Short-Term & Long-Term Maintenance Guide!

First 7 Days After Installation:

- Do not wash the vehicle. Allow the coating to fully cure.
- Avoid heavy rain, snow, or pressure washing if possible.

Washing & Cleaning:

- Aim to hand wash only using a soft microfiber mitt and mild soap, avoid harsh chemicals and soaps.
- Rinse thoroughly with low pressure (Below 2000 psi, at least 12 inches away).
- If using an automatic car wash, *touchless* washes are recommended (no brushes).
- Dry with a clean microfiber towel or high pressure air.

Waxing & Protection:

- Ceramic safe toppers & sealants applied as needed.
