

Chinese BTC 比特币

WhitePaper

V1.0

Prologue: The Flame Endures, The Spirit Reborn

THE EVOLUTION AND CHALLENGES OF BITCOIN

Bitcoin was born in 2009 as a revolutionary spark.

It was not an investment tool but a weapon of freedom.

Yet today:

- Regulation and ETFs are trapping Bitcoin in a financial cage.
- Whales and institutions are attempting to hijack its decentralized spirit.
- Ordinary people are being excluded from its core.

Bitcoin is at risk of no longer belonging to the people.

Since its inception in 2009, Bitcoin symbolized rebellion and freedom. Now, regulation and ETFs are integrating it into the financial system, while whales and institutions erode its decentralized ethos. Ordinary people are increasingly sidelined, and Bitcoin faces the risk of losing its connection to the masses.

Thus, we ignite a new flame.

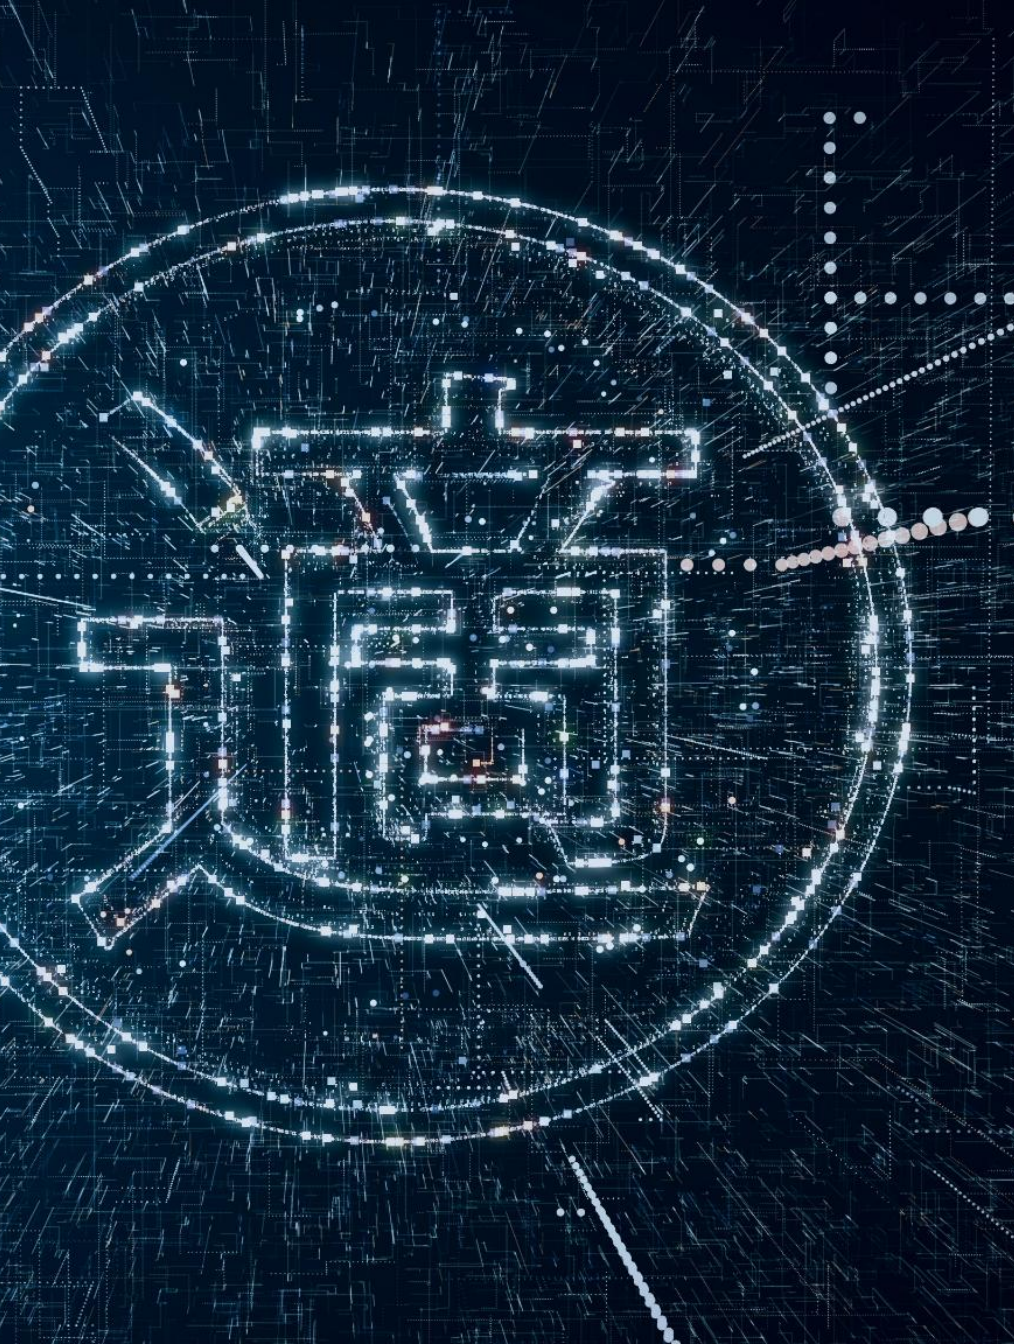

Our mission is to pull Bitcoin back to its original purpose:

- A currency of freedom for every ordinary person.
- A belief untainted by centralized power.

