

Where I saved a child for a 12 week

last London

A mother brought her girl of ~~one~~ ^{one} year she carried her up the stairs. I noticed she had no shoe on one foot and an elevated heel on the other foot. she told me Dr. - had her in a cast for 10 weeks and that he wanted to put her in a cast for 12 weeks more or he says she will never be able to walk. I paid my poor child on the bed. she died and the child began to cry. I told her if she was a big girl she would not have to go to the Hospital any more that I kept her I said. I ran my thumb up the side of the spine and it seemed everything broke loose so I gave her a little more treatment. then I lifted her off the bed put her on her feet and told her to walk to her Mam Ma. she never hesitated but started to walk right away. then the mother said Ma' S. I have no money the Hospital expenses has taken all we had. don't give her money to buy the girl a pair of shoes. we have nothing until next pay day. So I said here 5 Dollars. go down town and buy her a pair. and here another five Dollars. take this to the Dr. tomorrow and take the girl along. he won't know her. next day she died took her to the Dr. paid him the five Dollars. then he said Remember. Next Tuesday you must bring that child of yours to the Hospital or she will be a cripple all her life. Do you think so Dr. well I don't. look at her is that the child - yes. she walks all right Don't you think Dr. I don't that man Stephenson. yes Dr. he put her on her feet in 15 minutes what did he say was wrong with her. he said nothing. just - drove something to her back then put her on her feet. and said walk that's all. Dr. well we are pleased to have a man like that. I wonder
