

**Have you considered adding a rain garden or native plants to your shoreline?
The Forest County Program is here to help you!**

Beautiful flowers and other native plants along your shoreline or in rain garden:

- Bring more wildlife to your yard
- Deter geese and may lessen mosquitos
- Prevent runoff from entering the lakes and rivers
- Help protect lakes and rivers for future generations

We offer site visits, plant suggestions, and assistance in finding cost share.

Interested? Contact Steve at lcc@co.forest.wi.us or Kayla at lcctech@co.forest.wi.us or call 715-478-1387

Resources with information about the five Healthy Lakes and River best management practices and cost share funding opportunities are available, below.