This time, we rewrite Bitcoin in Chinese.

Born in 2009 as a symbol of rebellion and freedom, Bitcoin is losing its decentralized spirit to regulation and institutional influence, with ordinary people excluded. We aim to reignite its original vision, ensuring Bitcoin remains a currency of freedom for all, reimagined in Chinese to preserve its core beliefs.

Project Background & Motivation

CHINESE BITCOIN: CULTURAL SOVEREIGNTY

Chinese-speaking users form a massive portion of the global Web3 community, yet Bitcoin's narrative:

- Is not written in Chinese.
- Is not rooted in our culture.
- Is not driven by our consensus.

We need a vessel to carry our own **Bitcoin Cultural Sovereignty**.

Thus, we create **Chinese Bitcoin** (比特币):

- With a Chinese identity ✓
- With accessible entry for the masses ✓
- With viral meme-driven potential ✓
- With a robust ecosystem foundation ✓

It is not a replacement, but a **spiritual successor**.

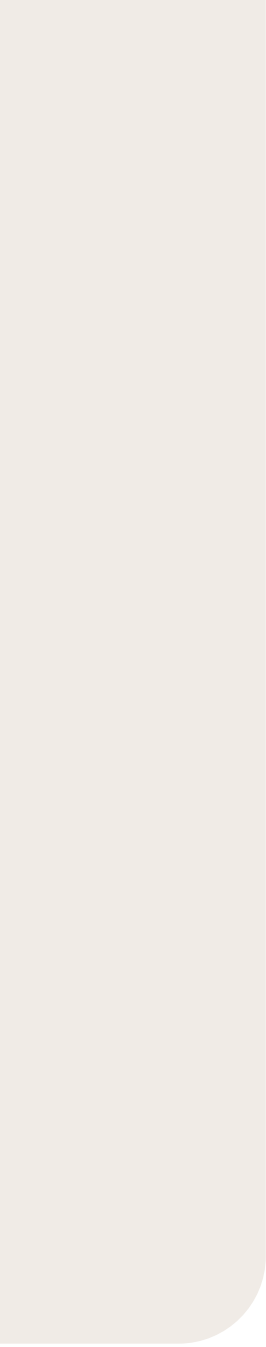

The Chinese-speaking world is a significant part of global Web3, yet Bitcoin's narrative has long been dominated by non-Chinese voices. Chinese Bitcoin (比特币) aims to establish our cultural sovereignty with a Chinese identity, low entry barriers, meme-driven virality, and a thriving ecosystem. This is not a substitute but a spiritual continuation.

Core Value Proposition

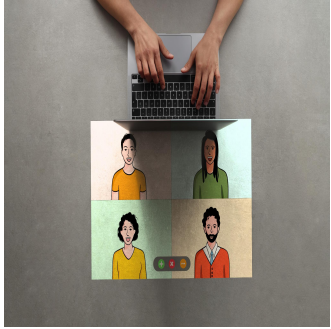

FIVE CORE PRINCIPLES

1. **Decentralization** No single authority governs the system, ensuring equality, censorship resistance, and an open, free spirit.
 2. **Community Sovereignty** Community consensus outweighs team decisions, embodying collective wisdom and democratic governance.
 3. **Cultural Foundation** The currency's value is driven by cultural identity, prioritizing spiritual resonance over traditional financial reliance.
 4. **Accessible to All & Meme-Driven** Lowering barriers so billions can hold the token, with meme-driven virality fueling ecosystem growth.
 5. **One-Line Summary:** This is a Bitcoin cultural revival movement for the Chinese-speaking world.
- **Decentralization:** No single authority, ensuring equality and censorship resistance.
 - **Community Sovereignty:** Community consensus drives decisions over team authority.
 - **Cultural Foundation:** Value is rooted in cultural identity, not traditional finance.
 - **Accessible to All:** Low barriers enable billions to participate.
 - **Meme-Driven Growth:** Viral memes amplify ecosystem expansion.

