RAMS: ASBVs EXPLAINED

Yes, we should have put this out a few weeks ago! The most important thing to know is that there is no point using ASBV's if you don't know where your flock sits in comparison (Merino Flock Profile Test), or where you want to go (your breeding objective).

Figure 1: How ASBVs are typically displayed

(let us know if want actual pocket sized one!)

CROP STUFF: STAFF SAFETY

This applies across all enterprises and all activities, but is particularly important as we come into harvest. Handy Harvest Staff Safety tips from ProcessWorx:

1. Induct new staff
2. Have a risk register
3. Hold staff meetings

4. Have a plan to manage fatigue
 5. Promote a culture of 'speaking up'
- Full article and more info [here](#).

ALL YEAR FEED

FEED365 project- looking at designing year-round grazing systems for our environment, to reduce sup feeding. Interested in having input, hosting a trial? Hit up your grower groups, as its run by GGA and DPIRD: [INFO](#).

We'll be following it closely over its 3 years and reporting back!

PODDING PASTURES

Native budworm are out and about in some areas and are enjoying feeding on spring podding pastures such as serradella, vetch, clover and medic. Signs are holes eaten through the pods and obviously, seeing the budworm!

Ask your local agronomist if they have seen many in your area and how to treat them.

WATCHING....

A focus on the value of an ewe from Ashley Herbert- too much to accurately summarise: [WATCH](#)
