

ABOUT US

Message from the founder:

I joined the Navy after high school and served our country for 20 years. As a Service Disabled Veteran, it was time for a new career.

As the Activities Director for a Nursing Center, it was my job to interact with residents and find ways to improve their daily experience with activities, conversation, and love. With many confined to wheelchairs, keeping people comfortable often meant wrapping them in blankets.

Watching people choose between being comfortable and engaging in activities broke my heart and I had to find a solution. My kOHzee is the solution. My kOHzee is designed for comfort and mobility.

MY KOHZEE FEATURES

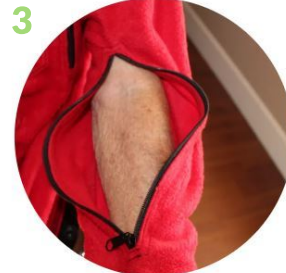

Adaptive Clothing designed for anyone with reduced mobility. Kids and adults alike love returning to their active lifestyle!

3

Access Ports

Chest Access port gives your doctor access to your chest. *Arm Access Port* gets rid of any need to disrobe to allow for access to a dialysis machine, standard blood test, or any other IV drip.

6

Activity Cuffs

Reading? Playing cards? Eating?

Activity Cuffs allows for any activity to be done without taking My KOHzee off. No more bunched-up sleeves!

1

Full Body Length

Designed for mobility and comfort, My KOHzee combines multiple pieces of clothing. With Adjustable full body length, keep yourself covered from neck to feet.

2

Carry Bag with Straps

My KOHzee folds into it's own travel bag! No need for extra baggage, take My KOHzee on-the-go attached to your wheelchair (or as a lap pillow) - great for airplanes or day trips!

4

Kangaroo Pocket

The Kangaroo Pocket at the midsection is used to keep your hands warm, as well as providing additional storage!

5

Breast Pocket

Never lose your phone or glasses again! Designed to keep all of your valuables close to your chest, you can have everything you need, right where you need them!

7

Sleeve Pocket

Keep your cell phone, cards, medication, or toys within arms reach, thanks to the My KOHzee *Sleeve Pocket*!

8

Dignity Flaps

The Dignity Flaps can be tucked under the user's legs to minimize leg exposure and ensure there are no gaps in coverage to keep you warm!
