To Whom It May Concern:

Our firm has used the appraisal and valuation services of Rick Vimmerstedt in several cases where the fair market value of certain boats or cars was in dispute. In every case, Mr. Vimmerstedt's appraisals were extremely well documented with quality data to support his valuations. This was especially so in a case involving a group of very unique, antique cars and boats, including a WWII vintage PT Boat. The appraisals provided were so well prepared and so thoroughly supported with comprehensive market data that our opposition stipulated to them without a single objection.

Please accept this letter as our highest recommendation of Rick Vimmerstedt when you are in need of a determination of the fair market value of any vehicle or boat. Based on my experience, I would not even consider using anyone else.

Cordially,

Eric A. Lanigan
