Puppy Care

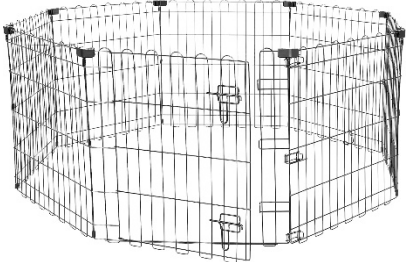

Please find a list of all the products recommended for caring for and maintaining your sweet new puppy.

<p>Royal Canin Dog Food</p> 	<p>We feed all puppies Royal Canin puppy food. You can choose to purchase either the regular Royal Canin Small Puppy or the Royal Canin Cavalier King Charles puppy.</p>
<p>Potty Training</p> 	<p>Your puppy has been practicing going potty on grass pads and outside. If you do not have a private area to potty your pup until they receive all vaccinations, you are encouraged to potty inside. Please remember, DO NOT take your pup in areas with other dogs until they are fully vaccinated.</p> <p>Click on any link below for more info</p> <p>Chewy</p> <p>Petco</p> <p>Amazon</p>

<p>Kennel Training</p> 	<p>Your puppy has been housed in an open-top pen and is used to being inside a kennel. You may choose to continue to kennel train your pup. Be sure to choose a kennel big enough for sleeping but not for potty time. You can attach a separate playpen area that includes the indoor turf for potty time while awaiting full vaccination and for exercise time.</p>
<p>Puppy Pen</p> 	<p>We recommend buying a puppy pen to attach to the kennel. That way, your pup has a safe space to potty, play, and eat their food for the moments you can't be with them. We recommend taking them outside to potty each time you remove them from the pen.</p>
<p>Flea & Tick Control</p> 	<p>Your puppy may be started on a one-month supply of Brevecto to control fleas & ticks before leaving my home. Puppies must be at least 4.4lbs before we can administer. If the litter is under this weight, we will leave it up to you to decide tick treatment with your vet. You should keep your pup on flea & tick control year-round, even if your pup is inside most of the time. Did you know we can bring fleas in on our shoes and clothing? If you live in a wooded area and have wild animals in your yard, Brevecto also protects against the spread of Sarcoptic Mange.</p>
<p>Heartworm Prevention</p>	<p>Your puppy has been started on a one-month supply of heartworm prevention.</p>
<p>Pup Comfort</p> 	<p>Your puppy will go home with a Snuggle Puppy surrounded by the scents of its littermates. Your pup has already been using this pup, which will give it comfort away from home, especially the first several nights. You can learn more about what the Snuggle Puppy can offer and order additional supplies here: https://snugglepuppy.com/products/snuggle-puppy</p>

Puppy Food

You will be sent home with a starter bag of Royal Canin puppy food. You can order this food directly from Petco or Chewy. May not be available in all Petco stores.

Chewy: <https://www.chewy.com/royal-canin-breed-health->

Potty Training

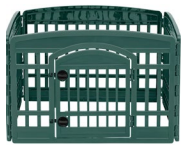

Your puppy has been practicing going potty on grass. If you do not have a private area to potty your pup until they receive all vaccinations, you are encouraged to potty inside. Please remember **DO NOT** take your pup in areas where there are other dogs until they are fully vaccinated.

Chewy: <https://www.chewy.com/coziwow-by-jaxpety-indoor-grass/dp/359606>

Petco:

Your puppy will go home with a Snuggle Puppy surrounded with the scents of its littermates. Your pup has already been use to this pup and it will give it comfort away from home, especially the first several nights. You can learn more about what the Snuggle Puppy can offer

Puppy Training

If you purchased your puppy using Good Dog, you should consider accessing the puppy training course found here:

<https://www.gooddog.com/puppy-training-program>

Cavalier King Charles, although cute, cuddly and smart, are known to stubborn and will need proper training. Consistency is key and lots of treats!!!!

Welcome To Good Dog's Puppy Training Program

Flea & Tick Control

Your puppy will be started on a one month supply of Bravecto for the control of fleas & ticks prior to leaving my home. You should keep your pup on flea & tick control all year round even if your pup is inside most of the time. Did you know we can bring fleas in on our shoes and clothing? If you live in a wooded area and have wild animals through your yard, Bravecto also protects against the spread of Sarcoptic Mange. Yeah, we had this once, you DO NOT want it. It is spread by your puppy sniffing the poop of wild animals like a fox. It is horrible for your puppy and you can get it to.

Parasite Control

We use Interceptor Plus to control a broad range of parasites including; the prevention of heartworm disease, controls adult roundworms, adult hookworms, adult whipworms, and adult tapeworms.

Your puppy has also received a regimen of de-worming while in my care including;

Pyrantel at: Weeks 2,4,6 & 8

Panacur at: Days 2-4, 18-20

Veterinary Follow-Up Care

The Country Beehouse, LLC

386 Dudley Rd.

Alton, NH 03809

(603) 470-6215

www.thecountrybeehouse.com

All pups are scheduled to receive a veteran health check up prior to departure. This is to ensure your puppy is free from parasites and other conditions that would prevent them from leaving my home and guaranteeing a healthy delivery to you.

Should anything arise during this visit, you will be notified by me as soon as possible to discuss the outcome and pickup arrangements changes.

You should schedule a visit your chosen vet as soon as possible to ensure the health of your pup and to set up a vaccination schedule for future medications prescriptions such as Interceptor, Brevecto, etc.

Future Support

Please know that I am always here to support you and your growing puppy. Should you have any questions or concerns for the life of your puppy, you are always welcome to reach out. We always want to know how you and your new pup are doing and pictures are appreciated.

Text me anytime day or night!!! (603) 470-6215
