

Wedding Day : Bride & Groom Questionnaire

1. Make sure there is natural light in the room where the bride will be getting ready (window light). This makes a WORLD of difference in your images! I promise!
2. If possible, try to have all bridal details together before the photographer arrives. (Dress, jewelry, shoes, bouquet, garter, veil, etc) This will make the detail shots more efficient!
3. Keep the area near the window free of trash, bags, snacks, etc. This will be where the bride will be putting on her dress!
4. Allow more time than you think you need to get ready! It's better to be safe than RUSHED!
5. Relax and have fun! You're getting MARRIED!!

Any concerns :

FAMILY FORMALS:

Family formals do not have to take over 20 minutes. However, this is only possible if we are organized beforehand . If you have a very large family and more than 10 group photos, I suggest saving some of the extended family shots until the reception so that family portrait time will not interfere or will not keep your guests waiting at the reception. Please inform me of any family members that may not get along and/or may not want to be grouped with a certain other family members so that we can avoid awkward interactions during family formals. Thank you!!

Q. Are there any divorces or separations that I should be aware of during family formals?