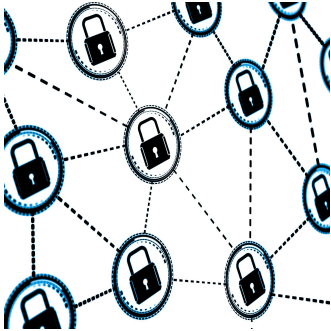

Vision

OUR VISION IS NOT ABOUT “MAKING A QUICK BUCK” BUT ABOUT **RECLAIMING NARRATIVE POWER**:

Cultural Innovation

Chinese becomes a powerful meme engine in Web3, sparking community engagement, continuous innovation, and multicultural integration.

Financial Empowerment

Web3 enables everyone to control their own value, achieving inclusive finance and equitable rights, advancing democratization.

Civilizational Progress

Decentralized principles become the new societal norm, fostering fairness, transparency, and structural progress toward a new civilizational model

💥 **Cultural Layer:** Chinese as Web3's strongest meme engine, driving community interaction and innovation.

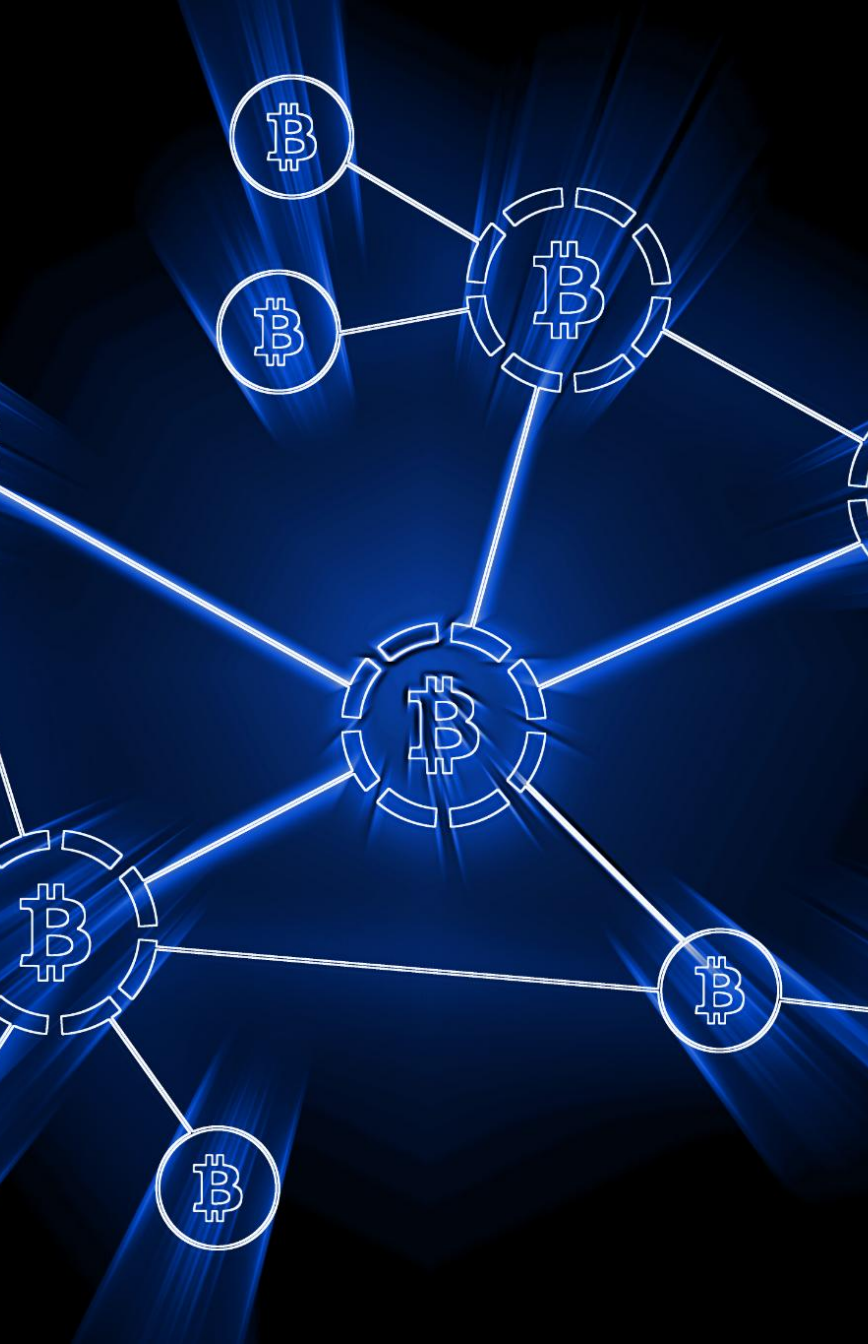

🔥 **Financial Layer:** Empowering ordinary people to control their value, achieving financial democratization.

🌐 **Civilizational Layer:** Decentralization as the next societal norm, promoting fairness, transparency, and structural progress.

Ultimate Goal:

1 Chinese Bitcoin 比特币 = 1 Bitcoin (Original)

Technical Foundation: Why BNB Chain?

