## PROFILE

International Business Footprint &  
Business Process Streamlining Leader

*A former automotive industry executive with responsibilities of a chief engineer in addition to directing the global footprint in manufacturing, engineering, supply chain & warehousing. The scope included customer-focused expansion, consolidation, and integration of technical centers with over 18,000 scientists, engineers, and technicians in 17 countries.*

Independent footprint and streamlining expert with over 40 years of combined industry and process implementation leadership.

- Launching or streamlining strategy driven business process and supply chain operations in over 70 countries
- Transforming captive & independent organizations with check-list guided constraint management principles
- Assumptions and risks mitigation that deliver business case expectations with training teams in throughput drivers & transactional process integrity.
