Artists Statement

Nature has always entranced me and so I love to capture it as best I can as it brings me closer to it: Landscapes, flowers, human form, animals, etc. The colors and shapes are a challenge and exciting to recreate along with my feelings about them.

Art Nouveau is also an inspiration for me with its flowing lines and natural subjects.

I am interested in making functional objects and have made a series of urns with lids as a vessel. Also have made plaques in relief for hanging and a dance series.

More recently I am doing Figurative sculptures with live models.

I started life in New York where I was a painter and trying to paint myself a natural view doing landscapes. Then a lot of world traveling, I settled in Marin County where I am fulfilled with natural beauty, views, and inspiration.
