In the Garden with Grace

Anthemis marschaliana

Get to know Filigree daisy, an ideal plant for home gardens and local landscapes. Its lacy mat of silver foliage softens and contrasts with other green-leaved plants in the dry-loving garden. While its understated beauty allows other plants to shine, this perennial takes center stage in May and June when a plethora of yellow daisies cheerfully glow for weeks above the silver foliage. See the full effect of this plant at [Chatfield Farms](#) with a fantastic video

Find *Anthemis marschaliana* at a [Plant Select member garden center near you!](#)

Northern Water: Training and outreach classes on water management

Northern Water is a leader in water grants and active water management. Through their Water Efficiency Program, they provide educational opportunities for landscape professionals, those who oversee commercial landscapes, and the general public. These classes and training aim to give attendees a deeper understanding of many topics, including the plant-soil-water relationship, plant water requirements, landscape water budgeting & irrigation management.

Training and Outreach

As Northern Water expands its Water Efficiency Program offerings, we are leveraging resources with other entities to provide educational opportunities for landscape professionals, those who oversee commercial landscapes, and the general public. These classes and training aim to give attendees a deeper understanding of many topics, including the plant-soil-water relationship, plant water requirements, landscape water budgeting and irrigation management, among others. In addition to classes and exams through the Irrigation Association, other special classes are hosted throughout the year.
