

**DON'T REPLACE YOUR ROOF  
REJUVENATE IT!**

# Rejuvenation vs Replacement.

There has to be a **better option!**

Our owners have been in the roofing industry nearly their entire lives and wanted to offer customers a better, more cost effective, alternative to prematurely replacing their roofs.

No Mess Services wants to bring your roof back to life with our ROOF REJUVENATION PROCESS. We use the highest quality materials and state of the art techniques in everything we do. A roof rejuvenation can transform your home while extending its life significantly.

# Does My Roof **Qualify?**

We do a thorough inspection, searching for ways to REFRESH, REPAIR and RESTORE your roof. Not all roofs qualify for our process and we will give you an honest evaluation and consultation on your best options.

60%

**We need 60%  
or more of the  
granules on your  
roof to qualify!**

# Why **Asphalt** Fails?

The overall asphalt shingle quality has been going down over the last 20 years. This is due to lack of access to quality asphalt flux in the market. This is the same reason you see asphalt roadways fail sooner and pot holes developing.

## Poor Quality Asphalt Flux

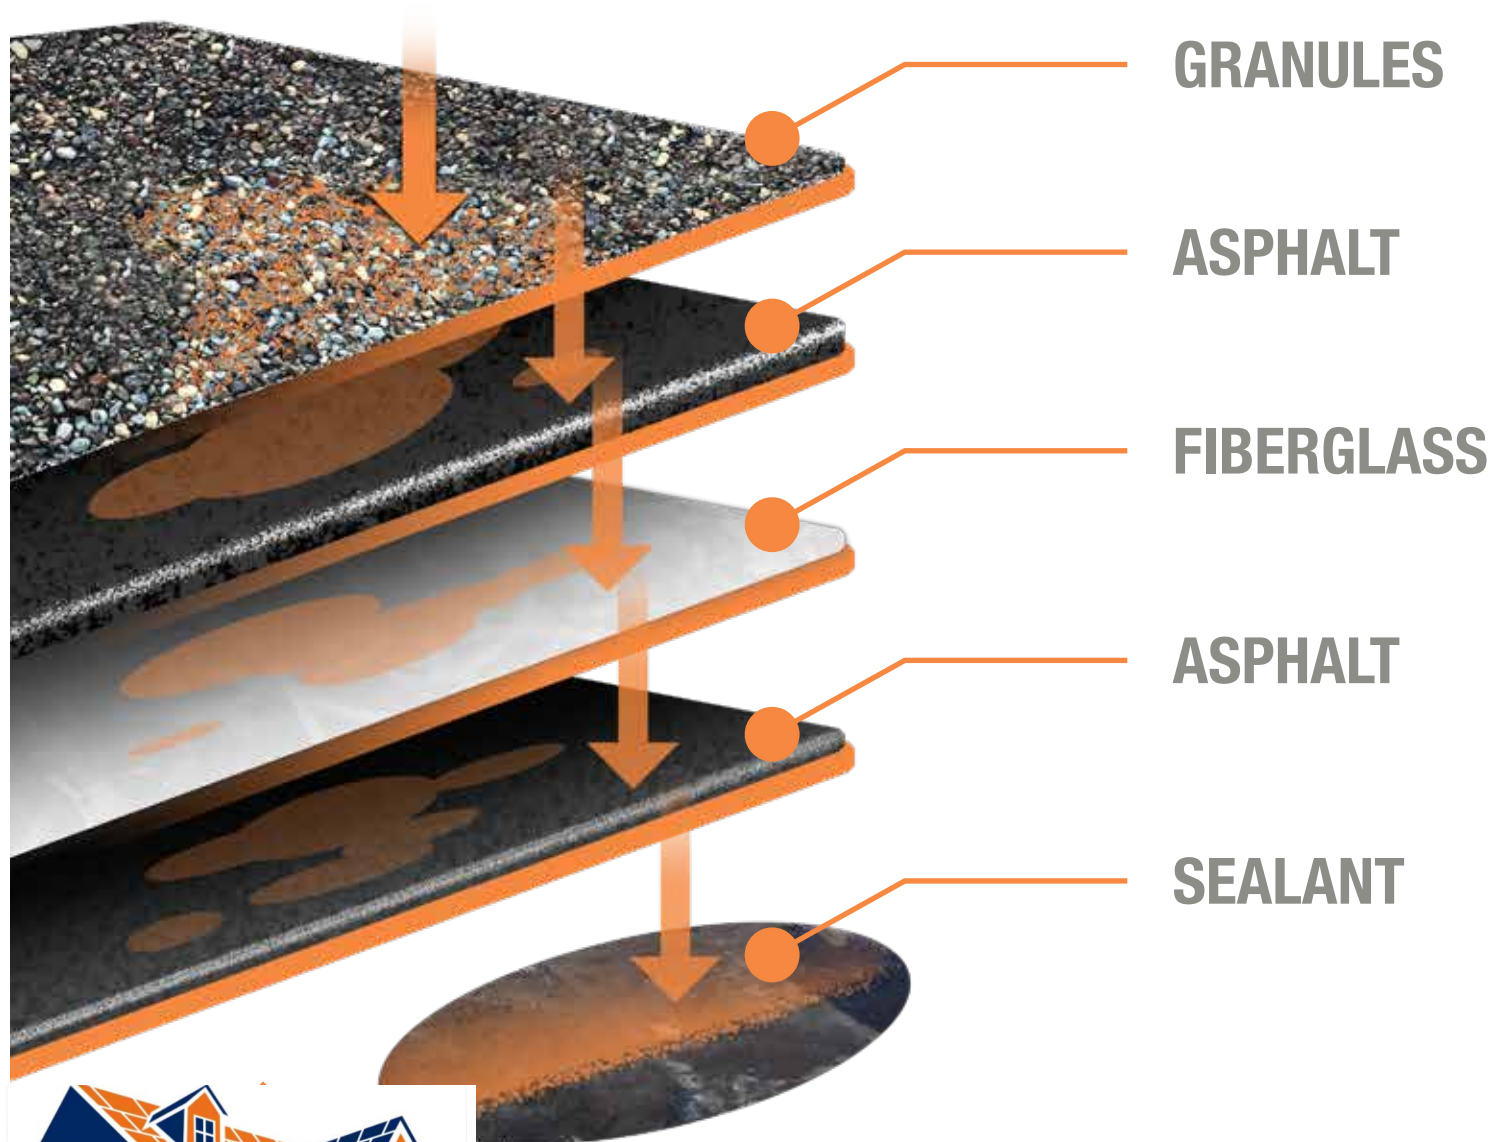

**REPAIR, REFRESH,  
REJUVENATE

# How Does it Work?

Our **Proprietary Soy Based Oil** penetrates all the layers of the shingles, giving you a more flexible shingle ensuring a more reliable seal!

**REPAIR, REFRESH, REJUVENATE**

**281-717-0589**

## How Does it **Work?** *Continued*

### Replacing Lost Oils

Natural agriculture oils have been used for the past 15 years to rejuvenate asphalt roads to replace the oils that are lost through years of aging.

