

Disaster Relief

20' x 25' TARPS

**Each Tarp Includes Two 100ft : 500lb
Nylon Cords**

- 8 Mil Thickness
- Fire Rated At IAW Class A ASTM e84-11 Standard
- 100% Waterproof
- Reinforced Woven And Coated Polyethylene
- 80% After 200 Hours Per ASTM
- 3 Oz Per Square Yard
- 3 Ply Poly Material
- 1000 Strong Denier Fibers
- 10 x 10 Mesh Count Per Square Inch
- Grommets Approximately Every 36"
- Hems Reinforced With Rope
- Blue on Both Sides
- Arctic Temperature Flexibility
- 2 - 100ft, 500lb Nylon Cords

With three different sizes to choose from, Go/On Power Stations have the right product to meet your needs. Our smallest (300 Watts) gives you grab-and-go convenience and our largest (1,200 Watts) has the ability to run a full-sized refrigerator/freezer for hours. Add our 180 Watt solar panel for even more sustained power when the grid is down or you are off the grid.

GO/ON	300 Watt	600 Watt	1,200 Watt
BATTERY TYPE	LI-ION	LI-ION	LI-ION
BATTERY CAPACITY	315WH	576WH	1080WH
TOTAL POWER OUTPUT	300W	600W	1200W
DC INPUT	15V/6A	5-20V/5A	10-48V 6A (250W MAX)

These Go/On 180 Watt Solar Panels are perfect for power outages, off-grid adventures, camping, or emergencies. They are made with high-efficiency Monocrystalline Solar Cells, which are more efficient than polycrystalline cells and have a longer life span. The panels are lightweight and durable, with a tempered glass front and an aluminum frame. They come with convenient carry bag and all the necessary cords and accessories for all of your devices, including an MC4 connector for easy connection to your solar charge controller. The panels also have a 12/24V 20A Digital Display Controller and built-in diode to prevent reverse current flow and overcharging of your battery. With a power output of 180 watts, these panels are capable of charging a 12V deep cycle battery in 4-6 hours. They are also waterproof and snowproof, making them ideal for use in any weather condition.
MSRP \$600
