

Summer is almost here!

As summer approaches and allergy season peaks, we all want higher defenses to make the most of the season. It's time to get summer ready by staying healthy and strong with higher-dose Vitamin C IV drips.

Vitamin C is a non-specific anti-viral and a powerful antioxidant. What's even better is that the vitamin is completely safe for the body, even in large amounts.

Did you know?

Liquivida® IVs contain 15,000mg of Vitamin C. Experience these Vitamin C benefits with an IV infusion:

- 1. Boost Your Immune System:** Fight flu-like viruses with Vitamin C. Vitamin C neutralizes free radicals and can slow down virus replication. Our unique formula offers 15 grams of Vitamin C, which is 15-20 times the typical dose.
- 2. Collagen Production Maintenance:** Vitamin C plays a crucial role in maintaining collagen throughout the body. Intravenous Vitamin C is an effective way to ensure stable collagen levels and may help prevent cardiovascular disease.
- 3. Antihistamine Properties:** Vitamin C has demonstrated a general antihistaminic effect and reduces overall bronchial responsiveness, helping to lessen allergy symptoms.
- 4. Anti-inflammatory Properties:** Vitamin C is well-known for its natural ability to reduce inflammation and can help alleviate pain caused by inflammation.

Which Liquivida® IV Drip should I choose?

- Liquilift®:** Replenishes vital nutrients to your brain and essential organs, enhancing clarity and focus—an essential boost for everyone's cognitive well-being.
- Performance Hydration:** Delivers a potent blend of essential micronutrients to fuel your body before and after pushing it to its limits.
- The Vitamin C Drip:** Boosts immune function with a higher dose of Vitamin C.
- Natural Defense:** An immune-boosting IV Cocktail with B vitamins and minerals.
- The Fountain of Youth:** This IV Drip contains 10 different nutrients and a high dose of Vitamin C, as well as glutathione, your body's master antioxidant.
