THIS WEEK: Great day!!

We started by reviewing last week's class. Then we did a recap of what we talked about last time we were together... Leonardo de Vinci's science journal / sketchbook. We discussed how he wrote in code to keep his ideas private. He used shorthand and wrote everything in mirror writing. It is harder than you think.

The Renaissance Period was a time of invention also. We discussed the 6 types of simple machines and how together, they make complex machines. We had a lot of fun making and demonstrating simple machines on our Legos!

I challenged them with the task of observing their surroundings and finding simple machines in the things we use in our daily lives.

HW: No Time Travel Theatre homework but do check out Seed Art Share's upcoming Smart Arts Saturday workshops (**the next one is THIS Saturday the 13th and it's SHAKESPEARE!**) Many of the workshops will explore various subjects within science and I think they might be of interest to your kids. You can register for them as a bundle or you can take them a la carte! More info can be found at the top of this document.

NEXT WEEK: Students will be back with Mr. Dylan. Woohoo!
