From the Denver Zoo to inner-city medians, Plant Select plants have broad appeal in a variety of locations

The City of Denver grows the plants they need in the sizes and quantities they want for their in-house projects by being a Licensed Plant Select Propagator. City of Denver Greenhouse Horticulture Manager, Julie Lehman, can grow plants for the Denver Zoo, parks, gateways, medians, and more! Over twenty miles of medians throughout the city are currently slated for renovation in part with Plant Select plants. In this video, Julie explains the harsh median

environment and how Plant Select plants fill niches in danger zones! Take note next time you hop in your car for a drive, survey the state of your city's medians, and see what's thriving!

Plant Select plants bring beauty & efficiency to the City of Westminster

Shalene Hiller, Horticulturist for the City of Westminster in Colorado, utilizes Plant Select plants in her designs to save water, time on maintenance, and to provide habitat for pollinators and wildlife! The Grand Staircase, Legacy Ridge Golf Course, and two medians at the Municipal Court Building are Westminster destinations that showcase water-wise plants! Visit these locations to see how your city can turn the mundane into magnificent with Plant Select plants!
