FOOD TREE PLANTINGS

VOLUNTEERS NEEDED to:

Plant Native Trees & Shrubs

Landscaping with native trees, shrubs, and plants can help combat climate change. Many native plants, especially long-living trees are effective at storing the greenhouse gas carbon dioxide. Because native plants are adapted to local environmental conditions, they require far less water, saving time, money, and perhaps the most valuable natural resource, water. In addition, trees and shrubs to provide vital habitats for birds, butterflies, and other species of wildlife.

Earn Student Service Learning Hours

LOCATIONS

- Nanjemoy Creek Environmental Center - April 2, 2022 10:00 AM - 2:00 PM
- Thomas Stone High School - Saturday April 30, 2022 10:00 AM - 2:00 PM