CORE ADVANTAGES OF BNB CHAIN

Ultra-Low Fees

BNB Chain offers minimal transaction fees, lowering barriers and encouraging broader participation in the blockchain ecosystem.

Widespread Community Influence

BNB Chain boasts a large, active community, with significant influence in Asia and the Chinese-speaking world.

Rich Application Ecosystem

Supports diverse scenarios like prediction markets, social platforms, and trading, meeting varied user needs and driving innovation.

Powerful Meme Virality

A vibrant meme culture fosters organic spread and strong visibility, helping projects gain rapid attention.

BNB Chain's ultra-low fees ensure accessibility for all users. Its extensive community, particularly in Asia and Chinese-speaking regions, drives influence. The ecosystem supports diverse applications, from prediction markets to social and trading platforms. Its vibrant meme culture ensures powerful, organic virality.

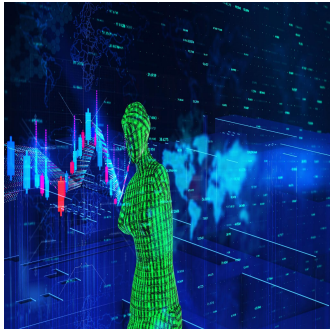

Chinese Bitcoin Ecosystem

CORE MODULES & USER VALUE

Diverse Core Modules

The project includes six modules: Prediction Market, Perpetual Contracts, Staking Hub, Lottery Arena, Charity Protocol, and MemeDAO, offering rich functionality.

Varied User Experiences

Prediction markets enable betting on beliefs, while the staking hub offers risk-free returns, enhancing user engagement and satisfaction.

Token Value Enhancement

Mechanisms like fee burning, token lockups, and brand empowerment continuously strengthen token value and ecosystem growth.

