New Angle Beveling

Dual-Seal Insulated Glass Limited Warranty

New Angle Beveling (NAB) warrants its Insulated Glass Units for ten years after the date of manufacture against failure of the hermetic seal, resulting in condensation and film formation on the internal surface of the unit, due to faulty manufacturing by New Angle Beveling. This exclusive, limited warranty is extended to the original purchaser listed on the invoice and shall not apply to any other person or entity than said original purchaser.

Liability under this warranty for a defective unit is limited, at New Angle's option, to replacing such unit without charge to the original purchaser or, as an alternative, refunding 100% of the original selling price of the unit. The replacement unit will be covered by the same exclusive, limited warranty, but only for the balance of the original warranty period. New Angle Beveling reserves the right to inspect any alleged defective unit prior to removal from the glazing system or installation location.

New Angle Beveling will bear no liability to any person, entity, or property for any incidental, consequential, economic, direct, indirect, or special damages for any reason. **LABOR AND SHIPPING COSTS ARE NOT COVERED BY THIS WARRANTY.**

Exceptions to the 10 Year Warranty Term

The ten year warranty term will not apply to the following:

- Units that are produced using Super Spacer are limited to a Five year coverage term from the date of manufacture.
- Units that are produced using a Low Profile spacer are limited to a Five year coverage term from the date of manufacture

CONDITIONS THAT WILL VOID THE WARRANTY

NAB will have no liability under this warranty if any of the following events have occurred:

1. If the unit's glass surfaces or lites are cracked, chipped, or broken.
2. If the unit is exposed to perimeter glazing materials that are not compatible with the hermetic seal.
3. If the unit's seal is subjected to standing water or other liquids.
4. If the unit has been retrofitted with any contact film, tint or tape adhered to any glass surface.
5. If the unit is damaged or altered by handling, storage, or installation contrary to standard industry practices as referred by GANA, the FGMA glazing manual, or equivalent.
6. If the unit was installed in a high moisture environment, including but not limited to swimming pool enclosures, greenhouses and commercial refrigeration products.
7. If the unit was installed in a high vibration environment such as installation in Mobile Applications (Motor homes, trailers etc.)
8. If the unit was installed in slope glazing.
9. If the unit was not paid for in full by the original purchaser.
10. If the unit was discarded or destroyed.
11. Any insulated units that are Marine Glazed will not be warranted.
