Shaping Lives
— Since 1986 —

Professional Nail Technology Training

Did you know the history of nail care dates back to 5000BC? Manicuring of the hands and feet is popular for both men and women. The practice of making nails and feet look healthy and exotic is still alive today.

If you are anything like us and follow the trends on social media, fascinated by the precision and artistic designs created by nail technicians today, you are not alone.

It is exciting to see how the Nail Industry has evolved over time, continuing to grow and offering income opportunities to professional licensed nail technicians.

***Expand
your