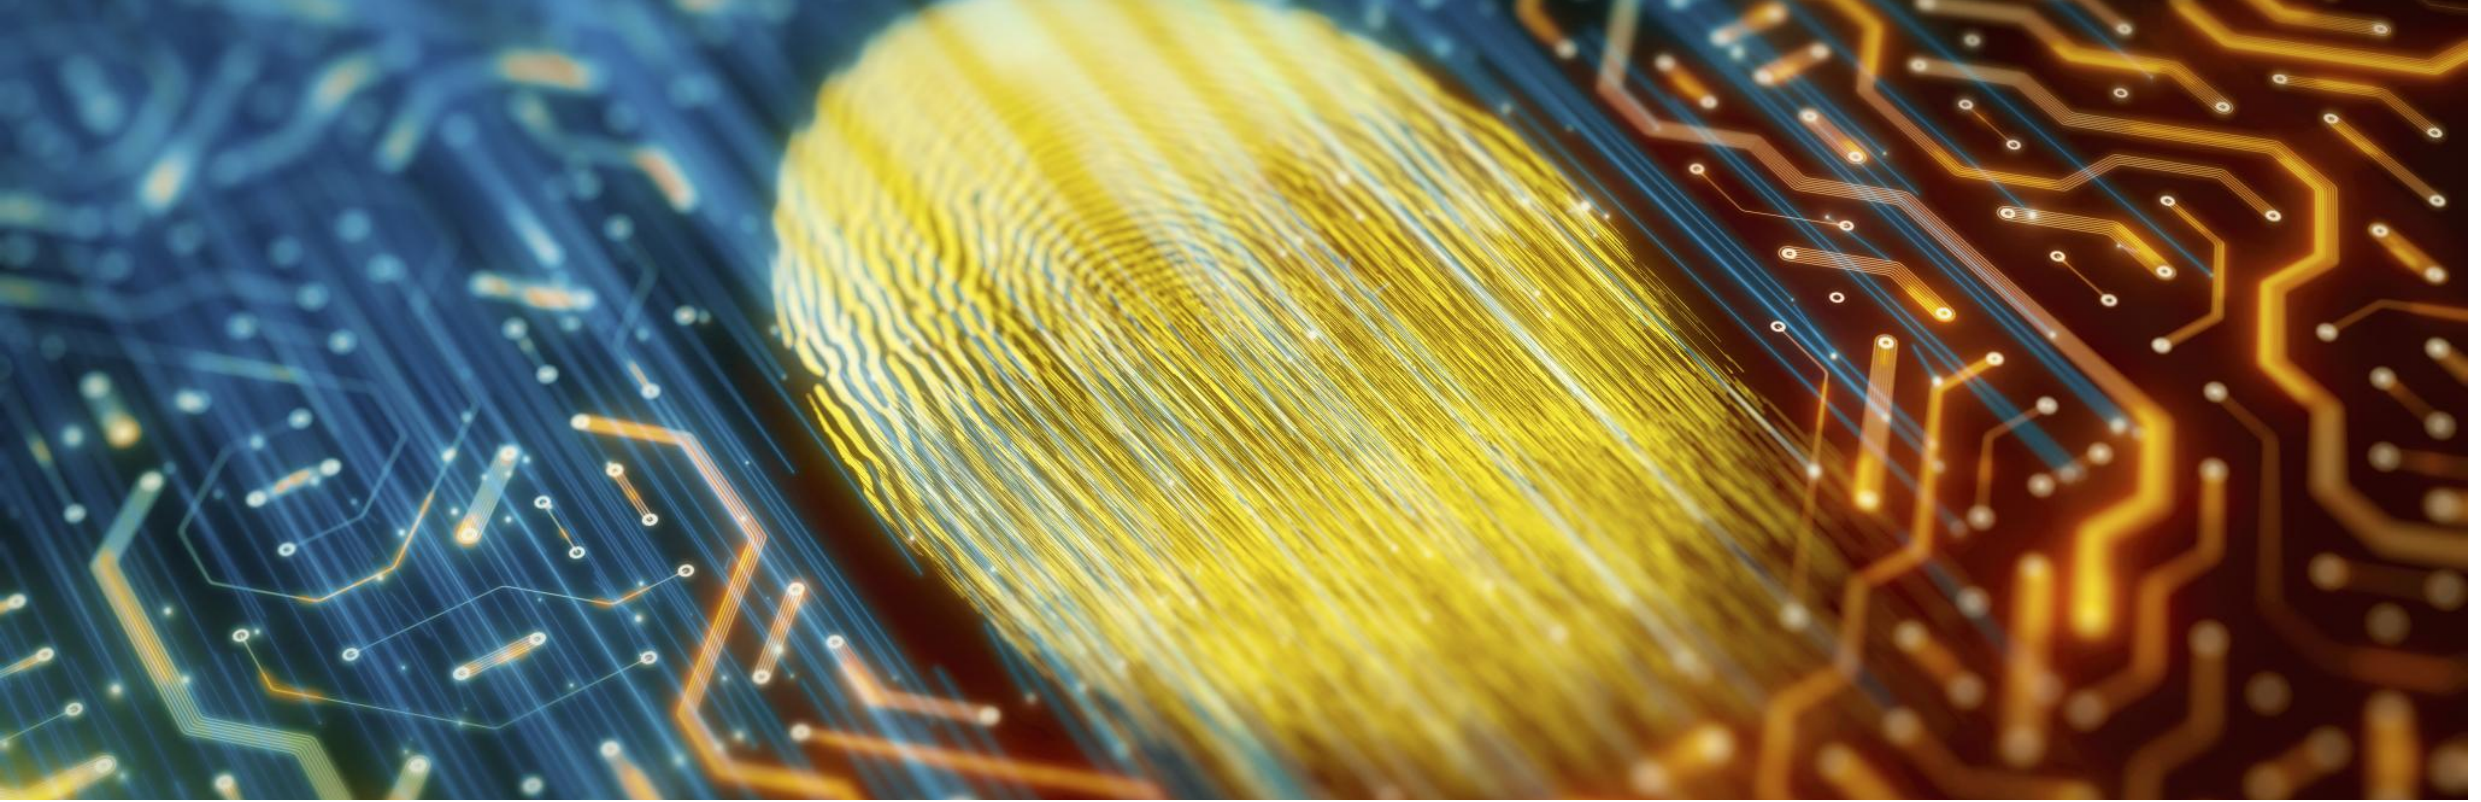

The ecosystem includes Prediction Market, Perpetual Contracts, Staking Hub, Lottery Arena, Charity Protocol, and MemeDAO. Launched modules like prediction markets and staking hubs provide betting on beliefs and risk-free returns. Fee burning, lockups, and brand empowerment drive token value and ecosystem growth.

THE ECOSYSTEM IS NOT A VISION—IT'S A REALITY!

We're not building a speculative tool but a unified system of **Token Rights + Cultural Rights + Utility Rights**.

Our goal transcends speculation, creating a unified system of Token Rights (value circulation and storage), Cultural Rights (community identity and belonging), and Utility Rights (practical applications for ecosystem prosperity). Together, they ensure sustainable development.

Tokenomics

CHINESE BITCOIN TOKEN DETAILS

1. **Token Basics** Token Name: Chinese Bitcoin Ticker: 比特币 Decimal Precision: 18 digits for precise trading and record-keeping.
2. **Total Supply & Scarcity** Fixed supply of 1 billion tokens, with no further issuance, ensuring scarcity and long-term value.
3. **Security & Transparency** Adheres to the BEP-20 standard, with a publicly disclosed contract address for asset security and transparency.

Token Name: Chinese Bitcoin; Ticker: 比特币; 18-digit precision. Fixed 1 billion token supply, no further issuance, ensuring scarcity. Built on BEP-20 standard with a transparent contract address (0x0a37b75fde0f3845bba4221decaa1b8969834444) for security and trust.

