

# STUDENT TESTIMONIAL

CURRICULUM: AIRCRAFT DISPATCH CERTIFICATION

SCHOOL: GLOBAL AVIATION TRAINING ACADEMY

Coming from no prior experience in Aviation, I honestly did not know what to expect for this course. I was directed to Aircraft Dispatching by a friend, who happens to be a Certified Flight Instructor. For weeks, I reviewed GATA's website and Facebook page to learn what the course offered and what I could contribute to this course. Needless to say, I sent a long email with dozens of questions inquiring more about the aircraft dispatching course to gain insight - the reply would've been the determining factor if I would be committing to the class or pondering again. I received a phone call the very next day that lasted about an hour - Glenn was extremely enthusiastic and passionate about Aviation in general - although the phone call was about an hour long, I knew he could speak for several more if time allowed. Glenn was able to provide more information on the breakdown of the course, including weighing the option between a full time or part time student. Soon enough, I registered myself as a part-time student at GATA. Throughout the ADX course at GATA, I had the pleasure of being taught by several instructors - who all have had different experiences in aviation, yet all love aviation - I have never met people more passionate about their career. This was relieving to know and see - all the instructors were equally enthusiastic about teaching as they were flying - each instructor was extremely knowledgeable and excited to share their knowledge and experience. I felt confident that I would be well prepared to understand the course material and successfully complete the course.
