

Energy Management policy

New Wave Electrical Consulting Ltd is committed to managing energy use responsibly and efficiently across all its operations. The company recognises that reducing energy consumption is essential to controlling costs, protecting the environment, and supporting the transition to a low-carbon economy.

The purpose of this policy is to establish a structured approach to monitoring, managing, and reducing energy use while promoting sustainable practices among employees, contractors, and suppliers. Energy efficiency is considered a key component of operational excellence and environmental stewardship.

The company's objectives are to:

- **Monitor and Measure:** Track energy consumption across offices, vehicles, and worksites to identify patterns, inefficiencies, and opportunities for improvement.
- **Reduce Usage:** Implement practical energy-saving measures such as efficient lighting, equipment maintenance, and responsible use of heating, cooling, and electrical systems.
- **Sustainable Procurement:** Consider energy performance and lifecycle impact when selecting tools, vehicles, and equipment.
- **Employee Awareness:** Encourage all staff to adopt energy-conscious behaviours through training, communication, and example.
- **Continuous Improvement:** Regularly review energy performance and set measurable reduction targets aligned with company and client sustainability goals.
- **Compliance:** Meet or exceed all relevant energy efficiency and environmental regulations.

Management is responsible for ensuring this policy is applied consistently, supported by measurable objectives and performance reviews.

Through efficient energy management, New Wave Electrical Consulting Ltd demonstrates its commitment to sustainability, cost-effectiveness, and corporate responsibility in all business activities.
