

Ewaste Collection, Processing, and Recycling Procedures

1. Collection and Transportation

- a. Scheduled pickup dates and times are coordinated with client partners in advance to ensure efficient retrieval of end-of-life equipment.
- b. Collected materials are transported directly to the Palmetto Pick Up facility, where the sorting process begins.

2. Sorting and Dismantling

- a. Upon arrival at the facility, all materials undergo a systematic sorting process.
- b. Hard disk drives (HDDs) and solid-state drives (SSDs) are removed and separated for further processing.

3. Material Destruction and Recycling

- a. HDDs and SSDs are securely destroyed by drilling holes through the drives to ensure complete data destruction.
- b. All remaining components are transported to certified metal and electronic recycling centers for proper disposal in compliance with environmental regulations.