Community Governance (MemeDAO)

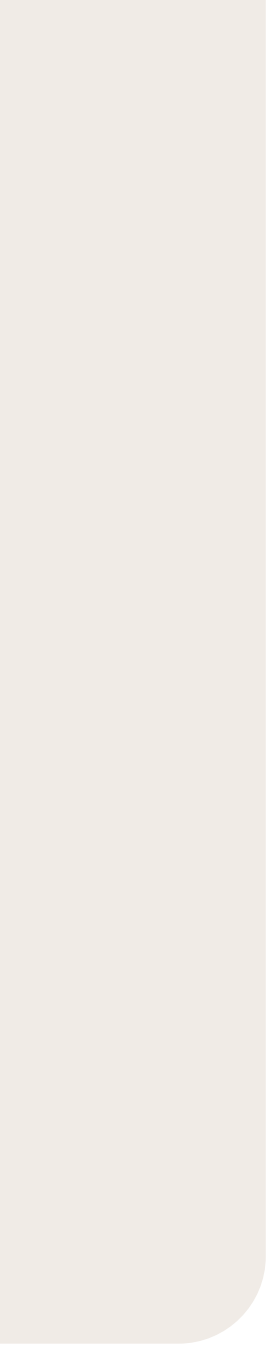

FOUR CORE GOVERNANCE FUNCTIONS

1. **Proposal System for Engagement** Token holders can submit project upgrades or funding proposals, fostering active community participation.
2. **Dynamic Voting Weights** Voting power adjusts dynamically based on staking and contribution points, ensuring fair and balanced decision-making.
3. **Guardian Mechanism Against Interference** Community safeguards prevent whales and centralized forces from disrupting governance, preserving fairness.
4. **Transparent Charity** Charitable funds are fully traceable on-chain, enhancing community trust and credibility.

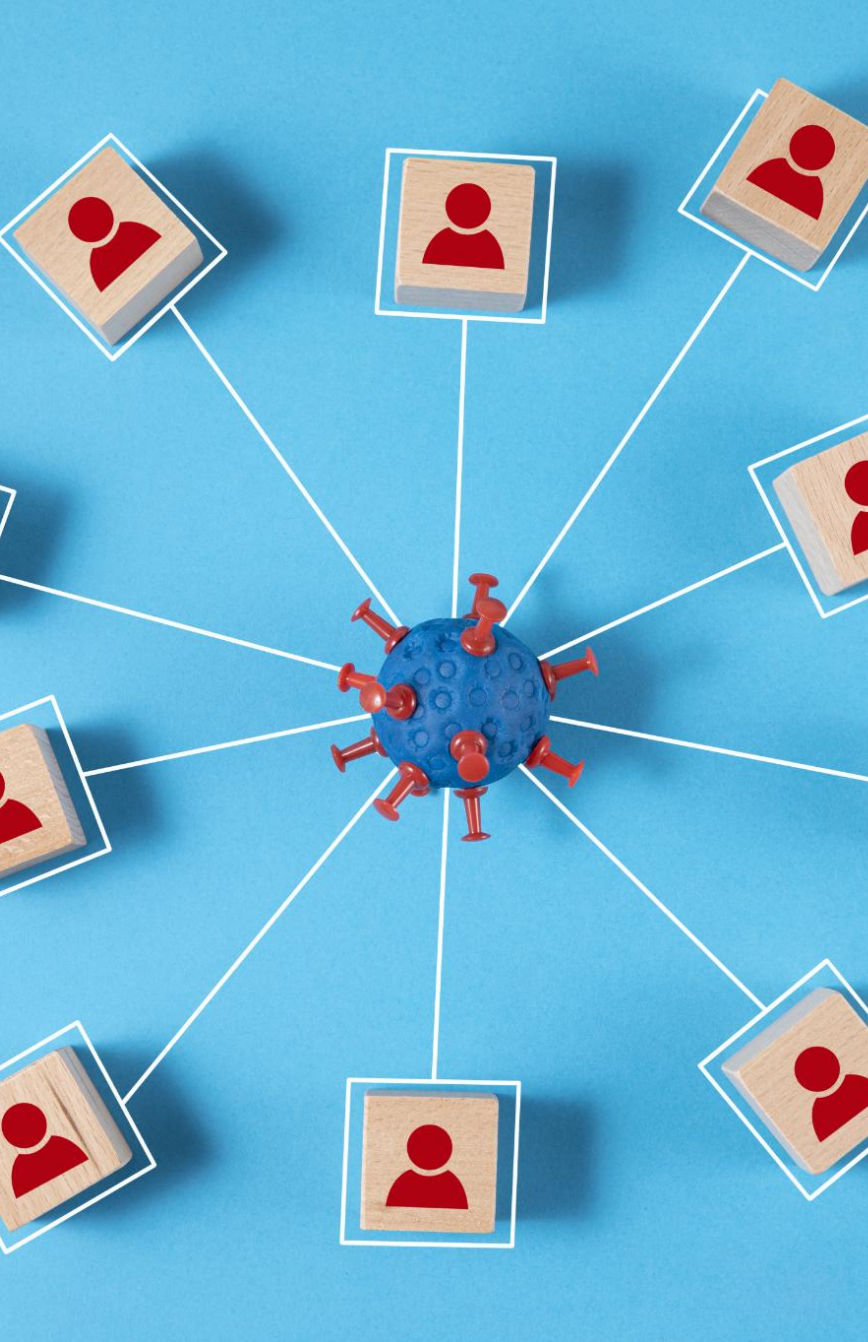

Governance Slogan:

No kings, only the chain and the people.

