

# Thunder storms

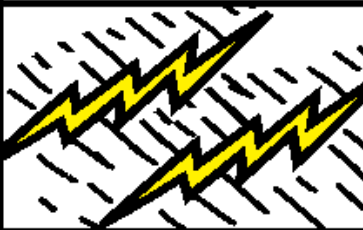

www.AffinityConsulting.info

Thunder storms happen in the sky.

They do not happen near me.

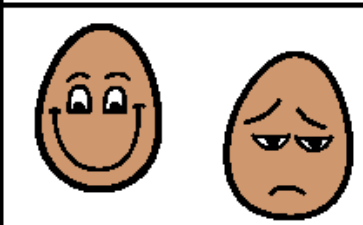

Lightening is very bright. Sometimes there is one flash.

Sometimes there are a lot of flashes.

Thunder can be loud.

Sometimes it shakes the air or the house.

Some people like the sounds and the flashes.

Some people do not like the sounds and the flashes.

It is okay to like it and it's okay to not like it.

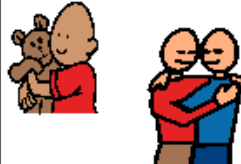

There are things to do when a thunder storm comes.

know that I am safe

use headphones

get a hug

keep busy

count the flashes

use weighted blanket

use talking voice

listen to music

sing a song
