

6-WAY POWER CONSOLE

Incorporating a 1.5" tubular frame and a 1 1/4" tubed handle kick bar, the 6-way power console is fully welded, ground down, polished, and then powder coated black. The front and back panels of the machine are made of 14 gauge steel, while the side and roof panels are made from 16 gauge steel. Beneath the lid is a removable support system to prevent the lid from bending, and to also support a recorder.

6-WAY WITH RAMP:

Includes (6) 3216 ramp controllers, (1) Circuit Breaker, (6) Albright contactors, (6) heater on lights, (3) thermocouple locations per circuit, (1) 6-inch instrument cooling fan, (2) 120-volt power outlets, (1) ammeter & 6-position switch console which will be pre-wired & tested.

FULLY-AUTOMATIC:

Includes (1) 3216 master and (5) 3216 slave controllers.
