

2C Environment started with the goal of making secondary containments easier and faster to setup and take down.

Our Patent Pending Panel design allows infinite configurations and draws it's strength from gravity combined with a unique locking system.

All created from thermally stabilized 100% recycled Polyethylene based products.

# The Next Gen Containment System You can Piece Together Yourself.

## MANAGEABLE LIGHTWEIGHT

The Heaviest Component  
of the Wall is 21 Lbs.

No Power Tools or Wrenches  
Required for Assembly.  
No Bolts, Pins, Legs or Pads!

## RESILLIENT STRENGTH

Thermally Stabilized for  
Arctic Cold or Texas Heat  
UV Resistant for 20+ Years

Impact Resistant,  
Rust & Corrosion Proof  
Chemical Resistant,  
No Paint to Scratch or Wear Off

## PORTABLE STACKABLE

Minimize Transportation Costs  
& Storage Space

Easily Stored and Transportable

## ENVIRONMENTAL FRIENDLY RECYCLED POLY

100 % Recycled

100% Recycled Commercial  
Grade Plastic

## SHAPE FRIENDLY FLEXIBLE CONFIGURATION

Connect to Create  
45, 90, 135 Degree Patterns

Easily run panels in straight lines,  
curved or around obstacles

## PROUDLY PATENT PROTECTED

Canadian Green Tech.

Patent # 3,033,434

U.S. Patent Pending # 16/276,062
