Why You Should Strength Train

-  **Prevents Injuries.** When done with proper form, protects your joints from injury.
-  **Improves Your Sports Performance.** Who wouldn't want to perform their best on the court?!
-  **Improves Sleeping Patterns.** You are less likely to suffer from insomnia if you strength train regularly.
-  **Controls Body Fat.** Lean muscle burns more calories at rest thereby increasing your resting metabolic rate. The more muscle you build, the more calories you'll burn.
-  **Boost Stamina.** You will find you fatigue less easily when you strength train.
