

Full Digital Onboarding and  
Verification solution

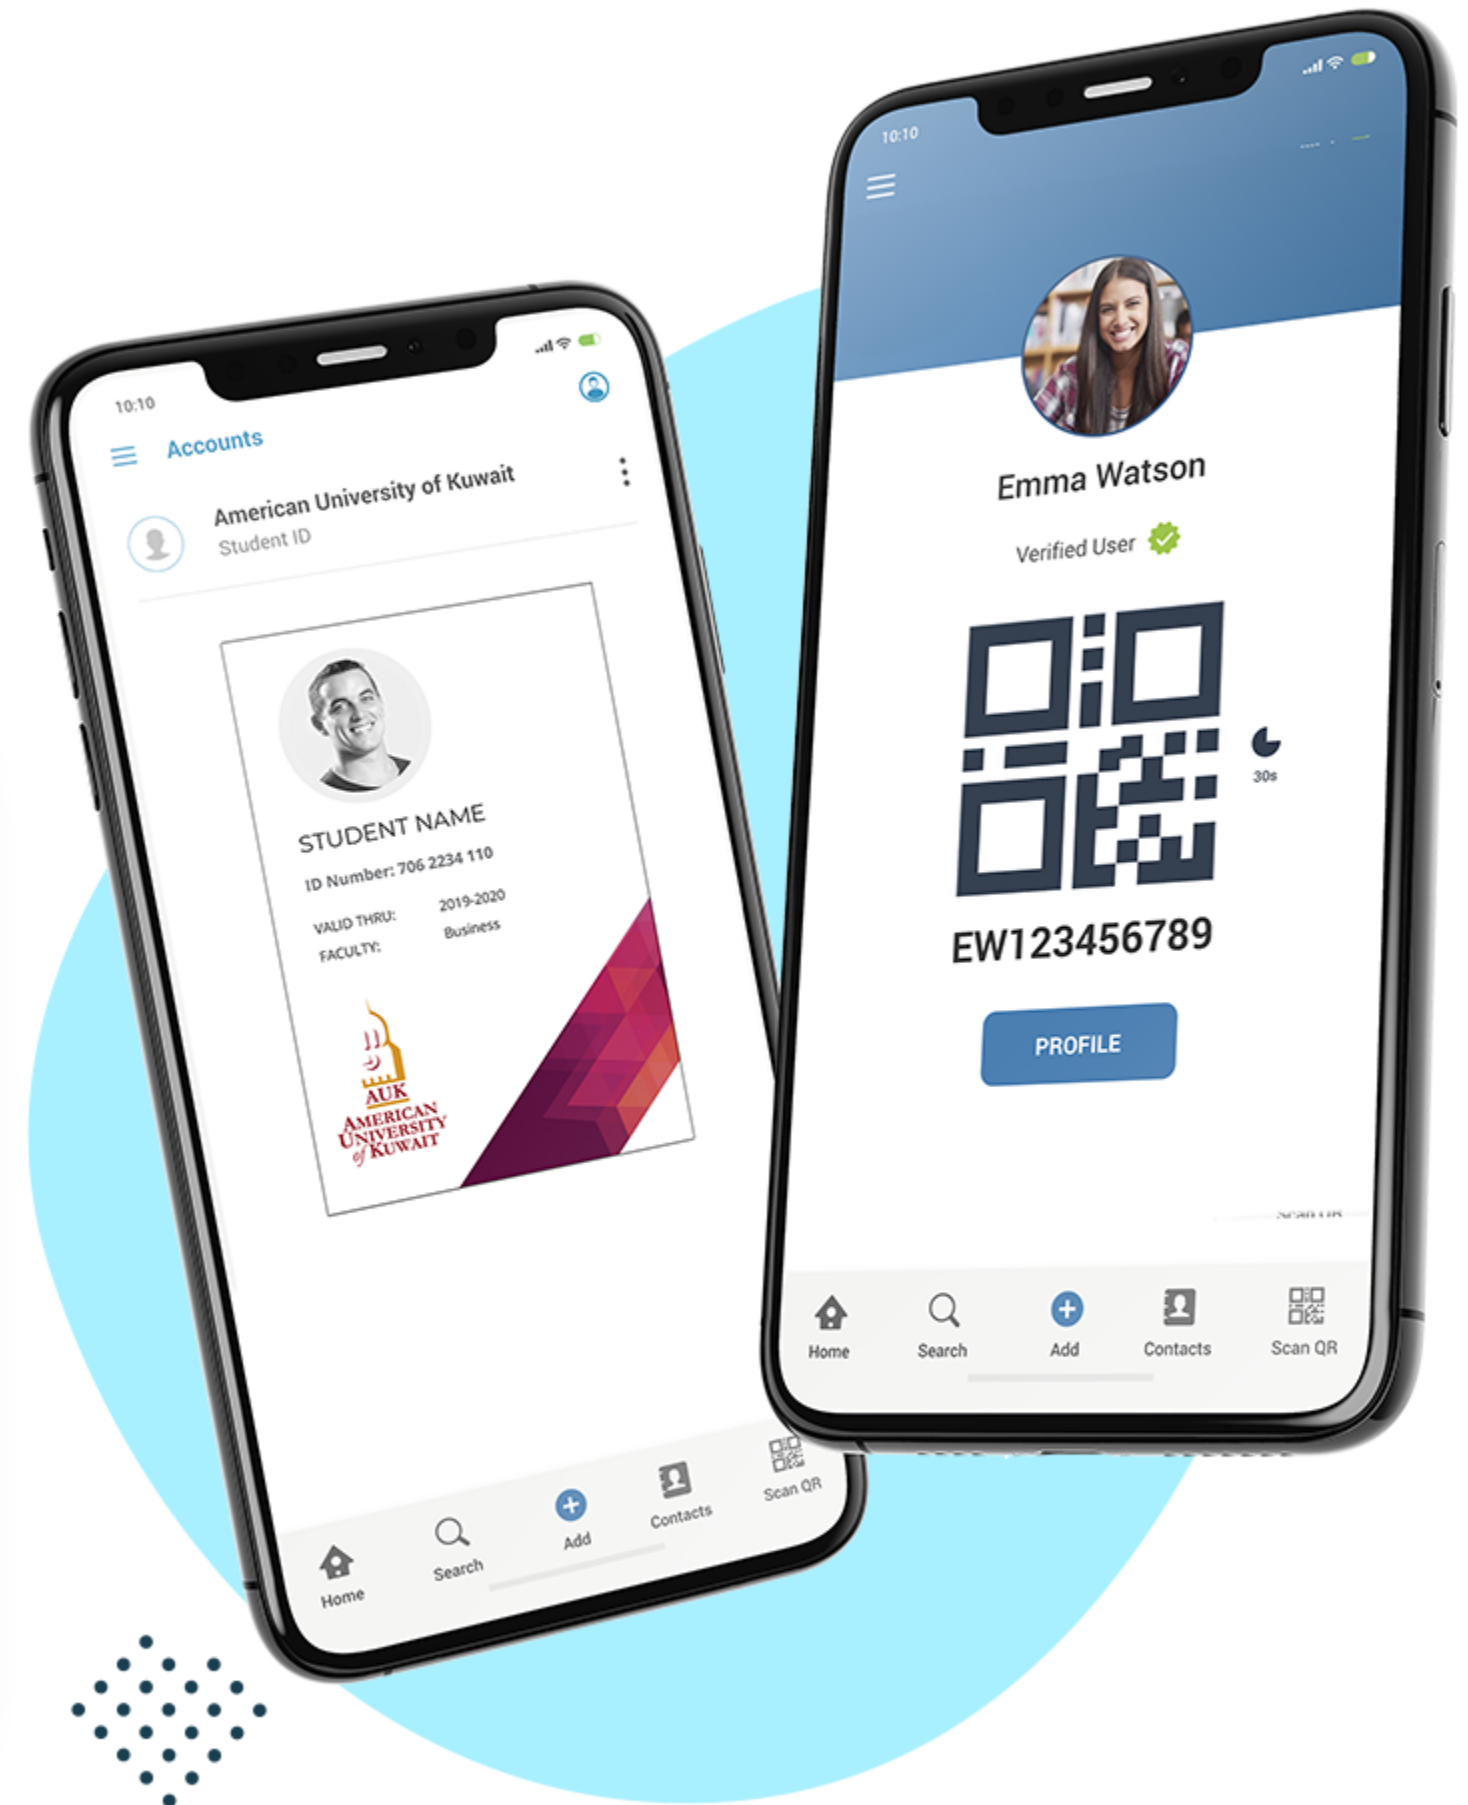

## ABOUT

# What is AKcess?

**AKcess** is a digital identity management solution that turns your mobile phone into your identification tool. AKcess is a digital wallet where users can store, create, verify, and securely share a range of documents, identities, and personal data. AKcess provides top-notch data security by encrypting your data, hashing it, and ensuring that it can only be viewed by institutions and individuals you grant access to.

We provide a **full Digital Onboarding and Verification solution**, with a KYC platform that helps enterprises, institutions, governments and customers share documents and data, save time, energy and money.
