New Pet Sitting Service Announced

Lehigh Acres, FL, August 15, 2017

Veterinary Technician, Regina Greene, has announced the opening of Vet Tech Services of SWFL, serving all of Lee County. Ms. Greene has over 15 years experience in the veterinary industry and has been actively pet sitting and offering in home pet care service for nearly 3 years.

When asked what separates her services from other pet sitting services in the area, she explained, "Once a pet owner leaves the Vet office, some of the take home instructions are harder to put into practice than what they first thought. My services will truly bridge the gap between the Vet's office and home, by taking the worry and guess work out of the equation for pet owners."

Ms. Greene is a lifelong Lee County resident, is a graduate of the University of Florida, and worked as a Veterinary Technician under the direction of a sole-practitioner for over 15 years. She noticed firsthand the worried and nervous faces when handing out take home instructions – and many times the owners pointedly wished for her services at their home. She decided to take her current pet sitting appointments to the next level by offering additional at home services. "My services are there to be used to complement the care of a primary Veterinarian; for example, while pet sitting, I can also administer medications and provide medicated baths."

Walking and feeding pets during owner absence is a function of her business, she also provides services for special needs and senior pets; as well as pet and pet-related transportation and house sitting. In addition to providing in-home care for pets, Ms. Greene of Vet Tech Services of SWFL also offers boarding in her own home.
