

## E-GLASS NEEDEDLED MAT

Our e-glass Neededled Mat is a uniform blanket that is ideal for the internals of an insulation pad. This particular neededled mat is an effective, low-cost replacement for many standard insulation materials that are also very durable and will not tear apart like other insulation. We carry our e-glass neededled mat in two sizes: 1/2-inch thick (TTT-ENM-12) and 1-inch thick (TTT-ENM-25).

### ADVANTAGES:

The unique properties of e-glass neededled mat make it an effective low-cost replacement for asbestos mats, millboard, ceramic or refractory paper, mat, and sheets, and mineral boards.
