Madeira Entrance

Unauthorized repairs to the Madeira entrance sign were made by a third party subcontractor, creating a bigger issue than we began with. We are actively working with the primary contractor to address and resolve the damage.

Meanwhile, the obsolete traffic light poles that cluttered the area have been fully removed – progress that we're happy to see.

Hurricane Season Prep

Hurricane season officially starts on June 1 and runs through November. That means that the time to prepare, make a plan and be alert is now.

'Florida Health' has already provided some updated information around hurricane and severe weather procedures for our state, including help lines and important websites which can be found here: <https://bit.ly/hurricane2025>

After 2024's Hurricane Helene - the deadliest to hit the U.S. mainland since Katrina in 2005 - Sen. Scott and meteorologist Jim Cantore recently teamed up to urge Florida's residents to prepare today.

Their address highlights making evacuation plans, supply checklists as well as clearing yard debris early. You can view the full address here: <https://bit.ly/scott-cantore>

Rio Pinar Flooding Project Update

A contractor has been secured to begin the next phase of drainage improvements approved by the county and stormwater management.

Work is expected to begin within the next few weeks and we will keep you updated on their progress as things are completed.

The county is also planning to reconnect the canal to the wetland on the west side using in-house crews – a move designed to further drain excess water the way the canal did many years ago.

While it's taken time, we're finally seeing progress ahead of this year's hurricane season.
