

# We are **LOOKING TO RENT** from you

## About Everest!

Everest Ice & Water systems has over 700 units in the USA and internationally. All of our units are individually owned and operated by members of their local community.

Our combination ice and water vending machines sit on just 20 ft<sup>2</sup> (the size of half a parking space) of land. By using the existing power, water, and a simple drain these machines are able to provide fresh filtered water and safe sanitized ice for sale 24/7.

## How it works.

- ✓ The local machine owner will handle all the installation, permitting, and work with you to find a spot on your property to place the machine.
- ✓ The owner will manage the machine, including all necessary maintenance & cleaning
- ✓ You will collect rent every month. There is no cost or investment required from you. You just relax and collect the check!

## Interested?

## Drive Traffic To Your Property

An ice and water vending machine can be a major draw to your business, bringing hundreds of new patrons to the area each and every month. This added foot traffic benefit is huge.

## Add Rental Revenue To Your Operation.

An ice vending machine will often occupy a piece of your property that would otherwise not be rent-able at all. This will allow you to monetize a new piece of your land while simultaneously offering a tremendous service to your local community.
