Welcome New Members!

[Midwest Groundcovers](#) St. Charles, IL

[City of Westminster](#) Westminster, CO

Plant Select® has over 175 members that includes Garden Centers, Propagators, Landscape Design Professionals, Online Retailers, Seed Companies and over 2,000 followers on Facebook and Instagram!

Plant Select welcomes municipalities to become licensed propagators to plant more plants that conserve water and reduce maintenance.

Korean feather reed grass (*Calamagrostis brachytricha*)

Korean feather reed grass is a great addition to your garden for fall and winter interest. It puts on a show after many other plants have quit for the season. Korean feather reed grass produces large (12") plumes with a pink tinge in August, and matures to a tan color. These plumes can be cut and used in dried arrangements or left standing to glow in winter sunlight and provide seeds for wildlife.
