

INDUCTION OVENS

Our unique manufacturing method of induction ovens allows for a uniform preheat and stress relief of materials that you don't see in other ovens. This is especially beneficial for some metals, such as aluminum or stainless steel parts, that cannot be heat treated through direct induction. All of our induction ovens are portable units that can be moved easily and conveniently to the parts being preheated or stress relieved.

KEY FEATURES:

- Quick heat-up times
- Allows for pre-heat up to 1200°F
- Convenient preheat and stress relief
- Durable steel liner
- Controlled cool downtimes
- No fumes or venting
- No open flames
- Cost-effective
- Increased staff safety
- Custom made for your application
- Powered by ProHeat 35
