

#### CLICK TO SEARCH RIGHT PLANT RIGHT PLACE

If you're new to our newsletter, cheers! For 27 years, our nonprofit has tested and selected plants that thrive in the intermountain regions and high plains, so you can create waterwise landscapes that are beautiful, low maintenance and have a positive environmental impact — no matter your skill level.

Plant Select's goal is to create smart plant choices for a new American landscape inspired by the Rocky Mountain region

#### A warm welcome to our newest Plant Select members:

- Star Roses and Plants West Grove, Pa. Network Licensed Propagator
- Pine Lane Nursery Parker, Colo. Grow-to-Retail Licensed Propagator
- Cheyenne Botanic Gardens Cheyenne, Wyo. Local Government and Public Gardens
- The Happy Gardener Fort Collins, Colo. Landscape Professional Member
- Adam Good Individual Ambassador
- Audrey Coffman Individual Ambassador
- Carol Amy Individual Ambassador
- Dale Terasaki Individual Ambassador
- Donald Winkler Individual Ambassador
- Dorry Wilner Individual Ambassador
- Jason Baker Individual Ambassador
- Kristen Hnida Walker Individual Ambassador
- Marilyn Schroeder Individual Ambassador
- Susan Brackett Individual Ambassador
- Travis Sluka Individual Ambassador

Don't wait! Registration ends Tues., Sept. 3

# Denver Daisy dazzles Add this showy *Rudbeckia* to your garden and flowerpots

Would you like a long-blooming, eye-catching *Rudbeckia*? Denver Daisy shines in waterwise gardens, particularly in August. It has large, golden flowers with a deep-red rim encircling a dark brown center.

Denver Daisy was named in honor of the City of Denver's 150th anniversary in 2008. It has parentage from *Rudbeckia hirta*, and it attracts a variety of pollinators.

Treat Denver Daisy as an annual in colder climates and as a tender perennial in warmer climates. It can self sow, offering new plants for the future.

Hardiness zones: 6-9. Clay, loam or gravel soil. Heat and drought tolerant.

# In the garden with Grace Feed hummingbirds and enjoy the show!

Hummingbirds migrate south for the winter, and you can help them get ready for their lengthy trip!

In this short video, Horticulturist **Grace Johnson** of <u>Denver Botanic Gardens</u> <u>Chatfield Farms</u> shares some of her favorite low-water plants for feeding hummingbirds, so you can attract these small-but-mighty birds to your garden, especially in late summer.

Watch Grace's 2-minute video

# Add a splash of color to your late-summer landscapes ...with western hyssops

High temps? Low water? No problem! Western hyssops (*Agastache* sp.) thrive in tough conditions. Their long-blooming flowers attract hummingbirds, hawk moths and bees, and their foliage has a refreshing aroma that helps deter rabbits and deer. Zones 5–9.

<u>SUNSET® hyssop</u> *Agastache rupestris* 

One of the hardier and easier-to-grow hyssops. Soft, gray-green foliage. Pairs beautifully with silver plants. Can be shorter lived (3-5 years), but also can self sow. A David Salman introduction.

<u>SONORAN SUNSET® hyssop</u> *Agastache cana* 'Sinning' PP 13,673

A longer-lived hyssop (5+ years) in the right conditions. Showy, lavender-rose flowers often start blooming before other hyssops. The vibrant green foliage smells faintly like bubble gum.

### **CORONADO®** hyssop

Agastache aurantiaca 'P012S'

Offers brighter orange flowers and greener leaves than SUNSET® hyssop. Very heat and drought tolerant. Looks attractive against black accents.

### **CORONADO® Red hyssop**

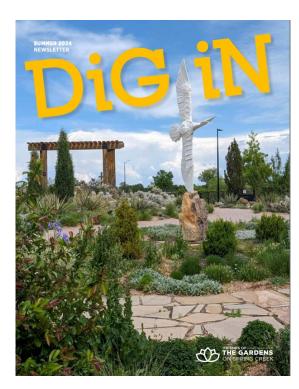

Agastache 'Pstessene'

Has beautiful red and maroon colors that evoke the red rock and sandstone hues that are so common across the West. It's a beauty!

### Hyssop success tips

- Plant hyssops in hot, full sun locations that have porous soils.
- Avoid locations with winter shade and/or sitting snow.
- Wait until spring to cut back old growth to improve winter hardiness.
- Be careful not to overwater. Hyssops like it on the dry side once established.
- Sit back and relax! There's no need to fertilize hyssops or to deadhead flowers.

## Transforming the western plant palette

How does Plant Select test and pick plants? Why does Plant Select have a deep connection with Fort Collins? Explore these topics and more in our article in <u>The Gardens on Spring Creek</u>'s summer magazine.
