

Fire Prevention and Protection for Your Home

Evacuation Doesn't Have to Mean Uncertainty

Wildfire risk is growing, and homeowners deserve more than last-minute emergency response. CitroSafe™ Systems put real protection in your hands with a safe, science-validated fire inhibitor applied directly around the home—creating a long-lasting protective buffer that helps stop ignition before flames reach your property.

CitroSafe™ is a self-contained remotely activated sprinkler system.

Each system is equipped with a tank of our patented, EPA Safer Choice recognized CitroTech solution for targeted defense of your home. This proactive protection stays in place until it's physically washed away, giving families time, confidence, and control during critical moments.

Unlike other legacy solutions, CitroSafe™ is:

- ✓ Affordable and safe for families and pets
- ✓ Independent of municipal or pool water supply
- ✓ Ready to deploy in minutes
- ✓ Easy to apply, with no mixing or agitation required
- ✓ Operational during power outages
- ✓ Trusted at every level, from the EPA to local firefighters

Protection That Stays When You Have to Go

When minutes matter, your priority is safety. CitroSafe™ Systems are built to defend your home, even when you're not there. Evacuate safely, deploy your system, and create a defensible space that stops fire before it reaches your home.

Why homeowners choose CitroTech:

- ✓ Targets precise coverage of vegetation around the home
- ✓ Creates a non-toxic fire break perimeter
- ✓ Helps block ember ignition, the leading cause of home loss during wildfire
- ✓ Customizes sprinkler placement based on property risk
- ✓ Adds defensible space without a complete moonscape
- ✓ Delivers reliable, repeatable protection during wildfire events
- ✓ Fills the gaps where limited insurance coverage falls short
- ✓ Helps protect where insurance coverage may fall short
- ✓ Works for months, washing away naturally when it's no longer needed

“

The more I learned about CitroTech, the more I liked it. I've used other products, but they all have chemicals that can cause health risks. I have a CitroSafe™ system on my house at Tahoe and I've never felt safer.

How CitroSafe™ Systems Protect Your Property

CitroSafe™ quickly creates defensible space by treating vegetation and surfaces around your home with CitroTech's clear, ready-to-use fire inhibitor.

The system delivers ground-applied coverage through strategically placed sprinkler heads in two customizable configurations. We target the areas where your home is most vulnerable, protecting ignition points and helping slow fire spread.

Roof Mounted Defense System

Perimeter Defense System

For new home builds and even stronger resilience, the CitroSafe™ system can be paired with CitroTech treated lumber as part of a two-step protection plan.

Fire Defense in 4 Simple Steps

1

Free Quote & Assessment

Tell us about your property and we'll create a detailed preliminary quote at no cost.

2

Professional Site Evaluation

One of our certified professionals visits your property to assess risk and design the best protection plan.

3

Installation Scheduling

Choose an installation date that works with your schedule and minimizes disruption.

4

Expert Installation & Activation

Our highly trained crews complete installation and system activation in 1-3 days, depending on property size.

CitroTech

CitroTech is ushering in the next chapter of wildfire protection with our breakthrough family of fire prevention solutions. Stop wildfires before they start with the first and only EPA-recognized fire inhibitor on the market.
