EASY-HEAT INDUCTION TUNNEL

With the ability to endure temperatures reaching 1200°F and accommodate a wide range of pipe diameters within a single tool, our innovative Easy-Heat Induction Tunnel is the ultimate solution for tasks such as expansion heating, epoxy coating on pipelines, and paint-curing applications. Simply position the Easy-Heat Tunnel at the end of your pipe or workpiece with our versatile adjustable lifting cart, efficiently conduct the heat treatment process, and then effortlessly roll away to continue your operations. Additionally, the base is designed to accommodate multiple heating “cartridges” with varying inside diameters, enhancing coupling for smaller diameter parts.

KEY FEATURES:

- Quick Installation & Easy to Use
- One Tool for Multiple Diameters
- Easily Transported & Stored
