Red birds in a tree

Plant Select® is happy to offer a Red birds in a tree T-shirt perfect for the holidays! This New Mexico native captures the imagination of gardeners with cherry red flowers perched like red birds above dark green stems and ovate toothed leaves.

Red birds in a tree is a water thrifty perennial growing 24-36" tall and is a well known hummingbird magnet that blooms from May to frost.

Russian Hawthorn
Crataegus ambigu

The fruit of Crataegus ambigu is beloved
by birds in the fall! This small tree also has golden fall color, is deer resistant, is good for pollinators, and thrives with moderate to xeric water needs. This tree will bring year round beauty and interest to landscapes large and small. Plant a single specimen in a small residential yard or weave throughout large landscapes with larger trees and conifers. Pawnee Buttes sand cherry is lovely as a low growing shrub near or under Russian Hawthorn.

Feed the birds with Crataegus ambiguа

Pawnee Buttes sand cherry  
Prunus besseyi 'P011S'

Pawnee Buttes sand cherry thrives on moderate to xeric water conditions and is a rock star in all landscape settings from residential to public spaces to medians. Prunus besseyi's fall color is lovely amid ornamental grasses, evergreens, conifers, and late blooming perennials. Plant it in mass or as a single specimen. PAWNEE BUTTES white spring flowers and lustrous green leaves in summer are lovely as well.