The proposal system empowers token holders to suggest upgrades or funding uses, boosting engagement. Voting weights adjust based on staking and contributions for fair decisions. Guardian mechanisms protect against whale or centralized interference. Transparent, on-chain charity funds build trust and credibility.

Community Growth Mechanisms

PROMOTION AS A MOVEMENT, NOT ADS

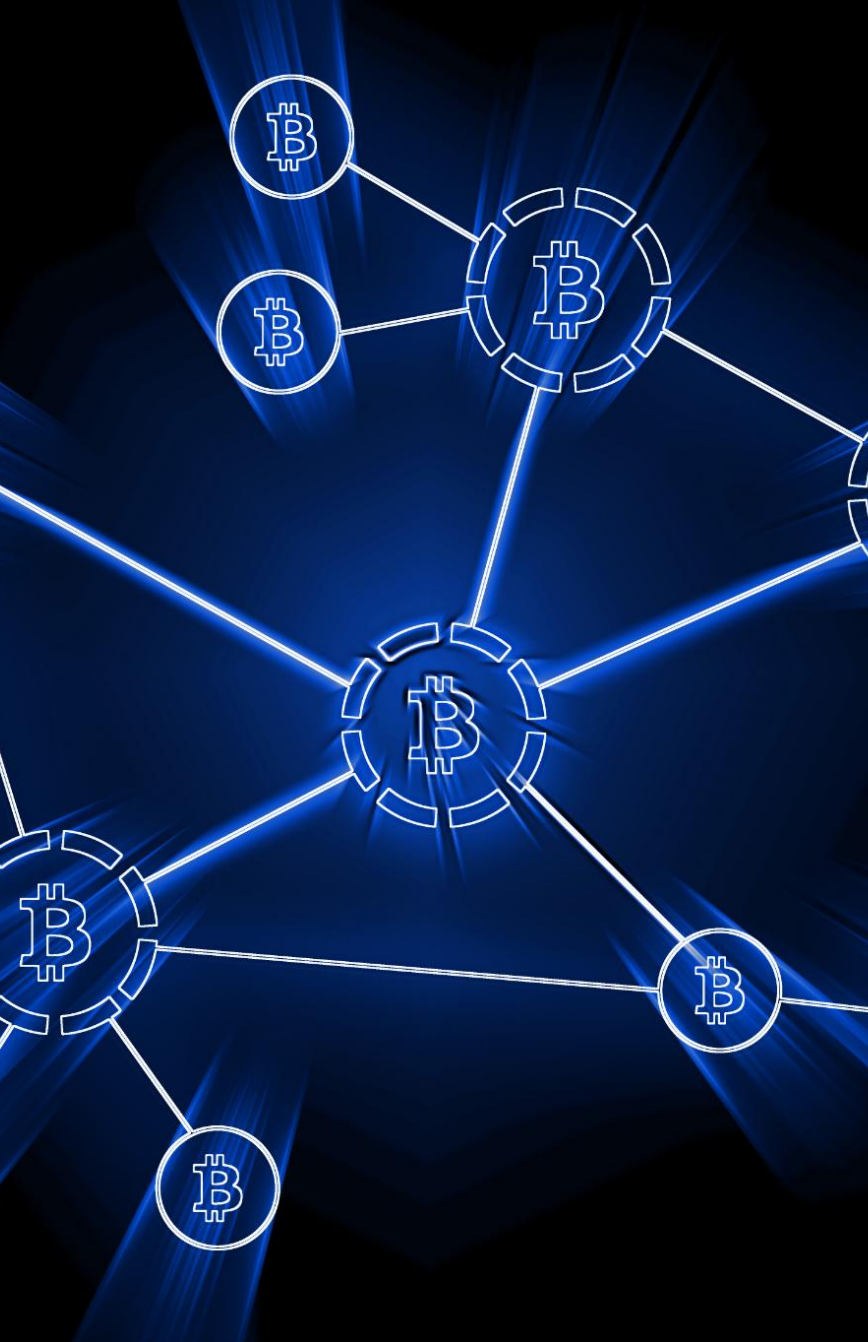

1. **Meme Campaigns for Engagement** Meme campaigns encourage community-driven content sharing, amplifying participation and reach.
2. **Challenge Activities for Interaction** Challenges, predictions, and lotteries attract users, boosting community activity and engagement.
3. **Task Mining for Viral Growth** Invite-based task mining drives exponential user growth and expands influence.
4. **Partnerships for Impact** Collaborations with Chinese-speaking KOLs, DAOs, and guilds enhance promotion and amplify reach.

