is: should he? I say no. The moves that followed, 17...gxf6 18.Rxd3 h5 19.Rg1 hxg4 20.fxg4 Bc4 21.b3 Bxf1 22.Rxf1 Rh3! (diagram below) create a favorable endgame for Black. White's now backwards h-pawn being particularly sensitive. The move I would have preferred was to simply recapture immediately;

Anand himself remarked, when annotating the game for New In Chess; “Black appears to have committed a whole host of positional sins, yet stands better!” 17...gxf6! was by no means forced. Silman suggests that Ivanchuk likely anticipated the more “normal” recapture 17...Bxf6, which would have preserved Black’s structure. To accept the doublet was bold and creative, maybe even surprising Ivanchuk. It shifted the character of the game entirely. By embracing minor structural damage, Anand opened up counterplay that ultimately outweighed the static weakness, a reminder that sometimes the best move is the one that defies conventional expectations.

¹The Reassess Your Chess Workbook: How to Master Chess Imbalances by Silman, Jeremy (2000) Simply marvelous! But not a light read. This baby will make you sweat!

Let's compare this with Silman's suggested continuation. After the logical continuation 17.Rxd2 Nxd5 (Clearly, Black can not allow the Knight to live as it would be the perfect piece to exploit the outpost square d5!) 18.exd5 Bd7 (diagram) 19.h4! Much better. White would have kept a small edge, based on a better pawn structure, complete with dynamic pawn breaks possible on both wings, those being (properly timed and supported of course!) c4 and/or g5.

There are three prime factors for consideration at our starting diagram

- 1) the Bishop vs. Knight imbalance
- 2) urgent and compelling pawn tension (Black needing to resolve the backwards pawn on d6).
- 3) The initiative

All three of those factors are augmented for White in the second diagram, whereas they are tilted in favor of Black in the text continuation.

(415616) Ivanchuk, Vassily (2720) - Anand, Viswanathan (2690) [B66]
Linares m Linares (1), 1992

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 6.Bg5 e6 7.Qd2 a6 8.0-0-0 h6 9.Be3 Nxd4 10.Bxd4 b5 11.f3 Qa5 12.a3 e5 13.Be3 Be6 14.Kb1 Be7 15.g4 Rb8 16.Nd5 **Qxd2** 17.Nxf6+ gxf6 18.Rxd2 h5 19.Rg1 hxg4 20.fxg4 Bc4 21.b3 Bxf1 22.Rxf1 Rh3 23.Re2 Kd7 24.g5 Ke6 25.gxf6 Bxf6 26.Bd2 Be7 27.Be1 f6 28.Bg3 d5 29.exd5+ Kxd5 30.Rf5 Kc6 31.Ref2 Rh6 32.Kb2 Kd7 33.Re2 Bd6 34.Rf3 Rc8 35.Be1 Ke6 36.Rd3 Rh7 37.Rg3 Bc5 38.Ka2 Rd7 39.Rc3 Rcc7 40.h4 Rd1 41.Bf2 Bd6 42.Rg3 e4 43.Rxe4+ Be5 44.Rxe5+ fxe5 45.Kb2 Rd2 0-1

Just as an aside, Chess.com rated Vishy's endgame play at 100%

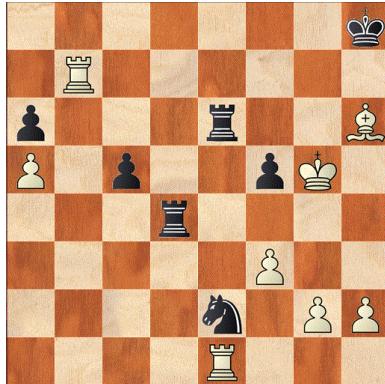

Conclusion;

In the end, I hope the lesson of this article will be that it is not simply about one move versus another, but about the discipline of seeing deeply into a position, to pick up the gist of it. Chess demands a kind of differential diagnosis:⁽²⁾ before prescribing moves, one must first identify the imbalances that define the position. Jeremy Silman's brilliant workbook (may his memory be honored) taught generations of players that these imbalances are not static trophies to be collected, but living factors that augment, cancel, or transform with each passing move. What looms large on move 10 may be irrelevant fluff by move 25. To calculate without grasping the gist is to prepare for a journey without knowing the destination; to weigh and measure imbalances as they shift is to navigate with a compass. Ivanchuk's misstep reminds us that the heart of analysis lies not in chasing variations, but in perceiving the essence — the gist — that gives those variations meaning.

²In medicine, a “differential diagnosis” means listing and weighing the possible explanations for a patient’s symptoms before deciding which one best fits. It’s like considering several suspects in a mystery until the evidence points to the right culprit.

Tactics Time!

These positions came from recent games played in Colorado. Answers on the next page.

