### APPLICATION INFORMATION

(Please include as much information as possible to better help us create an accurate estimate)

Which Thermal Tech & Temp, Inc. specialty application interests you?	
Which heating processes are you currently using?	
What part/parts are you heating?	
What is the material of the part? <i>(i.e., carbon steel, stainless steel, etc....)</i>	
What are the part dimensions and material thickness? Is there any complex geometry?	
Is the part to be heated moving (i.e., rotating) or in a fixed position?	
If the part is rotating, what are the rotation dimensions?	
What temperature rating is required for your part?	
Which heating process needs to be performed?	
If using induction, do you currently have access to a ProHeat?	
Will you need a time/temperature digital recorder?
