

## **Carbon Management policy**

New Wave Electrical Consulting Ltd recognises its responsibility to reduce carbon emissions and contribute to a more sustainable, low-carbon future. This Carbon Management Policy outlines our commitment to managing and minimising the environmental impact of our operations through responsible energy use, efficient resource management, and continuous improvement.

The purpose of this policy is to provide a clear framework for measuring, reducing, and reporting greenhouse gas (GHG) emissions associated with our business activities. Our approach supports compliance with UK climate legislation and aligns with our clients' and stakeholders' sustainability objectives.

The company's key commitments are to:

- **Measure and Monitor:** Quantify and record carbon emissions from energy use, transport, procurement, and waste activities.
- **Reduce Emissions:** Implement strategies to improve efficiency, including using low-emission vehicles, optimising travel, and adopting energy-efficient technologies.
- **Sustainable Procurement:** Give preference to suppliers and materials with demonstrably lower carbon footprints.
- **Employee Engagement:** Raise awareness and encourage staff to adopt low-carbon practices in the workplace and during project delivery.
- **Offset and Compensate:** Where direct reduction is not feasible, support verified carbon offset initiatives to achieve net reduction goals.
- **Review and Improve:** Annually assess performance, set measurable reduction targets, and update initiatives in line with industry best practice and evolving legislation.

Through this policy, New Wave Electrical Consulting Ltd affirms its commitment to environmental leadership, sustainable growth, and achieving long-term reductions in its carbon footprint.