**Answers:**

1. **37.Bg7+** forks the Black King and Rook.
2. **21.Nxf7!** Double discovered attack on the Black Queen.
3. **18...Qxd4!** Both Queens are under attack so Black does a desperado capturing the Rook, and White does not have enough time to recapture Black and save his own Queen, so Black wins a Rook.
4. **23.Rxf7+! Kxf7 24.Ng5+ Kf8 25. Qh7 Nf5 26.Qf7# .**
5. **23...Kf6#** The Black King unleashes a discovered check and covers the f5 square.
6. **13...b5** wins a piece with a variation on the Noah's Arc trap, **14.Bb3 c4** forking the Bishop and Rook.
7. **11.Nd6+** forks the Black King and Queen. The e7 pawn is pinned.
8. **40...Nxd3!** Removes the defender of the White Knight, picking up a pawn. **41.Nxd3 Kex4** or **41.Kxd3 Nb4+ 42.Ke2 Kxe4**
9. **.48...Rxe6+!!** White cannot capture the Rook with the Bishop because the c3 pawn would promote.

A QUEEN'S BEST FRIEND

By NM Todd Bardwick

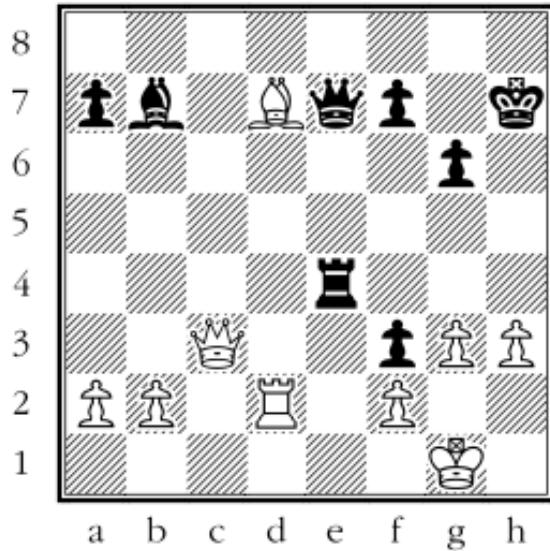

(Reprinted with permission of the Author, the United States Chess Federation & Chess Life magazine.)

We all learn from an early age that it is good to have lots of friends. Friends are fun to spend time with, talk to, and play with. Friends also protect and support us.

A queen can easily annoy the enemy king, but she usually can't checkmate him all by herself. If she can find a friend on her team to attack a square next to the opposing king, she can often move right up next to the king safely and checkmate him.

Consider this position from the 2000 Colorado Closed with Black to move.

Andy Rea (2079)

Michael Ginat (2296)

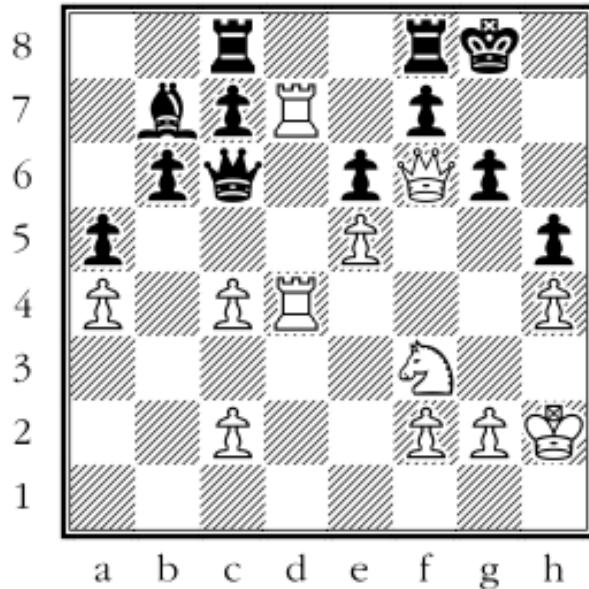

Black to move

An important observation is the Black pawn on f3 attacks the heart of the White king position. Black dreams about ways to get his queen to g2, where she is protected by the friendly f3 pawn and checkmate the White king.

28...Re1+ 29.Kh2 Rh1+! Sacrificing the rook to clear a path for the lady! **30.Kxh1 Qe1+ 31.Kh2 Qf1!** Threatening mate on g2 with the support of the pawn on f3. If White eliminates the pawn by sacrificing his queen with 32.Qxf3, then 32...Bxf3 and the bishop becomes the queen's new best friend!

Here is a position from Tillburg in 1991 between two world-class players.

GM Timman

GM Short
White to move

Notice that the White queen is close to the Black king. But she has no friends to help her out. Black's king and rook on f8 protect the f7 pawn from the attacking queen and d7 rook.

The White knight could be a great friend to the queen because he can attack both white and black squares. But the only place he can move to is away from Black's king to e1 because of the Black bishop and queen battery aimed at g2. White's rook on d4 and kingside pawns can't attack any squares near the Black king.

Short finds an unusual and surprising middlegame friend for his queen...the king! He played **32.Kg3! Rce8 33.Kf4! Bc8 34.Kg5! Resigns** White's king is heading for h6 where he can protect the g7 square for his queen. If 34...Bxd7 35.Kh6! and 36.Qg7 mate.
