

Hi folks,
As we are living in interesting times,
I thought it a good time to give you an update
on what we've been doing here at Pop's.

First off, I hope you are not letting the 'goings on' in the news get you down. More than ever it's important

to get outside, go for walks, let the sun shine on you, talk with your friends and family and keep healthy nutrition a priority. There's still enough of summer to take a last minute vacation, something as simple as going camping for a weekend.

My Primary Cobbler Humberto just got back from a fantastic time with his wife in the Grand Canyon. He wouldn't let me post pics in this newsletter because he doesn't want you, the reader to get jealous - he's a caring man, and a great craftsman.

Personally I'm working on my green thumb as usual; I've got some great production this year. One of my

sons is building a **Tilapia Farm** in my backyard. I think he's crazy, but sure enough he's building it.

The idea is to have a self-sustaining fish farm run through PVC pipes all around

the perimeter of my fence in the back yard. He's putting little holes in it so we can use the natural waste from the little fish to fertilize additional plants and crops all around the yard.

It's something else I tell yeah! On to a little business:

We started making masks 6 months ago, and have a full supply in my shop, so if you'd like to add a few to your wardrobe, I think you might be tickled at our

inventory (some funny, some sports related).

Voted among the Best in Ventura County - Shoe Repair - 10-years in a row

We're back on track with regular time frames for servicing sewing machines; we've never had so many come in, which threw us off our quick turnaround, but like I said we're back on track to within a week.

Now listen, whether we're talking wood floors, area rugs, upholstery or carpet, whatever you vacuum it's a good time to take a look at your machine. I've got a couple of *specials going for September* I want you to know about. First off - if your machine is making a funny noise or doesn't smell right, bring it in and we'll let you know the problem. If your vacuum is healthy, chances are it may be a little dirty 'under the hood'.

We offer a *Clean & Sanitize Service* that my customers love. We pull out the roller brush, detach hoses and give it a thorough cleaning. While we have the brush out we administer a robust, thick and effective foaming sanitizer, let it sit for a few moments then go back in and extract what's left of dirt, dust, hair and any pesky microbes. Then we Lysol out each and every hose with the vacuum turned on to get the Lysol to run through the motor and hoses. We'll check the filters to let you know the effectiveness and recommended replacement (if any), pack it all up and get it back in your hands.

Here's the good part, I normally charge \$29.95 as an add-on service to a repair.

I'm going to offer you this service for free, yes, for FREE!

Why you might ask? **One** - because you need it, I think everyone that has a vacuum needs it once or twice a year, and the middle of a worldwide pandemic is as good as time as any. **Two** - because whenever you get tired of the color of your vacuum, chances are you'll at least think of my inventory here at Pop's for your upgrade.

SEBO Vacuums

\$100 Shop Service Credit

for vacuum cleaner service with a purchase of any German made SEBO Vacuum

There are a few other things happening, but I'll wait to tell you when you get here!
Till next month,
Pops
