

INDUCTION CLAMPS

All of our induction heat clamps are custom built and can be fixed and adjusted to best suit your application. Ideally, induction heat clamps are suited for large diameter rotation when using submerged arc or manual metal arc but are also suited to small diameters

KEY FEATURES:

- Faster set up time
- Faster temperature readings compared to gas
- Fully controllable
- Uniform heating
- Can be digitally recorded
- Fast return on investment
- No hydrogen created
- Low running costs
