

NEARLY 75% OF MATERNAL MORTALITY AND MORBIDITY IS PREVENTABLE

FACTS...

- Nearly 10% of pregnant women battle with pre-eclampsia
- Nearly 10% of pregnant women have hypertension
- 15% of women have unexpected complications during pregnancy

SAVE MOMS

Periodic clinical visits during pregnancy are not sufficient for all women. In order to address the problems being faced by a growing number of women during pregnancy, patients and clinicians need access to data in near real-time.

Save Moms, the national campaign of Reach is working with public and private sector entities to provide you access to support tools that keep you and your patients connected and better informed.

With the timely notification of clinical information, early intervention and prevention are possible.

“Over 80% of patients are expecting their healthcare providers to leverage digital health technology to improve the quality of care.” (Digital Doctor Survey 2020)

SAVE MOMS RESOURCES

Four tools that are readily available for you to provide to your patients:

- 1 Discounted clinically validated home blood pressure monitors
- 2 Free App for remote maternal care monitoring including COVID-19 tracking
- 3 Mental health and wellness monitoring and support groups
- 4 Education materials

Materials for You

Clinicians also have valuable support tools and resources available through **Save Moms**.

You'll have access to:

- ➔ Research
- ➔ Whitepapers
- ➔ Accredited continuing education
- ➔ Patient Education Materials
- ➔ EHR-friendly dashboard and reporting
- ➔ Decision Support Tools

Nearly 75% of pregnant women want their healthcare providers to use digital platforms for delivering care and education. (Reach 2020)
