### What is AKcess?

AKcess is a digital identity management solution that turns your mobile phone into your identification tool. AKcess is a digital wallet where users can store, create, verify, and securely share a range of documents, identities, and personal data. AKcess provides top-notch data security by encrypting your data, hashing it, and ensuring that it can only be viewed by individuals that you grant access to. We provide a full Digital Onboarding and Verification solution, with a KYC platform that helps enterprises, institutions, governments and customers share documents and data, save time, energy and money.

## With AKcess you can:

- ✓ Store and manage your IDs, Documents, and Data
- ✓ Sign and Share documents
- ✓ Login to your favourite websites and portals using your AKcess ID (QR Login)
- ✓ Form automation and digitise onboarding
- ✓ Verify, update, and manage KYC

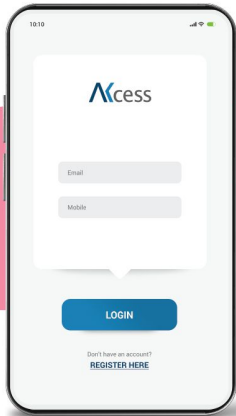

## Use Cases:

AKcess eKYC solution can be used in the following sectors and more:

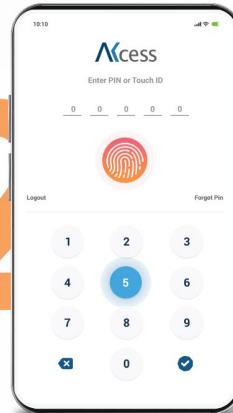

Embedded Encryption, biometric-keyed PII on your device, AES256- encryption and TLS protocol, AI & Human Verification, Fully compliant with international regulations