### Increased Granular Adhesion

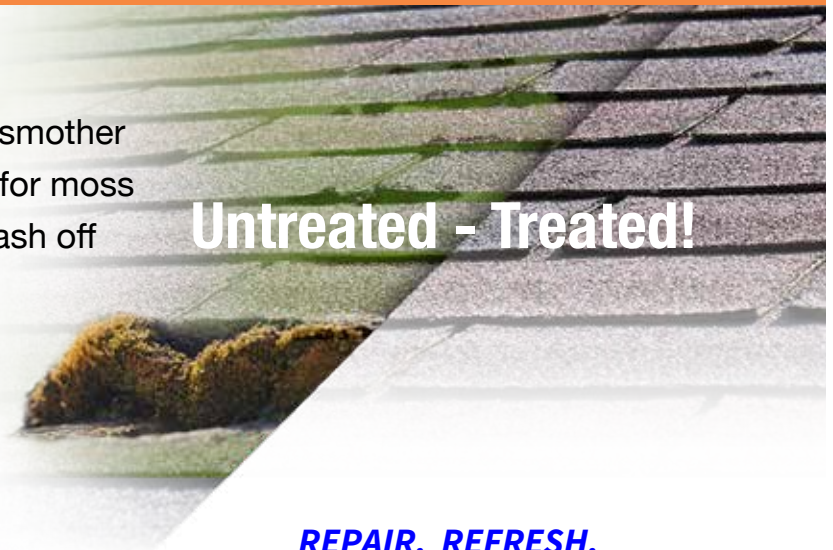

By rejuvenating the shingles, there is 86% better granular adhesion (better bonding). Increased flexibility which helps prevent damage caused by wind and hail.

### STOPS Moss Growth

When applied, Roof Rejuvenation will smother moss and algae, restricting the ability for moss to grow further. The dead moss will wash off after a good rain or roof cleaning.

**Untreated - Treated!**

## Less Shingles in Landfills

## Less Carbon Emissions

### We can make a difference!

Our process saves millions of squares of shingles from going to the landfill prematurely. This also leads to less carbon emissions which has us all doing our part to do our GREEN INITIATIVE!

**Hail Impact Resistance**  
Large Improvement

4

**Fire Resistance**  
40% Better Than Untreated Shingles

5YEAR

EXTENDED WARRANTY

## How it Works

1. *No Mess Rejuvenation System is designed to keep the shingles soft and flexible, thus helping the shingles extend their life for a period of five years or more.*
2. *No Mess will not warranty leaks, damaged shingle from hail, wind damage and other premature aging problems.*
3. *Covered if: Shingles lose flexibility during their five-year period and there are signs of shingles rolling up.*

## Notes:

1. *Remember it will take 2-6 weeks to see the cleaning results on most roof spray applications.*
2. *If there is heavy moss the process may take 1-3 months to see the final results.*
3. *We need access to your electric outlet and water spicket.*
4. *If project is ON-CALL Discount we can call anytime with 24 hours notice to apply formula.*
