

## **Sustainable Procurement Policy**

New Wave Electrical Consulting Ltd is committed to responsible and sustainable procurement practices that support environmental stewardship, social responsibility, and ethical business conduct. The purpose of this policy is to ensure that all goods, services, and works procured by the company are sourced in a way that minimises negative environmental and social impacts while delivering value and quality.

All employees and contractors involved in procurement are expected to consider sustainability criteria alongside cost, quality, and performance. The company takes a holistic approach to procurement, considering the full lifecycle of products and services, from production and transportation to disposal or recycling.

The company's key commitments are to:

- **Environmental Responsibility:** Prioritise products and services with lower carbon footprints, reduced energy and water use, minimal packaging, and recyclability.
- **Ethical Sourcing:** Ensure suppliers operate in compliance with labour laws, human rights standards, and fair working practices.
- **Supplier Engagement:** Work collaboratively with suppliers to encourage sustainability improvements and innovation.
- **Lifecycle Considerations:** Assess products and services based on durability, maintainability, and end-of-life management to reduce waste.
- **Compliance and Risk Management:** Ensure procurement activities comply with all applicable legislation, standards, and industry best practices.
- **Monitoring and Continuous Improvement:** Regularly review procurement decisions and supplier performance to identify opportunities for increased sustainability.

By embedding sustainable procurement into decision-making, New Wave Electrical Consulting Ltd demonstrates its commitment to responsible business practices, reduces environmental impact, and supports long-term social and economic benefits for the company and its stakeholders.
