NEW TO SHEEP

A course for those wanting to upscale their sheep knowledge and ensure all involved in the business speak the same language and are on the same page when it comes to the sheep operation.

Sessions are delivered in small groups on farm by industry experts, including vets, technology specialists, and advisors.

Outcomes

- Understanding key elements to a profitable sheep system
- Evaluate and understand key technical metrics, including:
  - Nutritional requirements
  - Measure Feed On Offer (FOO)
  - Develop and maintain feed budgets
  - Condition scoring
  - Identify key health issues
  - Understand local sheep production systems
  - Utilise technology: EID, remote sensors, and sheep handling systems

What's involved?

- Small regional groups of like-minded individuals
- Three half-day sessions throughout the year
- Ongoing phone and email support, plus participation in a WhatsApp group
- Access to AgPro resources and network

Cost

- $1,200 per participant