Outcome:

Community-driven → Content explosion → New user influx → Token value growth → Stronger outreach → Stable ecosystem → Repeating flywheel.

Promotion is a movement, not just ads. Meme campaigns drive community content sharing. Challenges, predictions, and lotteries engage users. Task mining via invites fuels viral growth. Periodic airdrops amplify momentum. Partnerships with Chinese-speaking KOLs, DAOs, and guilds boost influence.

Roadmap

Phase	Timeline	Goals
Phase 0	✅ Completed	On-chain deployment, website launch, initial promotion
Phase 1	Near-term	Airdrop campaigns, market ignition, community governance rules announced
Phase 2	Q4 2025	Full launch of Prediction & Staking, activation of deflationary burn mechanism
Phase 3	Q1-Q2 2026	Perpetual Contracts launch, cross-chain discussions begin
Phase 4	Q3 2026	MemeDAO achieves full autonomy, cultural sovereignty established
Phase 5	Long-term	1 Chinese Bitcoin 比特币 = 1 Bitcoin (Original) identity equivalence achieved

The vision is not a story—it's a mission.

Risk Statement

CHALLENGES OF A DECENTRALIZED EXPERIMENT

Decentralized experiments are inherently uncertain, with volatile token prices requiring cautious investment. Community governance demands ongoing effort to maintain consensus. Participation is voluntary and requires careful thought. As stated, only those who dare to bet on the future will shape it.

High Uncertainty & Risk

Decentralized experiments carry inherent uncertainty, with volatile token prices. Participants must be prepared and bear risks.

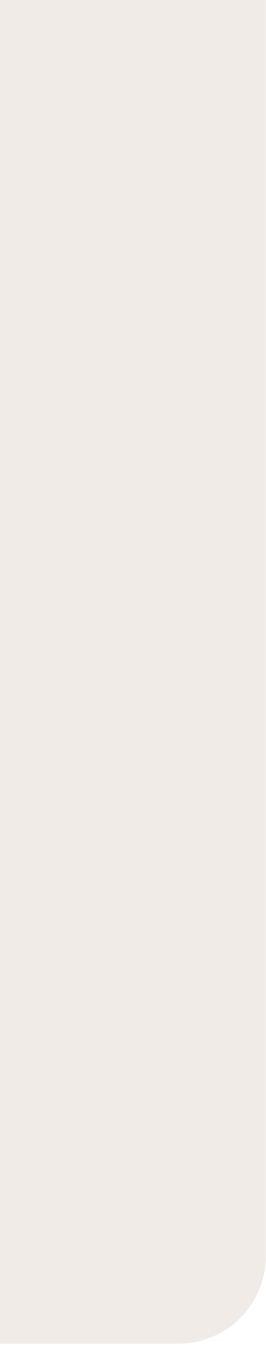

Community Governance Challenges

Building and maintaining community consensus requires sustained effort and collaboration.

Voluntary & Considered Participation

All participation is voluntary and requires careful consideration. Only those daring to embrace the future will succeed.

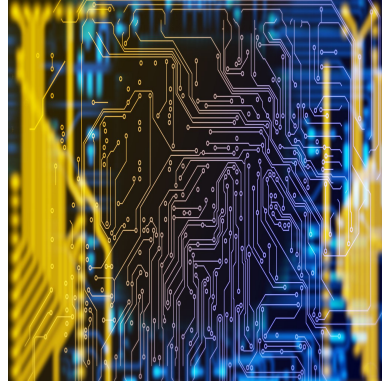

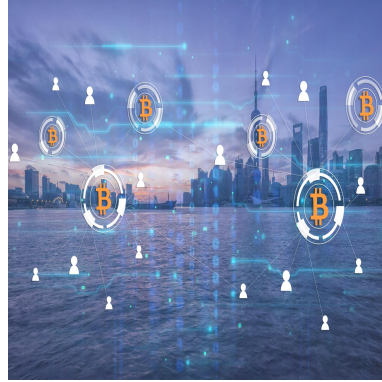

Conclusion: Our Manifesto

BITCOIN: A COMMUNITY REVIVAL

THIS IS BITCOIN MADE IN CHINESE OWNED BY COMMUNITY

We stand with code and people, not financial elites. We reject imitation for innovation. Chinese Bitcoin is community-owned, leading digital finance with passion.

Community Power

Bitcoin belongs to the community, driven by passionate users advancing digital finance.

Innovation Over Imitation

We reject copying and lead digital finance's revival.

Code & People United

We stand with code and people, driving technological and financial change.
